Wireless Configuration for iOS Devices (iPhone/iPad)

Berklee’s wireless is now moving to OnePass. This change requires you to change some settings on your iOS device.

1. Tap settings on the home screen of your device.

2. Scroll down to “General” and select it.

3. Scroll down to “Profile” and select it.

4. Look for the Berklee wireless profile. Verify that the description states that it is for connecting to the Berklee-Staff network/Wi-Fi.

If the description contains the phrase MDM, or Mobile Device Management, leave it alone and check for other profiles.

5. Tap remove and then confirm remove at the prompt.

6. Enter your 4-digit passcode.

7. Go back to Settings and select Wi-Fi.
8. Tap Berklee-Staff and enter your username and OnePass password.

9. Accept the new security certificate.

You are now reconnected to the Berklee-Staff WiFi.
