Proposal Summary

Beginning in fall 2018, Berklee proposes launching two online master’s degree programs—a Master of Arts in Music Business and a Master of Music in Music Production. These graduate programs, modelled after Berklee’s successful one-year, full-time residential master’s degrees, are also designed to be completed in one year or four semesters of study, if students enroll in three courses a term for four semesters (fall, winter, spring, and summer). These programs ladder with Berklee’s successful online Bachelor of Professional Studies programs, which were launched in fall 2014, largely to expand the college’s reach and to provide opportunities for students for whom full-time residential study is not the best option.

This report describes the graduate programs, the proposed curriculum, and the intended student body, and discusses how the programs and students will be supported.

Berklee has been offering courses online since 2003 to tremendous success. More than 30,000 students from over 90 countries around the globe have taken Berklee Online courses. Berklee has been honored by the University Professional and Continuing Education Association (UPCEA) with awards for outstanding online courses regularly since 2005. In 2015, Berklee received the award for strategic innovation in online education from UPCEA. The award recognizes an institution of higher education that has, at an institutional level, set and met innovative goals focused on online education, and has been strategic in planning, development, implementation, and sustainability. That same year, Berklee won the arts and humanities discipline award from Reimagine Education for its online programs. Berklee Online instructors Loudon Stearns, Brad Hatfield, and Neil Diercks have each won UPCEA’s national excellence in teaching award (in 2012, 2014, and 2015, respectively), with instructor Tom Rudolph winning the UPCEA regional continuing education faculty award in 2016. Also, in 2016, Berklee was recognized for the marketing of its online programs, winning the UPCEA gold award for the strategic recruitment marketing plan category, and silver awards in the categories of brochure/booklet and online display ads. In 2017, Berklee received the UPCEA International Program of Excellence for its grant-funded work (in partnership with the Inter-American Development Bank) to deliver massive open online courses (MOOCs) in Spanish and Portuguese in an effort to reach at-risk youth in Latin America. More detail about Berklee Online can be found on the Berklee Online website: online.berklee.edu/about/berklee-online. Berklee provides public access to sample lessons so that potential students can see the award-winning design and explore before they register: online.berklee.edu/sample-a-lesson.

In fall 2014, Berklee launched online Bachelor of Professional Studies degrees. These have also experienced success, with over 79 percent of students continuing or graduating each year. Of the first entering year’s 381 students, 22 percent, or 85 students, graduated within three years, and 57 percent, or 217 students, remain active, for a total of 79 percent continuing or graduated. Thirty-five of the students who started in academic year 2015–2016 have graduated, and 561 are still active, for a continuing or graduating rate of 80 percent. Two of those who started in the 2016–2017 academic year have graduated, and 670 of the 681 who began that year are still enrolled, for a 99 percent rate of continuing or graduating. As the chart shows, demand has continually increased, with over 1,500 students enrolling since 2014.
Each year, more than 200 online students come to Berklee’s Boston campus for optional “Berklee Onsite” residencies: two days of on-campus meetings, seminar sessions, workshops, jams, and concerts. These provide an on-campus experience for students in the online program. Berklee also provides graduating online students the opportunity to participate in commencement. At Berklee’s most recent graduation in Boston in May 2017, 65 of those who completed the online bachelor’s degree walked in the ceremony.

Berklee’s online offerings enable the institution to reach the world beyond the confines of the physical campuses in Boston, Massachusetts, and Valencia, Spain. This has expanded Berklee in ways that are essential to the institutional vision: to “transform arts education and empower artists to better our world.”

Introduction to Berklee

Berklee College of Music was founded on the revolutionary principle that the best way to prepare students for careers in music is through the study and practice of contemporary music. Since its founding in 1945, the institution has evolved to reflect the state of the art of music, performing arts, and the entertainment business.

Berklee College of Music has been continuously accredited in the United States through the Commission on the Institutions of Higher Education of the New England Association of Schools and Colleges (NEASC) since 1973. In 2012, as the college opened the Valencia, Spain, campus, NEASC approved that campus as well as the college’s request to add master’s degrees to its educational offerings. At the same time, NEASC also approved the college’s request to offer bachelor’s degree programs online. In 2016, as Berklee College of Music merged with the well-regarded Boston Conservatory, the institution received authorization to offer all the degrees that had been approved and accredited separately at the two institutions: Bachelor of Music, Bachelor of Professional Studies, Bachelor of Fine Arts in theater and/or dance, Master of Arts, and Master of Music as well as Master of Fine Arts in musical theater and/or dance.

With a diverse and talented student body representing more than 100 countries and a music industry “who's who” of alumni, Berklee is the world's premier learning lab for the music of today—and tomorrow. Newsweek recently ranked Berklee College of Music as third among all U.S. colleges that “offer an exceptional artistic atmosphere.” In 2016, Billboard listed Berklee as one of 12 “Elite Music Business Schools Shaping the Industry’s Future,” highlighting Berklee’s growth in Valencia and its music business degree programs. The Luxonomist ranked Berklee’s campuses in Boston and Valencia as the top two music colleges in the world. The Hollywood Reporter ranked Berklee College of Music as the number eight music school in the world. Berklee's Valencia campus recently earned the Fundacion Excelentia Award for the most innovative education project in Spain.
Berklee’s annual fall enrollment snapshot shows a student body of just over 6,400 students, 909 of whom were enrolled in online bachelor’s degree courses in fall 2016. This enrollment makes Berklee one of the world’s largest music and arts institutions. The student body is also among the most diverse in the United States, with 30 percent of the students being from outside the United States.

Berklee’s graduates are prepared for success. Berklee alumni have earned 275 Grammy Awards, 88 Latin Grammy Awards, 25 Emmy Awards, eight Oscar Awards, and five Tony Awards. Some of the best known alumni are Paula Cole B.M. ‘90, Melissa Etheridge ‘80 ‘06H, Juan Luis Guerra ‘82, Quincy Jones ‘51, Diana Krall ‘83, Branford Marsalis ‘80, John Mayer ‘98, Danilo Pérez B.M. ‘88, Esperanza Spalding B.M. ‘05, Alf Clausen ‘66, and Howard Shore B.M. ‘69 ‘08H. Alumni have also gone on to win the Thelonious Monk International Jazz Competition, the world’s most prestigious jazz competition, and to win admission to the Thelonious Monk Institute of Jazz Performance.

Adding a master’s degree offering online will expand Berklee’s ability to foster success among musicians, entertainment industry professionals, and performing artists around the world, and will enable Berklee to expand opportunities for students for whom full-time residential study is not the best option.
Standard 1: Mission and Purposes

Berklee is a unique 21st-century educational institution that provides students a complete array of opportunities upon which to build the foundation of their life's work and discover their authentic artistic voices. Berklee provides creative opportunities that characterize the 21st century’s new artists and hybrid art forms. Graduates are prepared to succeed in careers ranging from performance to production and from composition for contemporary media to music education, music therapy, music technology, and the business of music. The goal of Berklee is simple and ambitious: to attract the most talented, creative, and motivated students in the world; to offer them a challenging and satisfying experience while they are students; and to give them the best possible platform for success as the next generation of leaders in every aspect of performing arts endeavor. Berklee seeks to provide students, both on campus and online, as many educational opportunities as possible while also offering flexibility in educational delivery and multiple pathways to earn their degrees. Offering bachelor’s degree programs online has added to the options students have. Adding and expanding online master’s degrees will further those options.

Berklee’s commitment to students and to arts education is clear in our mission, vision, and purposes.

A Vision for Berklee in 2025
On September 23, 2016, the Board of Trustees voted unanimously to approve a revised vision for Berklee in 2025:

As the preeminent institute of contemporary music and the performing arts, Berklee will transform arts education and empower artists to better our world. Building an inclusive culture that promotes diversity in all its forms, we will nurture the growth of the world’s most inspired artists in music, theater, and dance, so they may fully realize their creative and career potential. Berklee will forge new connections among art forms, musical traditions, technologies, and institutions, creating a dynamic global network that fosters innovation, collaboration, and community.

Mission Statement
Berklee College of Music

Berklee’s mission is to educate, train, and develop students to excel in music as a career.

Developing the musicianship of all our students is the foundation of our curriculum. We believe that the lessons and qualities derived from that work—the self-discipline needed for excellence, the empathy required of music making, and the openness and curiosity essential to creativity—are critical to achievement in any pursuit, musical or otherwise. We also believe that music is a powerful catalyst for the kind of personal growth central to any collegiate experience.

Founded on jazz and popular music rooted in the African cultural diaspora, our comprehensive curriculum is distinctly contemporary in its content and approach, and it embraces the principal musical movements of our time. Through a course of scholarly and practical learning experiences integrating performance and writing, our curriculum covers the variety of influential styles, relevant technologies, and career opportunities open to today’s music professional.
Standard 2: Planning and Evaluation

Planning
Focusing on the institutional mission, Berklee uses a 10-year vision-planning horizon supported by multiyear strategic plans. As mentioned, the Vision for Berklee in 2025 states:

As the preeminent institute of contemporary music and the performing arts, Berklee will transform arts education and empower artists to better our world. Building an inclusive culture that promotes diversity in all its forms, we will nurture the growth of the world’s most inspired artists in music, theater, and dance so they may fully realize their creative and career potential. Berklee will forge new connections among art forms, musical traditions, technologies, and institutions, creating a dynamic global network that fosters innovation, collaboration, and community.

The president’s cabinet met for a strategic planning retreat on March 11, 2016. This retreat focused on priorities for the next three-year period and directed Berklee’s senior vice president for innovation, strategy, and technology to complete a draft strategic plan for community review and input by the end of April 2017. President Roger H. Brown used the foundational work of the strategic planning process to build his State of the College and Conservatory addresses, held November 4, 8, and 17, 2016. While summarizing the planning work to date, these addresses included a call to action to respond to online surveys requesting community input into the final stages of the process.

The full draft plan is available in appendix 2.1. The plan explains that “pathways” is the overarching theme for Berklee over this next period:

The completion of the merger with the Conservatory in June 2016...set the stage for creating a transformative model for performing arts education, one that provides students with a wide range of flexible and experiential options for achieving their educational goals. By creating learning pathways among the Boston and Valencia campuses, Conservatory programs, online programs, study abroad, internship opportunities, and educational partners, we are positioned to create the world’s most dynamic and comprehensive program for music, dance, and theater education.

The following principles define the plan:

- Commit to providing high-quality student experience in everything we do.
- Think globally about access to Berklee’s educational programs.
- Realize the artistic, creative, and career potential of our community members.
- Evaluate new initiatives from the business process, capacity, demand, and resource perspectives.
- Make affordability, retention, and graduation a key focus in all planning and operational decisions.

The plan will officially launch at the institution’s Opening Day event in fall 2017. Special attention will be placed on communications to the Berklee community to ensure that we all have the new vision and strategy as guides to focus our work.

Offering master’s degrees online follows Berklee’s strategic priorities and principles. This initiative responds to a strategic priority to offer innovative programs in support of student success, and it expands Berklee’s reach by providing graduate programs to students who are not able to come to campus. As well, it enhances affordability as the online programs have a tuition cost that is approximately 70 percent of the cost of the on-campus programs (the one-year online master’s degree programs will have a tuition cost of $33,120 a year while the one-year on-campus programs range in annual price from $41,510 to $47,500).

Planning for the online master’s degree programs has been careful and thorough. As mentioned above, Berklee College of Music launched online bachelor’s degrees in fall 2014 to great success and rapidly increasing enrollment. In the 2014–2015 academic year, the year the online bachelor’s degrees launched, there were 244 students in the program as of the annual fall enrollment snapshot. By the fall of 2015–2016, the annual fall enrollment snapshot showed an increase of almost 150 percent, to 602 students. In this past academic year, 2016–2017, the fall enrollment snapshot showed an increase again to 909 students.
### Berklee Online’s Undergraduate Enrollment Trends

Note: Students with dual majors are listed once for each major. Undeclared students are not included in the major breakdown. Values shown as a dash are not available at this time.

The number of majors offered in the bachelor’s degree program online has increased as well, including music business/management and music production and engineering, the first two majors and the ones that remain the most popular. Other majors include electronic music production and sound design; music composition for film, TV, and games; interdisciplinary music studies; songwriting; and guitar.

Consistently, Berklee online undergraduate students have asked for master’s degrees to be offered online. In a recent survey to these students, 68 percent, or 927 out of the 1,357 surveyed, indicated interest in online graduate programs from Berklee. Berklee’s academic advisors confirm this information. Of those students surveyed, the majority, or 63 percent, were interested in a master’s degree focusing on music production; 40 percent were interested in a master’s degree focusing on music business; 36 percent were interested in a master’s degree in composition; and the remaining students expressed interest in master’s degree programs in performance, music education, or other subjects. Given the great interest in music business and music production, and the fact that these two programs were the first undergraduate majors, Berklee plans to expand its online graduate offerings with a Master of Music in Music Production and a Master of Arts in Music Business.
We use the word “expand” here as Berklee has entered the online graduate studies space already in two ways. Berklee has a successful relationship with Southern New Hampshire University (SNHU), offering an online Master of Business Administration in Music Business. The degree, conferred by SNHU, is built around an M.B.A. curriculum complemented by business courses that are specific to the music industry. Nine core courses at SNHU instill the solid business education students need to succeed, while four courses from Berklee bring knowledge and skills needed specifically for the music industry. This relationship with SNHU and this degree will continue even as Berklee launches its own online master’s degree programs.

As well, Berklee’s Master of Arts in Music Therapy, launched in fall 2015, is designed as a low-residency program. All of the courses are online, with students coming to campus once in the fall and once in the spring for two four-day residencies. This program, too, has been successful, with the first class completed in spring 2017 and with a graduation rate of 92 percent.

Berklee’s decision to expand its online offerings in graduate education has been planned carefully and has the full support of the institution. Discussions began with the Berklee Online board committee in July 2016 and continued in October 2016, February 2017, and May 2017. As well, the entire Board of Trustees reviewed and discussed the proposal in September and December 2016, with approval on September 23, 2016. Prior to the discussion at the board meeting, the president and the president’s cabinet reviewed and supported the plan. Since that time, the vice president of online education, working with the dean of institutional research and assessment/graduate studies have convened faculty groups who worked throughout the spring 2017 semester to design the curriculum. The curriculum was presented before and approved by the graduate studies committee and the provost in July 2017. Curriculum development is ongoing as the courses are being designed to be run fully online. Additionally, the institution has hired two new course designers and a video editor who will be dedicated to preparing the online master’s degree programs. They will be working with the existing staff to have everything fully ready by summer 2018 for a fall 2018 launch. Berklee fully expects that additional program concentrations will be added as Berklee’s online graduate offerings mature.

**Evaluation**

Over the past few years, Berklee has placed increasing focus on how we collect, process, and analyze data to assist with ongoing evaluation and strategic planning. A position at the dean level for institutional research and assessment as well as several new data analyst positions, including a data manager/analyst and a data visualization specialist, have allowed us to strengthen processes for data-driven decision making. An institutional process for academic program review has been in place since 2010.

In addition to strengthening the Office of Institutional Research and Assessment, a data governance council was founded, sponsored by the senior vice president of technology resources, who was hired in fall 2015 to improve Berklee’s technology infrastructure in support of this focus on data and assessment. This council brings together leaders from all areas of Berklee to share information about business processes and data as the institution continues to improve and streamline its operations.

In addition, Berklee's new strategic plan includes an entire section on infrastructure to improve business processes that support evaluation and planning based on strengthened data management and assessment. This includes, as the strategic plan states, undergoing “a systematic business process review with the end goal of providing a higher level of customer support using modern approaches supported by appropriate technology.”

**Standard 2 Appendix**

- [2.1 Draft Strategic Direction for Berklee 2017–2020](#)
Standard 3: Organization and Governance

The systems of organization and governance at Berklee facilitate the accomplishment of the mission and purpose of the institution. The organizational design and governance structure enable the institution to create and sustain environments that encourage teaching, learning, service, scholarship, research, and creativity.

All academic programs are, ultimately, led by President Roger H. Brown and Lawrence J. Simpson, senior vice president for academic affairs/provost. Provost Simpson reports directly to President Brown.

Berklee’s Academic Leadership
As provost, Simpson oversees all faculty. He leads four vice presidents (vice president for academic affairs/vice provost, vice president for curriculum and program innovation, vice president for special programs, and vice president for academic affairs of Boston Conservatory at Berklee); the associate vice president for global initiatives; the deans of Berklee’s three academic divisions (Professional Education, Professional Performance, and Professional Writing and Music Technology); the executive director of Berklee’s campus in Valencia, Spain (who has a dual report to the provost and the president); and the director of academic budgeting and administration. Additionally, the dean of institutional research and assessment/graduate studies, the dean for faculty development, the dean of learning resources, and the assistant vice president for academic operations all report up to the provost, as do all academic associate deans, program directors, and chairs. The deans of the Music, Musical Theater, and Dance divisions at Boston Conservatory at Berklee report to the provost through him, also report up to the provost.

Berklee Online’s Academic Leadership
The senior vice president of online learning and continuing education reports directly to President Brown. She supervises the online campus. The vice president of online education, who serves as the online campus academic dean, reports directly to the senior vice president of online learning.

The vice president of online education supervises the online education and, ultimately, all faculty who teach online. She oversees the curriculum development, teaching, and implementation of Berklee’s online programs, including the bachelor’s degrees and the proposed master’s degrees. She is ultimately responsible for the student experience and for student success in online education. Additionally, the dean of institutional research and assessment/graduate studies works directly with the vice president of online education to ensure quality as well as student learning and success. As dean of graduate studies, she oversees all graduate education, whether in Valencia, Boston, or online.

Program Director/Lead Faculty Facilitator
On Berklee’s residential campuses, each graduate program is led by a program director who reports directly to the division dean of his or her area and functionally to the dean of institutional research and assessment/graduate studies. This program director serves as a leader of the program curriculum as well as a key instructor; provides program oversight, ensuring overall program quality and the integrity of the learning experience; serves as a resource for the enrollment team with regard to application review and recruitment activities; and responds to press inquiries, as needed.

This will be the same for the online master’s degree offerings. Online, this position will be titled slightly differently. Online faculty are entitled “facilitators,” who are contracted to teach particular courses. This program director role for the online master’s degree will be titled as the “lead facilitator.”
For the Master of Arts in Music Business online, the lead facilitator will be John Kellogg, the recently retired assistant chair of Berklee’s Music Business/Management Department. In addition to his 10 years as assistant chair at Berklee, he has been a practicing attorney, specializing in artist representation and music publishing for many years. He has represented recording artists the O’Jays, Levert, Eddie Levert Sr., LSG, Stat Quo of Shady/Aftermath Records, and G-Dep of Bad Boy Records. He also served as a member of the management team for the late R&B recording star Gerald Levert, whom he represented throughout his career. Kellogg is former president and member of the Board of Directors of the Music and Entertainment Industry Educators Association (MEIEA) in addition to being a former board member of the Black Entertainment and Sports Lawyers Association (BESLA) and a 2005 inductee into the BESLA Hall of Fame. He is the author of the book *Take Care of Your Music Business: The Legal and Business Aspects You Need to Know to Grow in the Music Business* as well as numerous legal articles and editorials. A former vocalist with the group Cameo, Kellogg has been profiled in *Billboard*, *Ebony*, *Black Issues*, and *In the Black* magazines. He holds a Juris Doctor degree from Case Western Reserve University, where he also attended the Weatherhead School of Management. In addition, he holds a Master of Science degree in television and radio from the Newhouse School of Communications and a Bachelor of Arts degree in political science—both from Syracuse University. He has authored a course for Berklee’s online undergraduate degree and is the author of the Music Business Foundations Coursera course. He will be authoring and teaching the OMBUS-505 Music Business Revenue Streams course in the graduate program as well as providing overall program leadership.

For the Master of Music in Music Production online, the lead facilitator will be Enrique Gonzalez Müller, associate professor at Berklee, housed in the Music Production and Engineering Department on the Boston campus. Gonzalez Müller started his career as a music producer and engineer at the Plant Studios, working with artists like the Dave Matthews Band, Joe Satriani, Joan Baez, Les Claypool, and members of Metallica. In his home country of Venezuela, he’s produced many chart-topping albums for Caramelos de Cianuro, Viniloversus, and Desorden Publico, and in 2009, his collaboration with Los Amigos Invisibles won the band a Latin Grammy Award for their album *Commercial*. In Italy, among many collaborations, Gonzalez Müller has produced, arranged, and mixed albums for L’Aura and scored a number one hit with "Teach Me Again" from Elisa and Tina Turner. In the U.S., he has recently worked with the Kronos Quartet and Nine Inch Nails, and toured with Wynton Marsalis as well as many up-and-coming artists. In 2015, Gonzalez Müller was the recipient of Berklee's Distinguished Faculty Award for his innovative work as an educator. He earned a Bachelor of Music from Berklee College of Music and has completed filmmaking and professional photography studies at the San Francisco Art Institute, Massachusetts College of Art, and the Museum School at the Museum of Fine Arts in Boston. He is the author of one of Berklee’s Coursera courses offered in the Spanish language, *Producción Musical y su Efecto en la Composición*, which was the recipient of the 2017 International Program of Excellence Award from the University Professional and Continuing Education Association (UPCEA). He will be authoring and teaching OMPRD-577 Music Production: Maximizing Emotion through Performance, Arrangement, and Sound, and OMPRD-588 Creative Recording Techniques courses in the graduate program as well as providing overall program leadership. (See appendix 6.1 for the full curriculum vitae for both Kellogg and Gonzalez Müller.)

See the organizational chart for Berklee Online in appendix 3.1. This shows the academic, enrollment, support, and technical staff for the online campus.
Curriculum and Policy Committees
Berklee’s academic curriculum and policy committees oversee curriculum, pedagogy, and policy issues for all of Berklee’s programs, and have representation from all areas for the institution, including the online campus. All of these committees, ultimately, report to the provost.

Institution-Wide Committees
Berklee’s academic leadership team (ALT), the institution’s highest academic body, is chaired by the provost. Serving on this body are the deans who lead all of the academic divisions of the institution. As well, the academic leadership team includes the four academic vice presidents (the vice provost, vice president for academic affairs/dean of Boston Conservatory at Berklee, the vice president of curriculum and program innovation, and the vice president for special programs); the associate vice president for global initiatives; the dean of institutional research and assessment/graduate studies; the vice president of online education; the dean of learning resources; the dean of faculty development; the dean of Berklee City Music; the assistant vice president for academic operations; and the executive director and academic dean of the Valencia campus.

The college curriculum committee (CCC), chaired by the vice president for curriculum and program innovation, has representation from all areas of the institution, including the online campus, and comprises academic deans, chairs, program directors, faculty, and representatives from student affairs, including enrollment and admissions. It has broad oversight over the undergraduate curriculum. The committee reviews revisions to the curriculum, including course and program proposals as well as deletions and additions. The committee makes recommendations to the provost for consideration and approval. The committee also receives findings from the institution’s quality system, the academic program review process, which is a comprehensive review system that assesses all courses and programs.

The graduate studies committee, chaired by the dean of institutional research and assessment/graduate studies, focuses on curriculum and policy issues germane to graduate studies. All graduate programs and courses are reviewed, discussed, and approved for recommendation to the provost. Membership for the committee is drawn from all levels of the institution—faculty, chairs, program directors, deans, and vice presidents—and includes representatives from the online campus, the college’s Boston and Valencia campuses, Boston Conservatory at Berklee, students affairs, and enrollment areas. Findings from the academic program review (the institution’s quality system) for graduate studies programs are brought before the graduate studies committee.

The committee for academic policies (CAP) considers the relevance and effectiveness of academic policies and processes, with the objective being to support the experience of students. Led by the vice president for academic affairs/vice provost, the committee includes representation from all areas of the institution, including the online campus, and inclusive of academic senior leadership, program directors and chair representatives, representatives from the student affairs and enrollment areas, and students. The committee makes recommendations to the senior vice president for academic affairs/provost and, where appropriate, to the senior vice president for student enrollment and engagement.

The assessment committee, chaired by the director of institutional research and assessment, is an institution-wide committee whose charge is to support and guide the collection and sharing of data, and the ongoing assessment of every aspect of the institution. The committee meets monthly and has representatives from across Berklee, including representatives from the online campus.
Online Campus Committee

The academic advisory committee is the curriculum committee of Berklee’s online campus. It is chaired by the vice president of online education and comprises the provost and senior vice president of academic affairs; the senior vice president of online and continuing education; the dean of institutional research and assessment/graduate studies; the deans of the academic divisions; academic chair representatives; and faculty representatives.

The committee’s charge is to review program and course proposals to ensure academic quality. When issues require institutional input, such as curriculum changes or policy issues that go beyond the online campus, these are funneled to the appropriate pan-institution committee, mentioned above.

Conclusion

Berklee has an effective system of leadership and organization. The commitments to academic excellence, student quality, and student experience have always been demonstrated in coherent, intentional, and participatory structures.

Standard 3 Appendix

- 3.1 Organizational Chart for Berklee Online
Standard 4: The Academic Programs

Curriculum Design
Berklee offers a curriculum that is outcomes based. Each academic program, regardless of delivery format, demonstrates coherence through its learning outcomes, goals and objectives, structure, content, policies and procedures, admissions criteria, retention practices, assessments of student learning, instructional methodology, and more. The expectations for student achievement, independent learning, and skills in inquiry and critical judgment are graduated by degree. The bachelor’s degree program—designed to give students a substantial and coherent introduction to the broad areas of human knowledge with a special focus on music, dance, or theater—provides education at a very high level. The master’s degree program elevates education beyond the baccalaureate level, providing true mastery of a specialized and complex field.

Berklee also fosters the idea that college education has at least two purposes: preparing students directly for careers and readying students for a life that is about more than work. All of the undergraduate and graduate programs provide space for students to reflect on their own goals, development, growth, and creativity. College undergraduate programs provide options to complete both major and minor areas of study. At the undergraduate level, the liberal arts program provides students the opportunity to explore a wide range of disciplines.

At the graduate level, the programs provide students the opportunity for deep study of a particular field and to master a discipline while also developing and completing a culminating experience or thesis project that is uniquely theirs and offers them the opportunity to make an original contribution to their chosen area of study.

Berklee offers the following degrees on campus:

- Bachelor of Music
- Bachelor of Fine Arts in theater and/or dance
- Master of Arts
- Master of Music
- Master of Fine Arts in musical theater

Additionally, Berklee offers the following degrees online:

- Bachelor of Professional Studies (fully online)
- Master of Arts (low-residency; courses are fully online; students complete two four-day residencies each year)
- Master of Business Administration in alliance with Southern New Hampshire University (degree issued by SNHU, fully online)

As mentioned above, Berklee has been engaged in extensive planning to offer Master of Arts and Master of Music degrees fully online beginning in fall 2018. Under the leadership of the vice president of online education, and in close collaboration with the dean of institutional research and assessment/graduate studies, chairs and faculty from across the institution have determined which programs best meet student needs and fill important demands. The online master’s degree offerings will begin with the development of a Master of Arts in Music Business and a Master of Music in Music Production. Additional programs are likely to be added in subsequent years, as appropriate and feasible.
Overview of Graduate Programs
All of Berklee’s graduate programs are designed to provide students a mastery of a profound area or complex field of study. The graduate curriculum is competency and outcomes based, and designed to align with the institutional mission. Additionally, graduate study takes students to a high level of excellence musically, artistically, and professionally. Through focused and rigorous study enhanced by close mentoring relationships with exceptional faculty, students reach their professional and artistic goals while gaining the knowledge and skills needed to prepare for careers and serve as leaders in today’s creative industries and beyond. Regardless of the program of study, the master’s degree works to create the leaders of today and the innovators of tomorrow. Through study, students research, anticipate, and prepare to lead industry trends and developments.

The Master of Arts and Master of Music programs offered online will follow the organization, curriculum, admission standards, faculty, and leadership structure of the on-campus offerings.

Design and Administration
One Year of Study
The master’s degree programs online will, like the programs on campus, be designed to be completed in one year of study. On campus, programs are three semesters, or 36–37 weeks, of study (two 15-week [fall and spring] terms and one intensive six- or seven-week summer term). Online, the programs will follow the academic calendar of the online campus: four 12-week semesters for a total of 48 weeks of study. The on-campus programs range in size from 30 to 39 credits. The online programs will be 36 credits each. Courses in the on-campus and online programs are three credits each. Online, the programs will each have 12 courses. The expectation is that most students will take three courses per 12-week semester. This is the average course load completed by the students in the online Bachelor of Professional Studies program. The programs are also designed to be aligned with existing on-campus graduate programs, with the Master of Arts in Global Entertainment and Music Business as well as the Master of Music in Music Production, Technology, and Innovation, respectively. In this way, online students who chose to do so would be able to spend a semester on campus for a residential experience. While many are not able to do this, Berklee has had a few students each semester from the online bachelor’s degree program who have chosen to study on-campus for a semester.

Internship Options
Just as the on-campus master’s degree programs offer students the opportunity to spend an additional semester completing internships, online students will also have this option. The Career Center on Berklee’s Boston campus supports internship and job opportunities for students around the nation and the world. Its online database is searchable by all Berklee students, regardless of delivery or location. Students interested in internships will be able to enroll in the internship course that exists at the master’s degree level for all students, regardless of location. Berklee has implemented a similar internship option for its undergraduate programs. Many online students are older, returning students, who may already be working full-time. For them, the internship option may be of lesser interest. However, many online students lack work experience or are earning degrees to facilitate a career change, and engaging in an internship is an important option for them.

Cohort Based
Like the on-campus master’s degree, the online programs will be cohort based, with students moving through the curriculum together. However, in order to meet the needs of an older professional returning to school, which is the profile of most of Berklee’s online students, the online offerings will be more flexible than those offered on campus. On campus, all students in the graduate programs must begin in the fall semester and conclude in summer. Online,
students may begin in the fall, winter, spring, or summer semesters. They will move forward with others who begin in their same semester. And, while students will be encouraged to complete three courses per semester in order to finish the program in one year, students who choose to move through more slowly will be able to do that.

*Program Director/Lead Faculty Facilitator*

As mentioned in standard 3, on campus, each graduate program is led by a program director who reports directly to the division dean of his or her area, and functionally to the dean of institutional research and assessment/graduate studies. This program director serves as a leader of the program curriculum as well as a key instructor; provides program oversight, ensuring overall program quality and the integrity of the learning experience; serves as a resource for the enrollment team with regard to application review and recruitment activities; and responds to press inquiries, as needed. This will be the same for the online offerings. Online, this position will be titled slightly differently. Online faculty are entitled “facilitators,” who are contracted to teach particular courses. This position will be the “lead facilitator” and will serve the program director function. For the Master of Arts in Music Business online, the lead facilitator will be John Kellogg, a lawyer and recently retired assistant chair of Berklee College of Music's Music Business/Management Department. For the Master of Music in Music Production online, the lead facilitator will be Enrique Gonzalez Müller, an associate professor at Berklee, housed in Berklee’s Music Production and Engineering Department. (See appendix 6.1 for their full curriculum vitae.)

*Culminating Experience*

All of the Master of Music and Master of Arts programs at Berklee College of Music conclude with a culminating experience. This will be true for the online programs just as it is for the on-campus programs. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which a student synthesizes all he or she has learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.

Students are required to document their projects with a written proposal. This proposal must be approved by the faculty advisor. Additionally, students reflect on the experience in their final semester. This reflection is in addition to the completion of the project itself.

Likewise, all students are required to present their work to their culminating experience committee and their classmates during their final semester. In the online programs, this presentation will be part of the final culminating experience course.

*Graduate Student/Faculty Advisor Relationship*

Graduate students work closely with their faculty advisors in all of their educational work and in conceiving and developing their culminating experiences. This will be true in the online programs as it is in the on-campus programs. In the online environment, these meetings will be virtual and integrated into the course work, especially in the culminating experience proposal course in semester two and the culminating experience courses in semesters three and four. These courses are described in appendix 4.1. During these interactions, students flesh out ideas and receive feedback, advice, support, suggestions, help, guidance, and more from their advisors as they design and execute their
culminating experiences. Advisors guide students in meeting the various deadlines and milestones required as students complete their culminating experiences and prepare for graduation.

Culminating Experience Learning Outcomes
Upon completion of the culminating experience, students will be able to:

- make a creative contribution to the profession and/or define and solve a problem that exists in the discipline of study;
- design and execute an original project;
- produce a professional piece of academic and/or creative work, whether that is a research project, composition, recording or production, performance, practicum, clinical experience that is analyzed and summarized, or other;
- evaluate their experience, assessing the contribution made to the profession; and
- analyze their own artistic, professional, and personal growth as a result of having completed the experience.

Culminating Experience Timeline
1. Semester two: through the culminating experience proposal course, students develop a written proposal for their culminating experience for approval from their faculty advisor; students also form their culminating experience committees.
2. Semester three: through the Culminating Experience 1 course, students revise and refine their proposal, and receive final approval from their advisor. Students also work with their advisor for their project and develop a first, rough draft of their culminating experience.
3. Semester four: through the Culminating Experience 2 course, students refine, complete, and present their final project to the culminating experience committee and to their classmates; they prepare their projects for the college archives, and they plan their next career steps.

Culminating experience documents are archived in Berklee's Stan Getz Library. Students submit a copy of all of their work to the library for archival purposes, and some projects are shown in the institutional repository online. Examples can be found at archives.berklee.edu/culminating-experience-submissions.

Curriculum Plans
The curriculum plan for each online graduate program follows.

Master of Arts in Music Business
Program Information
Innovation is essential in music business today, shaping the areas of management, marketing, licensing, distribution, touring, and more. The Master of Arts in Music Business prepares students to be leaders in the growth and success of the evolving music business, connecting their passion with advanced knowledge and skills in key industry sectors. Throughout the program, students learn from industry professionals and undertake in-depth analyses of internal and external factors that influence the industry—from technology and data to policy, law, and finance. Coursework prepares students to complete a culminating experience that allows them to define their unique contribution to the music industry and advance business opportunities that present innovative and viable solutions in the marketplace. Throughout the program, students participate in a community of highly engaged and motivated peers and faculty committed to high-level learning and collaboration. Students strengthen their analytical and leadership skills as well as their written and oral communication skills. As they advance their professional skills and knowledge, they grow and excel as leaders of the global music industry.
Program Learning Outcomes
Upon completion of the program, students will be able to:

- synthesize challenges and opportunities for music entrepreneurship;
- create and implement innovative strategic plans to increase the chances of success for artists and their careers;
- conceptualize, build, and execute best-in-class music campaigns for consumer brands in a professional, real-world context through research, analysis, presentation, and critique;
- develop and execute fully timed, integrated, and optimized marketing plans for various segments of the music industry;
- evaluate legal issues and competing arguments involving the music industry in order to author favorable conditions as part of any negotiation;
- analyze the varied and shifting sources of revenue generated in the music business, including touring, copyrights, music products, and artist-branded merchandise and services;
- analyze the roles of venture capital, cash flow, and equity in a music enterprise;
- leverage music industry data to analyze the current market and make informed business decisions;
- apply the critical tools of financial analysis to leverage talent, assess the potential of music enterprises, and drive new music businesses; and
- enhance core leadership competencies, leadership awareness, and change-management techniques to further professional development and gain a competitive advantage in the music industry.

Course descriptions and learning outcomes for each course can be found in appendix 4.1. Sample course syllabi can be found in appendix 4.2.
Master of Music in Music Production

Program Information
The Master of Music in Music Production combines the most creative, innovative music production techniques with the power of DAW (digital audio workstation)-based music technology tools. The program provides a rigorous education in advanced recording, mixing, and mastering in addition to focused work on critical areas such as vocal production, audio for visual media, and business sustainability for independent producers. Through the program, students develop a professional framework and vocabulary for analyzing production qualities in music and learn how to leverage research into how people perceive sound to strengthen the connection between their music and listeners. The program provides students with the knowledge and skills to achieve professional, effective musical collaborations with high-quality results, often in distributed contexts, from their studio/production company. The program prepares students to be skillful producers in a variety of contemporary styles and formats, with a culminating experience that allows them to define their unique contribution as a music producer and/or advance the field of music production.

Program Learning Outcomes
Upon completion of the program, students will be able to:

- plan and execute the design of a professional-level critical listening, recording, and music production environment;
- plan, lead, and deliver high-quality, expressive music production projects that maximize the emotional impact of any recording;
- make professional-sounding recordings in any setting, from studio-grade recording environments to portable studios with minimal gear;
- deliver high-quality, professional masters for various platforms including vinyl, lossy codecs, and streaming platforms;
- evaluate music production techniques in a variety of styles using a professional framework and vocabulary;
- analyze the relationship between sound and human perception, and apply this information to enhance engineering and mixing projects;
- apply the advanced skills necessary to produce commercially-viable vocal performances for a contemporary client base;
- apply various income-generating strategies for independent studio production in addition to negotiating the contractual and financial documents required in professional production contexts;
- apply advanced mixing skills that involve deep understanding of balance, EQ, dynamics, spatial effects, automation, pitch/time correction, and mixing for digital streaming services; and
- apply the tools, techniques, workflows, and creative considerations necessary for producing professional audio for film, television, and related visual media.

**Master of Music in Music Production Course Information**

Course descriptions and learning outcomes for each course can be found in appendix 4.1. Sample course syllabi can be found in appendix 4.2.

**Evaluation**

**Academic Program Review**

All academic programs at Berklee, regardless of location or modality, undertake a complete review every three years. Berklee’s program review process asks faculty and academic leaders to assess and improve student learning by developing and/or reviewing clear expectations of what students learn at the institutional, program, and course level, and to ensure that students are meeting these learning outcomes. Academic leaders and faculty are also asked to align these outcomes with the institution’s mission and diversity statement. The process asks, too, for academic leaders and faculty to verify learning outcomes with professional standards and external experts. The focus of the review is to improve student learning with a goal of identifying gaps and making revisions to address them. The online graduate programs will be reviewed, as are each of Berklee’s master’s degree programs, regardless of modality. Additionally, like all Berklee graduate programs, this review will be presented to the graduate studies committee of the institution and will be evaluated in relationship to Berklee’s total offerings, contributing to the institution’s regular process of review and improvement.

**Student Course Evaluation**

Students at Berklee evaluate their courses each semester, including those courses offered online, using the EvaluationKit tool. This evaluation process is helpful in understanding students’ perceptions of their learning and their assessment of their faculty and coursework. While student evaluations can never be the sole tool to assess student learning, such evaluations provide information that is useful in determining if a course is or is not resulting in the intended learning.

**Conclusion**

Berklee College of Music has undergone a great deal of growth and change in recent years. This growth has led to an institution that is stronger and provides students a richer educational experience than ever before. It has also led to an institution with a wider educational reach. Adding bachelor’s degrees online has enabled Berklee to reach students for whom residential study is not a possibility. Expanding online offerings to include master’s degree programs furthers the institution’s reach and makes it that much more possible for Berklee to realize its vision for 2025: to “transform arts education and enhance the power of the arts to better our world.”

**Standard 4 Appendix**

- 4.1 Berklee Online Master’s Degree Course Information
- 4.2 Sample Course Syllabi
Standard 5: Students

Berklee ensures that all interactions with students and prospective students are characterized by integrity and with a focus on student learning and the student experience.

As Berklee’s most recent annual fall count shows, the institution serves approximately 5,050 undergraduate students and 300 graduate students in Boston and approximately 150 graduate students and 150 undergraduate study abroad students in Valencia. As well, Berklee services approximately 900 undergraduate students through the online campus. Berklee’s student population is extremely diverse. Among the undergraduate student body at Berklee, 30 percent are international, representing 98 different countries. The largest international populations come from South Korea, China, Canada, Japan, and Mexico. Of the domestic students, the demographic composition is 53 percent Caucasian, 12 percent Hispanic, eight percent African American, five percent Asian American, five percent two or more races, less than one percent Native American, and 16 percent unknown. Women make up 37 percent of the undergraduate student body; 63 percent are men. The graduate population is also diverse: 65 percent of students are from the United States, and 41 other countries are represented, including India, China, Jordan, Mexico, Ecuador, South Africa, and South Korea. Fifty-two percent are men, and 48 percent are women. It is expected that this diversity will be reflected in the population among online graduate students as well.

Berklee has a strategic approach to all student support services, including enrollment management, enrollment marketing, and student engagement, and has implemented a leadership and organizational structure that supports the strategic integration of the student journey, including all functions related to student support such as enrollment, preparation, development, success, and advising, from before the application to after graduation and careers.

The student enrollment and engagement area is led by the senior vice president of student enrollment and engagement, Betsy Newman. She oversees four integrated enrollment and engagement areas: Enrollment Marketing and Management; Student Affairs, Diversity and Inclusion; Student Advising and Success; and Career Services. Each area is led by a vice president or dean. Staff are aligned within these four areas. A student enrollment and engagement leadership council, consisting of the second layer of leadership in each area, is an integrated body that meets regularly to share strategy and updates. The focus of the work is on operational excellence with a goal of supporting institution-wide efforts to advance assessment, business process review, technology, systems, and data governance projects. Berklee’s online division is represented on all of these bodies and is fully integrated in this work.

Selective Admissions

Admission to Berklee is highly selective. The institution places a particular emphasis on maintaining selectivity while also emphasizing diversity and admitting the students necessary to support the academic and operational goals. The specific admissions requirements for each graduate program are discussed below. Berklee will hire an additional applicant advisor to support the admissions process for online master’s degree programs.

Berklee’s foundational belief is that all admitted students are fully capable of realizing their artistic, academic, and professional goals. The institution relies on a strength-based assessment process guided by two key questions:

- Is the applicant ready for the challenges of the program to which he/she is applying?
- If so, what will this applicant bring to the institution that will enhance it?

This comprehensive approach to admissions reflects the institution’s commitment to enroll the students who are most likely to succeed. The admissions protocol identifies students with a diverse range of talents and aptitudes. As is
evident from the tables below, due to this selective process, 36 percent of applicants to the institution’s current graduate programs are admitted. Identifying this diverse and selective group of candidates who meet the program profile is the first step in ensuring student success. The tables below also show the enrollment by geographic region.

![Fall 2016 Applications, Acceptances, and Enrollments by Program](chart1)

![Fall 2016 Master's Degree Enrollment by Region](chart2)

It is expected that admissions to the online master’s degree will also be selective and diverse, though increasing accessibility through online education is also an institutional goal. For the undergraduate online degree, 66 percent percent of those who apply are admitted, as the tables below show.
Admissions Criteria/Enrollment Numbers for the Proposed Master’s Degree Programs

The admissions criteria for the proposed online graduate programs will be similar to the criteria for Berklee’s comparable on-campus programs. Successful candidates for the master’s degree programs are focused, motivated, creative individuals with excellent academic and professional backgrounds who are able to contribute skills that will benefit their program.

Ideal candidates should demonstrate:

- prior academic success;
- prior knowledge and experience in business or production, respectively;
- a good understanding of the current situation of the entertainment and music production industries; and
- leadership in professional and/or academic environments.

Applicants must possess a bachelor’s degree in a discipline relevant to the program or any bachelor’s degree with relevant business and/or production experience, respectively. They will complete an online application in which they provide a statement of purpose, transcripts, a resumé or CV, and two letters of recommendation. The statement of purpose will describe their background, why they are applying to the program, and how the program fits with their career goals as well as a description of the project they would like to pursue as their culminating experience. While Berklee understands that students’ ideas develop as they learn more in their studies and that their actual culminating experience may bear little resemblance to what they discuss in their application, we have also found that students who are able to articulate a substantial idea in their application for admission are the best prepared for success. Additionally, those applying to the Master of Music in Music Production will be asked to submit a portfolio of at least three recorded examples of recent work, along with explanations of the nature of their work.

As the language of instruction for Berklee’s programs is English, candidates for whom English is a second language need to submit the results of one of the following standardized tests and attain the following minimum scores:

- TOEFL: iBT (internet based), 100; computer based, 250; paper based, 600
- International English Language Testing System (IELTS): 7.5
- Cambridge English Language Exams: certificate in advanced English (CAE), business English certificate (BEC), or higher
- Pearson Test of English Academic: 73
These criteria enable students to have the appropriate entry-level knowledge and skills to begin their studies and have success.

The admissions staff are knowledgeable about the criteria and requirements, and will work in alignment with the vice president of online education as well as the director (lead facilitator) of each program to ensure that the selection criteria are met. The admissions team will collect and evaluate all the materials that candidates submit to ensure that potential students meet minimum eligibility requirements. The admissions team will then track supporting materials and mark the items as completed when they have been received and reviewed. Once all program requirements are submitted, candidates will be reviewed for acceptance and passed on to the program directors (lead facilitators) for review, if needed.

Berklee seeks to enroll a maximum of 55 students in each of the two proposed programs each year, or an annual total of 110 for the two programs together, with 25 students starting in each program in the fall semester, 15 starting in each program in the winter semester, and 15 students in each program starting either in spring or summer. These targets align well with research based on enrollments in Berklee’s online bachelor’s degree program and based on an evaluation of Berklee peer institutions with online master’s degree programs. Berklee’s on-campus graduate programs have a graduation rate of 97 percent. The low-residency Master of Arts in Music Therapy has a graduation rate of 92 percent. While research shows that online master’s degree programs have graduation rates between 54 and 68 percent, depending on area of study, Berklee anticipates a graduation rate of at least 80 percent in its online master’s degree programs. This is a reasonable goal given both the success that Berklee has had in its online bachelor’s degree program and the success of Berklee’s on-campus one year master’s degree. As mentioned, while students may progress through the online master’s degree at the pace they choose, the programs are designed to be cohort based and to be completed in one year.

Financial Aid
The Office of Student Financial Services at Berklee oversees the administration of financial aid, scholarships, and student employment. This area is responsible for processing all U.S. federal and state funds available to students who complete the Free Application for Federal Student Aid (FAFSA) as well as all private student loans. Additionally, the office administers all institutional scholarships and grants for undergraduate and graduate students. The office makes it possible to streamline processes and leverage strengths while making sure that high-quality student service is maintained. The online campus is fully integrated with Berklee’s other programs to award and administer financial aid to qualified online undergraduate students. The same is planned for online graduate students.

Academic Advising
Berklee relies on a combination of professional staff advisors and faculty advisors to guide students. All online degree students, whether undergraduate or graduate, are assigned a professional staff advisor who works with them regularly on their progress. To support online master’s degree students, two new academic advisors will be hired. As noted, at the graduate level, all students also work with faculty advisors who guide them through the proposal development and culminating experience courses. As well, all students, including those studying online, have access to a variety of other support services including international student advising, personal counseling, and services for students with disabilities.

Student Learning Environment
Berklee provides a state-of-the-art online learning environment for students, combining the Canvas learning management system with a custom-built front-end web application designed from the institution’s many years of
experience in online education and from instructor, staff, and student feedback—in other words, what is uniquely Berklee, what is best for contemporary music education, and what is best in modern web content and communication. The online learning environment emphasizes the synchronous and asynchronous interaction among students and between students and faculty in a course—everything that they are creating and sharing in the experience, merged with music instruction and content presentation. The learning environment is fully accessible and can be used with any device, including mobile, laptop, and desktop devices. The director of technology for Berklee Online, along with eight technical staff, provide system administration, web design and development, and technology project management to support and enhance the learning environment.

Student Technical Support
Students enrolled in Berklee Online undergraduate courses receive technical support by calling or emailing Student Support, or by submitting a support request through their course. Service hours are Monday–Friday, from 9:00 a.m. to 5:00 p.m. Eastern Time, with extended hours during the first two weeks of each semester when the number of support cases typically increases. Student support representatives provide help with a range of areas including registration, course access and navigation, and computer hardware and software issues. They are also responsible for creating video tutorials that guide students through the learning management system and common tasks, such as participating in video conferences and submitting assignments. Students access these video tutorials in the Getting Started area of each course. Support issues are tracked and managed through the customer relationship management tool Salesforce, which provides robust data reporting on number, type, and resolution time of support cases. The same level of support is planned for online graduate students.

Career Strategy and Services
Berklee recognizes the importance of offering career education services for students and has a unified career strategy that supports students throughout the institution with advising, programming, networking, and employer development. These services support online degree students at the undergraduate level and will be expanded to support the online master's degree students as well.

The Berklee Career Center in Boston and the International Career Center in Valencia work in alignment with the vice president of online education to support students in attaining internships and jobs, and in developing their careers.

Orientation and Communication with Students
All Berklee students at the undergraduate and graduate levels participate in a required orientation where they receive a comprehensive introduction to the institution and to their programs. This orientation is virtual for online undergraduate students and will be virtual as well for online graduate students. The orientation includes an overview of a variety of academic and support services as well as an introduction to the program and to online learning.

Conclusion
All students are provided comprehensive services that include advising, counseling, disability services, health and wellness options, student clubs, activities, and recreational offerings. While online students do not often take advantage of on-campus recreation or club activities, they are welcome to do so. Students learn about these opportunities starting during their orientation, and information is presented on Berklee’s website. Student academic support services are readily available. Admissions processes and financial aid opportunities are led with integrity and clearly explained to current and potential students. Berklee is committed to recruiting, enrolling, and supporting all of its students, and to creating synergies, collaboration, and parity, always with a goal of enhancing the student experience and improving student learning.
Berklee has a distinguished faculty dedicated to the education of students. Faculty are more than teachers. They serve as students’ mentors and collaborators. They focus on helping students learn and on facilitating students’ growth as they work to realize their potential. Faculty not only excel as educators and leaders in their disciplines, but they are also highly connected to areas in and outside of the music, theater, and dance industry as performers, composers, sound designers, music engineers and producers, choreographers, music therapists, musical theater directors and technical consultants, authors, business leaders, and more.

All faculty are experienced and talented professionals in their fields and bring this expertise to the classroom. They inspire students to push their talents and think beyond their limits. Faculty qualifications, numbers, and performance are sufficient to accomplish the mission and purposes of both legacy institutions. Together, the faculty are even more accomplished and powerful.

Berklee’s residential faculty consists of 903 members, 364 (or 40 percent) of whom are full time and 539 (or 60 percent) of whom are part time. Sixty-two percent of Berklee’s 154 online faculty, those teaching in the undergraduate program as well as those teaching continuing education courses, come from this group. The online faculty are, like all of Berklee’s faculty, recognized experts in their respective fields. Berklee has a robust waiting list of qualified instructors interested in teaching online. Should additional online faculty be needed, the vice president of online education proactively recruits Berklee faculty to develop and teach courses based on student demand. This recruitment occurs through outreach to academic department chairs who connect the vice president of online education to Berklee faculty. Academic chairs also offer suggestions for potential new faculty from education and industry contacts. As mentioned, the majority of those who will teach in Berklee’s online master’s degree program come from Berklee’s residential faculty.

All faculty who teach online are required to complete an extensive program of training with a special focus on the unique educational needs experienced in the online environment, how to use the learning management system, and strategies to engage, retain, and assess online students.

Berklee offers support in course development and online pedagogy for faculty who teach online. Faculty work closely with professional course developers, who assist with design and technology. Course developers are trained in instructional design and employ the ADDIE model (analysis, design, development, implementation, and evaluation) in building courses, with an emphasis on project-based learning. Berklee has hired two additional full-time course developers and one full-time video editor to support the design and technology needs for the expansion of master’s degree programs online. Course developers work with a supporting team of video producers, video editors, an animator, a graphic designer, a copy editor, and a proofreader throughout the development process. Course developers play an active role in assessing the effectiveness of courses and work collaboratively with faculty to make revisions as needed in order to improve the learning experience.

Below are lists of key faculty for each of the proposed programs. All but one (Stephen Canfield) teach on Berklee’s residential campuses and/or already teach online in Berklee’s undergraduate and continue education programs. These faculty were identified both for their expertise in the field and for their success as educators. Note that Berklee selects faculty based on their education, degrees, professional training, research, innovation, creative work, professional experience, and artistic success. Some Berklee faculty without advanced degrees join the academic staff because of their professional and artistic experience.

**Master of Arts in Music Business**

Alhadeff, Peter, D.Phil., Oxford; B.A., University of East Anglia  
Canfield, Stephen, B.M., Berklee College of Music (Vice President of Marketing, WeTransfer)  
Colatosti, Camille, Ph.D., M.A., University of Michigan; B.A., University of Massachusetts

Wyner, Jonathan, Advanced Studies, New England Conservatory of Music; A.B., Vassar College (Director of Education and Chief Engineer, iZotope)

See appendix 6.1 for faculty resumés and/or curriculum vitae.

Conclusion
Berklee features an excellent faculty dedicated to the institutional mission and to student learning. Building a strong faculty throughout the institution, on campus, and online is one of Berklee’s strongest commitments.

Standard 6 Appendix
  ● 6.1 Faculty Resumes/Curriculum Vitae
Standard 7: Institutional Resources

Berklee has sufficient human, financial, information, physical, and technology resources and capacity to support its mission and to advance the substantive change to offer online master’s degrees. Berklee has strong application and enrollment growth, good fiscal discipline through the annual budget process, effective fundraising, and clear guidance from a strategic vision and plan that are developed with strong consensus. The institution has carefully and thoughtfully prepared for expansion of online master’s degree programs from both an institutional and financial standpoint.

Berklee’s endowment was valued at $358.7 million as of May 31, 2017. Endowment investment management falls under the oversight of the investment committee of the board and the chief financial officer of the institution with support provided by an independent consultant.

Fiscal year 2017 is the first year that Berklee’s consolidated financial results have included both Berklee College of Music and Boston Conservatory at Berklee. Based on preliminary and unaudited results, it is expected that Berklee will generate an operating surplus in excess of the surplus projected in the 2017 operating budget. Although the preliminary revenue results are likely to be 2 percent lower than planned, the preliminary expense results are likely to be 5 percent lower than planned. The combined impact of lower revenue and lower expense results has improved the forecasted operating surplus for Berklee as of the end of fiscal year 2017. Preliminary and unaudited results for Berklee project an operating surplus in the range of $7–$9 million in 2017.

As mentioned in standard 2, the institutional leadership gave extensive consideration to planning, including financial planning, for the expansion of online master’s degree programs. The general revenues of the institution support the launching of the online master’s degrees. General revenues refer to income from residential undergraduate, graduate, and summer programs, and other income including income from the online undergraduate and continuing education programs. The tables below note expected revenue and expense projects for the online master’s degree programs. Note that all projections for revenue and expenses assume a 10:1 student/faculty ratio. As well, the following assumptions are made with respect to the online master’s degree programs:

- Tuition Cost per Student for the Full Program: $33,120
- Average Cost per Credit: $920
- Comprehensive Fee: $500
- Application Fee: $75
- Total Cost per Student: $33,695

It is assumed that 110 students will enroll each year between both programs, starting in the 2018–2019 academic year or fiscal year 2019, with, as mentioned in standard 5, 25 students starting in each program the fall semester, 15 starting in each program in winter, and 15 more starting in each program in either spring or summer. As the tuition for the online master’s degree will be 30 percent below the on-campus rate, Berklee does not plan to offer significant institutional scholarships for the program. There is, however, a 3 percent active-duty military discount. As mentioned earlier, two full-time course developers, a video editor, an applicant advisor, and two academic advisors will be hired. These staff costs are calculated along with faculty costs for course development and for teaching.

---

1 Note that additional students may choose to enroll in a course or two, but these revenues are not included in projections. Those who complete three courses will be required to apply to the program if they choose to continue.

Research/Information Resources/Library

Throughout their studies in the online graduate programs, students are heavily engaged in research that is well supported by Berklee on an institutional and program level. Faculty work directly with students on their culminating experience and other projects, and support and guide their research needs. As well, the library provides a center of research support.

Berklee’s Stan Getz Library supports libraries on Berklee’s campuses in Boston and Valencia, and is available to all students who study online with Berklee. These library facilities, overseen by the dean of library and learning resources and the professional staff supporting the facilities, reveal the institution’s commitment to collecting and providing guaranteed access to electronic, print, audio, and video resources, and providing bibliographic, reference, and instructional support to the Berklee community of students, faculty, staff, and alumni for their research and scholarly and creative pursuits. In addition to the physical resources and services that the library provides, a robust web presence is also supported. The starting point for these combined web services is library.berklee.edu.

Library services include:
- online access to and circulation of materials, including borrowing, renewing, and placing holds; in-house use for research and reference collections; and maintenance of confidentiality of library records;
- interlibrary loan and document delivery, including requesting and borrowing from other institutions and borrowing reciprocity through the institutions of the ProArts Consortium of which Berklee is a member, as are Emerson College, Massachusetts College of Art and Design, and the Boston Architectural College;
- bibliographic instruction classes and workshops; and
- Ask-a-Librarian reference interviews via email, chat, phone, and in person.

At Berklee, library and information literacy instruction is well integrated into the curriculum at the undergraduate and graduate levels in on-campus and online programs. This instruction ensures that students use information resources and technology as an integral part of their education and that they attain levels of proficiency appropriate to their degree and field of study. It also ensures that students acquire increasingly sophisticated skills in evaluating the quality of information sources appropriate to their field of study and degree program.

Berklee uses the Evergreen Integrated Library System to catalog and maintain circulation records for all library holdings, including machine-readable cataloging (MARC) and resource description and access (RDA) records for scores and recordings, available via online subscription services. The Evergreen catalog is searchable through the library’s website at library.berklee.edu. Also available at this site are more than 120 electronic databases that include encyclopedias, such as Britannica and Grove’s Dictionary of Music; 44,165 recordings; 26,368 books; 26,590 musical scores; 8,392 videos and DVDs; an index of more than 70 music fake books; magazine indexes, two of which are exclusive to music; a collection of printable classical music; and a shared collection of electronic books along with audio and media streaming resources.

Berklee provides professionally qualified and adequate staff to administer the library, support the provision of information resources and services, and provide instructional and information technology support functions. A newly defined digital learning librarian position was filled in August 2016. This position was created to provide a specific focus on the utilization of online library resources within Berklee’s learning management platform.
Conclusion
Berklee has the sufficient and appropriate human, financial, information, physical, and technological resources necessary for the achievement of its purposes, including the launching of online master’s degrees. Berklee manages and maintains those resources in an appropriate manner.
Standard 8: Educational Effectiveness

Berklee supports a comprehensive planning and evaluation process to ensure educational effectiveness. The focus of the institution is on the student experience with special emphasis on student achievement. The institution uses evidence about student learning for planning and improvement. The online master’s degree offerings will be incorporated into the processes that are well established at the institution.

The Office of Institutional Research and Assessment provides guidance and support for every area of Berklee to engage in continuous, comprehensive research and self-evaluation, gathering the information required for data-driven decision making, policy development, and strategic planning to improve student learning and success. The office supports location of data for analysis, research on institutional issues, design and execution of surveys and focus groups, advanced analysis and interpretation of data, benchmarking of Berklee with peer institutions, and other support of institutional and departmental research and assessment needs. Additionally, the office focuses on making data accessible and usable for all institutional stakeholders.

Berklee’s comprehensive system of assessment and evaluation follows students, regardless of campus or modality, from admissions to matriculation to graduation and beyond. The Office of Institutional Research and Assessment website, berklee.edu/institutional-research-assessment, highlights assessment information and makes it easily accessible to the Berklee community. The annual factbook summarizes key institutional data; reports on the Common Data Set and the Integrated Postsecondary Education Data System (IPEDS) provide more detailed factual information. Admissions, enrollment, entering student placement, peer comparison, and program review reports, among many others, are also compiled and made available. Key surveys include alumni and exit surveys, course evaluations, department assessments, faculty and staff surveys, and student engagement surveys such as the National Survey of Student Engagement and Noel Levitz Student Satisfaction Inventory. Information from the institution’s assessment committee, a pan-institution group of staff and faculty engaged in departmental and institutional assessment, is also found on this site.

As mentioned, Berklee offers a curriculum that is outcomes based. Each academic program demonstrates coherence through its learning outcomes, goals and objectives, structure, content, policies and procedures, admissions criteria, retention practices, assessments of student learning, instructional methodology, and more. The expectations for student achievement, independent learning, and skills in inquiry and critical judgment are graduated by degree. The undergraduate program—designed to give students a substantial and coherent introduction to the broad areas of human knowledge with a special focus on music, dance, or theater—provides education at a very high level. The graduate program elevates education beyond the baccalaureate level, providing true mastery of a specialized and complex field.

Graduate study takes students to a higher level of excellence musically, artistically, and professionally. Through focused and rigorous study enhanced by close mentoring relationships with exceptional faculty, students reach their professional and artistic goals while gaining the knowledge and skills needed to prepare for careers and to serve as leaders in today’s creative industries and beyond. Regardless of the program of study, the master’s degree works to create the leaders of today and the innovators of tomorrow. Through study, students research, anticipate, and prepare to lead industry trends and developments. This will be as true for the online master’s degree programs as it is for those offered on campus.
Support for Admitted Students
As mentioned above and especially in standard 5, to support students once admitted, Berklee uses a multilayered academic advising system to help students achieve. This support is available for all students, regardless of modality. The Office of Retention and Student Success works closely with key personnel across the institution to identify students with academic and other needs, and to connect students with appropriate campus resources. Graduate students meet regularly with a faculty advisor who monitors their progress, supports and guides their culminating experience or thesis project, and helps to address learning issues and concerns as quickly as possible. These same systems are in place for online students.

Graduation Rate
As mentioned, Berklee College of Music’s on-campus graduate programs have experienced a high graduation rate. As the table below shows, 97 percent of students who begin the existing graduate programs on campus complete them, graduating on schedule. This strong graduation rate confirms student success in learning. As mentioned above, Berklee recognizes that online students tend to have lower graduation rates than on-campus students. However, as 79 percent of students in Berklee’s online bachelor’s degree programs graduate or continue each year, it is reasonable to expect a graduation rate of at least 80 percent for the one-year online master’s degree programs.

![Master's Degree Completions by Program and Start Term](image)

Career Placement
Berklee’s mission is to educate students for careers in music. The career focus is fundamental to the Berklee education. Information from exit and alumni surveys shows that 79 percent of recent master’s degree alumni who are working after graduation expect to be in a music-related field. Additionally, over 90 percent of recent master’s degree graduates are satisfied with how well their studies prepared them for the next stage in their careers.
Evaluation of Student Learning/Program Review

All programs at Berklee articulate a unique set of learning outcomes. These are clearly presented to students and the public on the institution’s website. The learning outcomes for the proposed master’s degree programs are presented in standard 4. Each program of study lists a description; additional entrance requirements, if any; program courses and requirements; departmental policies; course syllabi; faculty information; and more. See the online bachelor of professional studies in music production page as an example: online.berklee.edu/music-degrees/music-production.

Students’ learning is evaluated in terms of their ability to achieve their program’s learning outcomes. These assessments are multilayered, primarily course specific, and both formative and summative. Depending on the program of study, students also complete instrumental proficiencies and senior portfolios or master’s degree culminating experience projects. The results of these assessments inform the program review process and are used to make revisions to programs to improve student learning. As well, historical data for each course, such as course population and student grades—with special focus on the grades of F, D, and W (withdraw)—are analyzed. These data enable the institution to make decisions about course and program revision, as mentioned above, and to identify potential curricular issues. Similar analyses will be conducted for the two online master’s degree programs.

The program review process is reflective and iterative, and led by academic leaders and faculty. The process is completed by using a web-based tool that links directly to tools used to make curriculum revision. The review emphasizes student learning and is directly tied to curriculum (course and program) revision. It is designed to bring the assessment loop full circle: programs are reviewed based on student learning; data regarding the assessment of student learning is analyzed; and courses and programs are revised, deleted, or added to foster improvements to student learning and success.

Peer Comparison and National Surveys

Berklee assesses its overall work and impact on students by completing peer comparison and other surveys. Berklee participates in national surveys such as the National Survey of Student Engagement and Noel Levitz Student Satisfaction Inventory. These surveys and processes include all students, regardless of modality, and help the institution evaluate students’ satisfaction with the institution and especially their perceptions of cocurricular programs and services. Berklee participates in these surveys on a rotation, one every two years. In fall 2017, Berklee will again participate in the Noel Levitz survey and will include all students of the institution—all campuses, all modalities.
These reports present Berklee’s strengths and challenges, and help the institution identify areas for further investigation and evaluation.

Along with national surveys, Berklee completes a peer comparison report every two years in which the institution benchmarks itself against peers on key metrics regarding admissions, enrollment, retention, graduation, faculty, endowment, tuition, and financial aid.

**Conclusion**

Berklee demonstrates its educational effectiveness by ensuring student achievement. The institution works to determine barriers to student success and to overcome those barriers. By assessing student learning and administering a comprehensive program of institutional evaluation, Berklee strives to understand what students have gained as a result of their education. The results of these assessments and evaluations are used for planning and improvement, especially for revising academic and cocurricular programs, and for developing future initiatives. Results of institutional evaluations are used to revise and develop strategic and operational plans, and to increase student success.
Standard 9: Integrity, Transparency, and Public Disclosure

Berklee subscribes to high ethical standards in all of its work with students, prospective students, faculty, staff, the Board of Trustees, other stakeholders, and the general public. It is understood across the institution that integrity and ethics must permeate everything we do. This includes all work on campus and online.

All of the institution’s work is informed by Berklee’s ethics guidelines.

Berklee is committed to the highest standards of equity and Title IX compliance. Information about the institution’s Equity Policy and Process is available publicly on the web at berklee.edu/equity, and states, in part:

In spring 2017, Berklee administered a campus climate survey to all students on all campuses and all modalities, including online students, to examine both the amount of Title IX/equity-related incidents occurring and the perceptions of the campus environment. Results from this survey, currently being analyzed, will provide data regarding attitudes among all students and will be used for continual improvement of this critically important area.

Academic Integrity
Berklee is committed to the free pursuit and dissemination of knowledge. This commitment assures faculty and students the freedom to teach and study, to question assumptions, to be guided by evidence, and to be creative and innovative.

To further ethical practices in scholarship and research, Berklee established in 2012 an institutional review board (IRB) whose mission is to ensure the enforcement of federal research standards. The IRB provides a central body to review and oversee Berklee-affiliated research involving human participants. The board ensures that such research meets appropriate standards of ethical treatment. The board also assists in developing research-based education for the Berklee community.

Transparency and Public Disclosure
Berklee presents itself to current students, prospective students, and other members of the interested public with complete, accurate, timely, accessible, and clear information. Berklee delivers information to specific audiences (prospective students, current students, alumni, parents, donors, faculty, and staff) as well as to the general public in an intentional and deliberate manner. The institution relies primarily on the web and social media to communicate information, but it also publishes numerous print materials to present broad program information and to address targeted audiences. The alumni magazine, Berklee Today, for instance, is published three times a year and is sent to more than 60,000 alumni and others. The biannual newsletter, Stages, reaches a readership of approximately 22,000 alumni, parents, donors, and other institutional partners.

Each Berklee location (the main campus in Boston, inclusive of Berklee College of Music and Boston Conservatory at Berklee; an international campus in Valencia, Spain; and Berklee Online) has its own distinct website: berklee.edu, the main Berklee site; valencia.berklee.edu for the campus in Valencia; and online.berklee.edu for the online school. Bostonconservatory.berklee.edu was launched in summer 2016. While each of the sites has a distinct URL, they are designed for a seamless experience for the user, and all contain detailed degree, program, and course information. Because of careful attention to search engine optimization, Google searches for "Berklee international campus," "Berklee online," and "Berklee degrees" easily guide visitors to their desired information.

At Berklee, information for current undergraduate and graduate students is also available via login at berklee.edu. Here, students may view their course schedule, grades, current bill, and more. Students use this site to register for courses and share information with their instructors and fellow students. Berklee Online students have similar access to course, schedule, grades, and billing information through online.berklee.edu.
Social Media
Berklee uses various social media outlets to share and receive information, and as an important source for reaching prospective and enrolled students. Berklee has a dedicated staff member, the associate director of online marketing and social media, who leads the social media committee, which brings together representatives from around the institution to discuss social media use and standards, and share best practices. The institution maintains a prominent presence on Facebook, Twitter, YouTube, Instagram, and others. Berklee YouTube videos are among the top performing college videos nationwide. Over the last several years, Berklee has built its YouTube channel into a resource for prospective students to gain an understanding of life at the college. Berklee videos are viewed more than 60,000 times per day. Likewise, Facebook reaches tens of thousands a day, and Instagram is a growing channel.

Bulletins, Registration Manuals, and Viewbooks
Berklee College of Music publishes online an annual student policy handbook that includes student life and academic policies for both undergraduate and graduate students, as well as a graduate bulletin that includes comprehensive information about graduate curriculum. There are companion books for additional policies at Boston Conservatory at Berklee and Berklee Online. All are available online and provide clear guidance for students. Each is consistent with the mission statement and sets forth the obligations and responsibilities of both students and the institution.

Conclusion
Berklee subscribes to and advocates high ethical standards. There are strong policies regarding integrity as it applies to the practices of students, faculty, staff, and board members. The institution is committed to academic integrity and academic freedom. Likewise, student learning and ensuring the value of the student experience is at the forefront of all Berklee does.

As well, Berklee reviews its print and online publications regularly and applies changes to relevant sites across the spectrum of venues where that information exists. Results of this system of review are consistently used for improvement. These improvements are particularly pronounced as the institution transitions more towards dynamic online content and away from print publications that quickly become dated.
Conclusion

As this report makes clear, Berklee is committed to educational quality and to student learning and success. Berklee’s 2014 decision to offer bachelor’s degrees online has expanded the institution’s reach and spread education in contemporary music performance, composition, technology, and business beyond the physical campus. Offering master’s degrees online, beginning in fall 2018, will expand that reach further.

Berklee is committed to its vision for 2025: “Berklee will transform arts education and enhance the power of the arts to better our world.”

Through the incomparable energy, talent, and diversity of our multicultural students, faculty, and staff, and the unparalleled depth and breadth of our curricula and programs, we believe that Berklee will continue to be an incubator for creativity and innovation, musical and artistic discovery, and entrepreneurial spirit. The institution offers students unique opportunities to experience and realize their passion for music, theater, and dance, and to nurture their abilities to excel in successful careers in the performing arts.

Pathways Part 2 .................. 19
PATHWAYS

The completion of the merger with the Conservatory in June 2016 united two of the world’s preeminent music education institutions, and set the stage for creating a transformative model for performing arts education, one that provides students with a wide range of flexible and experiential options for achieving their educational goals. By creating learning pathways between the Boston and Valencia campuses, Conservatory programs, online programs, study abroad, internship opportunities, and educational partners, we are positioned to create the world’s most dynamic and comprehensive program for music, dance, and theater education.

With music, movement, and digital technology converging, artists possess powerful new means of creative expression in the theater, on the concert stage, and through emerging platforms. This interplay of artists and modes of expression will position our institution as a leader in exploring new and original art forms, breaking down boundaries that isolate genres, and unleashing the tremendous creative potential of the global arts community.

Evidence of things to come is represented by strong demand for conservatory programs—including a record number of applications for fall 2017—full enrollment by Berklee students in new elective dance courses, including hip-hop dance, and the launch of a Conservatory summer opera program in Valencia, Spain. And we were pleased to announce this year a five-year dual bachelors/masters degree with Harvard, and a first-year abroad program for 40 entering students at the Valencia campus.

This potential is best expressed in the vision statement for 2025 approved in October 2016 by the Berklee Board of Trustees. To achieve it, we will need well-integrated student-centric programs and services, innovative solutions and strategies, and a core infrastructure built on best practices. We will need to guide our decision making with a focus on providing the best student experience, adopting a global mindset, keeping our artistic and educational values front and center, and maintaining an inclusive culture.

The strategic direction outlined here sets priorities for the years 2017 to 2020 in a quest to achieve our shared vision. They are the product of open discussion within our community, challenging in their scope and ambition, and designed to affirm our leadership in arts education worldwide.

Roger Brown
President, Berklee
VISION 2025

As the preeminent institute of contemporary music and the performing arts, Berklee will transform arts education and empower artists to better our world. Building an inclusive culture that promotes diversity in all its forms, we will nurture the growth of the world’s most inspired artists in music, theater, and dance so they may fully realize their creative and career potential. Berklee will forge new connections among art forms, musical traditions, technologies, and institutions, creating a dynamic global network that fosters innovation, collaboration, and community.

FROM VISION TO STRATEGY

The Vision for Berklee in 2025 inspires us to craft a concrete plan for achieving our ambitious goals. We live in a world of accelerating changes and a ten-year planning horizon is too long for effective strategic planning. Therefore we create three-year plans to help us reach our vision, with annual review and assessment to ensure we are making steady progress, and that our plans are indeed moving us toward our goal. This plan then sets the course of direction for the three-year period beginning June 2017 to June 2020. Some of the projects we begin during this planning timeframe may take longer than three years to complete, but we are staging them within the framework of this planning cycle based on our best sense of the time needed to accomplish the tasks, and the priority order that will allow us to build on the successes of each interrelated initiative.

ORGANIZATION OF THE STRATEGIC INITIATIVES

The strategic initiatives are grouped into four themes: infrastructure, inclusion, innovation, and integration. Infrastructure initiatives lay the foundation necessary to achieve the many strategic initiatives that will help us achieve our vision, including facilities, people, process, and systems that support all our work. Inclusion is a core institutional value and central to our common culture. Innovation initiatives are in two parts: those designed to create innovative programs in support of student success, campus life, and careers; and those that expand the reach of Berklee programs. Integration initiatives are designed to realize the potential of our merged institution. Plans to realize these initiatives are guided by a set of principles, common not just for this strategic planning cycle, but also for guiding our work toward achieving our vision for Berklee in 2025:

GUIDING PRINCIPLES

- Focus on increasing global access to Berklee educational programs
- Commit to providing a high quality student experience in everything we do
- Realize the artistic, creative, and career potential of our community members
- Evaluate new initiatives from business process, governance, capacity, demand, sustainability, and resource perspectives
- Make affordability, access, retention, and graduation a key focus in all planning and operational decisions
- Be proactive in exploring and, where appropriate, integrating new technologies.
Focus on increasing global access to Berklee educational programs:
As early as the 1950s, Berklee welcomed international students to the college—Toshiko Akiyoshi from Japan, Arif Mardin from Turkey, and Mulatu Astatke from Ethiopia among them. In the 1960s-1980s, the college offered a correspondence course that engaged students around the world. The Berklee International Network launched in the 1990s, with member schools in Greece, Israel, and Spain, soon expanding to around the world. And in 2012, the college opened its first international campus in Valencia, Spain.

Today, we will continue to broaden this global reach through new partnerships, programs, and localizations of our online materials, including for theater and dance. We will embrace emerging technologies to help us deliver the most effective, efficient, immersive and accessible educational experiences to a global audience. We will explore ways to expand our physical presence in music capitals nationally and internationally.

Commit to providing a high quality student experience in everything we do:
Student experience refers to all aspects of student life and engagement — social, residential, online, academic, as well as emotional, physical and spiritual wellness. A commitment to providing a high-quality student experience means attention to the holistic and unique experience of every single of our students. We acknowledge that a successful and supportive experience can lead to reduced withdrawal rates, improved student progression through the curriculum, betterment of retention and graduation rates, and produce more engaged alumni in the long term.

To achieve this high-quality level, we will provide student-centered programs and facilities for learning, living, and creating, while fostering an environment for creative entrepreneurship throughout the entirety of our students’ experience. We will build flexible programs of study that empower students to achieve their educational and career goals in ways that accommodate their diverse learning styles, personal objectives, financial, and life needs. We will offer new programs of study to address the changing global landscape of music, theater, dance and industry, and fully integrate career education and planning. Upgrading campus facilities to create a world-class learning, collaborating and experimenting environment, and finding ways to better use our existing spaces to maximize educational effectiveness is an ongoing priority.

Realize the artistic, creative, and career potential of our community members:
Students come to Berklee because they want to be part of a community that values and shares their creativity and passion. By providing them with a diverse and inclusive environment where the free and open exchange of ideas can flourish, we create learning opportunities both in and out of the classroom, encourage risk taking and experimentation, break down barriers between artistic disciplines, and give them the means to cultivate their originality.

Building this environment requires the development of physical and virtual spaces that inspire creative collisions, and the access to flexible programs that meet the needs of an evolving community, society and industry. It means being intentional in creating awareness among students of the transferable skills they learn through the arts – such as improvisation, collaboration, leadership, and stage presence— that open doors to broad career opportunities.

With this in mind, we will provide greatly enhanced career services, engage alumni as mentors and proactively engage with industry in order to support the increasingly diverse learning styles and ambitions of our students. We
will foster the growth and development of our faculty and staff to remain leaders in their fields by creating avenues for them to stay current with new and emerging music, theater, and dance styles, teaching and learning modalities, technologies, and business models.

**Evaluate new initiatives from business process, capacity, demand, sustainability, and resource perspectives**

As plans are developed to implement these strategic initiatives, it is critical that new initiatives be evaluated from business process, capacity, demand, governance, and resource perspectives.

What is the impact on business process? What impact will it have on other areas? Who are the stakeholders and decision makers? Can we do things in a more efficient way that better serves students? How might we use technology to increase our effectiveness as educators and administrators?

Do we have classroom, practice room, laboratory space and housing capacity in support of new programs? Is there sufficient demand for the program or service being proposed? Do we fully understand the scope of the financial and human resources required?

By answering these questions, and collaborating effectively across the organization, we will be able to devote energy to the initiatives that will have the greatest impact on achieving the college vision.

**Make affordability, access, retention, and graduation a key focus in all planning and operational decisions:**

The model of higher education based on four years residence at a college campus is resource intensive and expensive to maintain, leading to the high cost of education.

We envision a future model for higher education with access to a range of affordable programs, while still providing students with high quality music and performing arts education. For example, coursework at an articulating institution, or through a mobile device, study abroad and internship opportunities can be stitched together in creative ways to provide a meaningful and affordable education. New technologies create efficiencies that can lower the costs of program delivery hence making music and performance arts education more accessible and more affordable to more students in more places around the globe.

By accepting a student to the college or conservatory, we are affirming that the individual has the talent to succeed. It is therefore our responsibility to provide the resources and support to retain that student and guide them to graduation.

**Be proactive in exploring and, where appropriate, integrating new technologies**

Advancing new technologies such as mobile connectivity, cloud computing, augmented reality, big data analytics and artificial intelligence are affecting every part of our society from the way we work, connect, create, consume and learn. The rapid change of technological disruption is altering not only the fields in which our students, faculty and staff work and create in, but they also present unique opportunities for more immersive, diverse and personalized learning environments, creative and educational innovation, increasing affordability, accelerating productivity, decreasing costs and generating new revenue streams for the institution.

Conversely, a passive approach to new technologies may pose unique challenges to attaining our vision, successfully executing our strategic direction, and maintaining our position as the preeminent institution for contemporary music and the performing arts.

We will be proactive in exploring and, where appropriate, integrating new technologies within all four areas of our strategic direction: infrastructure, integration, innovation and inclusion, acknowledging that they can be key catalysts for success within and across initiatives.
Berklee’s vision for 2025 is to transform arts education and empower artists to better our world. To enable this, we will need to develop transformational student service systems to support them. With a focus on streamlining operations, strengthening organizational structure, and becoming as efficient an organization as possible, we will undergo a systematic business process review to ensure that Berklee is as affordable and accessible as it can be. We will also seek to inspire donors to share this vision through philanthropic support.

- By 2020, implement an improved technological ecosystem, supported by “best practice” business processes designed to provide the highest quality experience possible.
  - Replace the Colleague HR, finance, and student information system with new cloud-based Enterprise Resource Planning software to support improved business processes, workflows, reporting, mobile access, and data analytics.
  - Adopt a single online learning environment
  - Unify our approach to student recruitment, advising, success and support using common platforms.

- Initiate a thorough study of contemporary performance venue design -- and how lighting, audio, video, multimedia, interactive, immersive, and emerging technologies are integrated -- in order to conceptualize the design and, if appropriate, advance development of 21st century state-of-the-art live performance venue on our Boston campus.

- Provide a world-class environment for learning, working, and living, including state-of-the-art facilities to foster educational effectiveness, promote a student-centric experience, and to best support the institution’s enrollment.

  - Undertake the development of planning and design for a new residence hall on the Boston campus.
  - Complete a space utilization survey to identify potential facility use improvements, and a campus-wide planning process to best meet current and anticipated needs of the merged institution.

- Provide enhanced opportunity for faculty and staff retention, growth and development: Leadership Development Program, Professional Development Training, Staff mentor program, and expand Faculty Development programs and build proficiency and capacity in new technologies.

- Formulate an effective governance structure built on collaborative leadership and community interaction.

- Increase fundraising capacity; inspire donors with a transformational and comprehensive model of the 21st century music and performing arts institution.
INNOVATION: STUDENT CENTERED
Berklee’s vision describes a vibrant ecosystem of music, theater, and dance, where all programs—from pre-college experiences to lifelong learning—work synergistically to strengthen one another, and align with students’ creative, artistic, and career goals. To accomplish this, we will focus innovation on curriculum, career opportunity, campus life, and student success.

- Develop a model for the creation of learning pathways between the Boston and Valencia campuses, Conservatory programs, online programs, study abroad, internship opportunities, and educational partners to create the world’s most dynamic and comprehensive program for music, dance, and theater education.
  - Develop programs that embrace ethnic and newly emerging, technology-based instruments.
  - Create online masters programs
  - Expand our education outreach programs in music to embrace theater and dance.
  - Explore the development of new programs in songwriting production, live performance design, software development, creative industries innovation, and electronic performance.
  - Integrate elementary, secondary, higher education, and continued education programs into lifelong learning outcomes.
  - Develop an approach to evaluate the alignment of current programs to our strategic direction.

- Enhance student advising and success programs, services, and supports to advance retention and graduation outcomes for students.
  - Develop a comprehensive and integrated student advising and success model.
  - Enhance existing and launch new student success initiatives designed to improve outcomes for targeted student populations.
  - Align admission and financial aid strategies to targeted student success and institutional goals.

- Create a residential and campus life experience designed to enhance student engagement, creative inspiration and satisfaction.
  - Develop co-curricular experiences to deepen student learning and development with a new residential curriculum, an integrated approach to the first year experience, and broadened student leadership and experiential opportunities.
  - Implement a comprehensive student health and wellness strategy.
  - Improve satisfaction with student services delivery.

- Align career services with progressive trends in higher education and industry to support Berklee’s unique position as the world’s leading music and performing arts institution
  - Broaden our students’ mindsets of what is possible with a music or performing arts degree
  - Develop communities to engage students, faculty, staff, alumni, industry professionals, and employers to guide career development and broaden paths and connections.
  - Increase subsidized internships and alumni mentorship.
  - Develop a comprehensive plan for employer engagement.

- Create new partnerships for articulation and affordability, including optimizing opportunity for students enrolled in Berklee Online or at Berklee International Network partner schools, and exploring opportunity for expanding articulation partnerships.
Diversity is integral to the mission of Berklee simply because diversity is integral to music and the performing arts. An essential part of a Berklee education is gaining an appreciation of the rich variety and interdependence of the cultural traditions from which the music and the performing arts that students explore originates.

A diverse, inclusive work and learning environment is essential to maintaining our role as a leader in music, dance, and theater education. It is imperative that we take specific steps to attract and retain the widest array of talented musicians and performing artists and provide an environment that supports and nurtures their creative process. To this end, we will implement a comprehensive diversity and inclusion strategy based on the following framework: student success, access and campus culture; recruiting and hiring; training, dialogue and practice; the Conservatory’s unique needs; and Berklee Valencia’s unique needs.

- **Student Success, Access and Campus Culture**
  Diversity and inclusion are central to our mission and to the quality and excellence of the services we provide at Berklee. Student success, improved retention and graduation rates, and improvement of the student experience will be our top priorities.

- **Recruiting and Hiring**
  We have historically had a relatively low turnover of faculty and staff at Berklee—which means that increasing the diversity of the institution requires us to treat every new job opening as a vital opportunity to seek top candidates who better reflect the make up of the student body. It is our responsibility to ensure our diversity and inclusion principles are infused throughout the hiring process for all faculty, staff and students.

- **Training, Dialogue and Practice**

  The institution will strive to create a safe and inclusive campus community by deepening and enhancing the level of dialogue and training around Diversity and Inclusion issues on campus.

  - **Action Items Tailored for the Conservatory’s Unique Needs**
    The institution will further evaluate and develop a tailored approach to addressing the unique needs of the Conservatory in relation to those of the College to create a comprehensive plan that addresses equity, diversity, and inclusion.

  - **Action Items Tailored for Berklee Valencia’s Unique Needs**
    The institution will further evaluate and develop a tailored approach to addressing the unique needs of the Valencia campus in relation to those of the College to create a comprehensive plan that addresses equity, diversity, and inclusion while paying specific attention to cultural and regional understanding surrounding these topics.

  - **Additional Initiatives**
    We will undertake a number of other steps to improve culture and climate.

    - **Evaluate the resources needed to implement the six initiatives listed above**

Berklee is committed to supporting these initiatives by providing the appropriate resources to fully engage in this important work.
INNOVATION: FULLY FUNDED WITH EXTERNAL SUPPORT

Berklee’s unique standing and global reach positions us well to act as an innovation platform, congregator and accelerator across the music, media and creative industry spectrums. With donor support, we will explore new opportunities for expanding our physical presence in cultural and innovation capitals domestically and abroad; as well as incubate research and development projects that advance innovation and catalyze positive changes in the college, the conservatory, our industry and our world.

Such efforts will not only augment Berklee’s reputation as a leading academic institution, but will also bolster the value of creative education, create expanded employment opportunities for our graduates, connect us with new funding sources and donors and develop new revenue streams for the college and conservatory that in turn expand affordability.

- Develop, implement and communicate a campus-wide Intellectual Property policy that encourages creativity and entrepreneurialism in students, faculty and staff;
- Expand philanthropic support for developing research and development capacity and facilities institution-wide; as well as the creation of a Music + Health Institute
- Expand our physical presence in cultural and innovation capitals nationally and internationally, including hubs in cities such as Los Angeles and New York, and/or in countries such as China and India.
- Widen the reach and impact of the Open Music Initiative and accelerate adoption of its open protocol.
- Explore new product, program and platform development using emerging technologies such as virtual and augmented reality, artificial intelligence, blockchain and internet of things for the purposes of increasing online program reach and immersion, generating new revenue streams for our students and institution, enhancing learning, and promoting innovation across the creative industries.
Recruiting and enrolling talented students is central to our institution’s success. Educating, graduating, and preparing them for sustained careers is our central responsibility. The merger creates opportunity to unify the enrollment process across all programs, assuring that students find the right program to match their creative and career aspirations.

- Launch a unified enrollment strategy with a vision to build a new enrollment, admissions, and aid awarding system that integrates marketing and application processes for all major programs: college undergraduate and graduate, Conservatory, Valencia, Online, summer, and off-campus clinics and workshops.

- Recruit on a global scale and build on the reputation of Boston Conservatory programs and the brand value of Berklee.
  - Further develop study abroad programs in Valencia, including launching a first year undergraduate experience.
  - Execute communications strategy to increase international visibility for Boston Conservatory at Berklee.
  - Develop integrated recruitment strategy for China.

- Enrich the offerings for both current College and Conservatory students by creating more flexibility and additional educational opportunities within existing programs, including transferability between specified Conservatory and College majors.

- Explore programs that build on shared strengths of the College and Conservatory, such as:
  - Comprehensive Conservatory music division strategy
  - Live performance design program
  - Jazz Dance and Dance Pedagogy programs
  - Course offerings in music video, performance acting, and stagecraft skills for musicians.

- Integrate current College and Conservatory summer programs to leverage strengths of both institutions, evaluate gaps between demand and current offerings and create appropriate new summer, international and inter-session programs, making the best use of both the Boston and Valencia campuses and online offerings, while cultivating future enrollment.
PATHWAYS PART 2
Pathways Part 1 sets a bold direction for the institution’s future by positioning Berklee as the global leader in arts education, driven by a student-centered focus, entrepreneurial spirit, inclusive culture, reimagined student services, transformational customer service technologies, and a career opportunity network. We will accomplish all of this with the talent, dedication, and creative energy of our entire community, as we have done successfully many times since our founding.

Our strategic plans over the last ten years have led to major accomplishments that demonstrate our arts education leadership. We completed the 160 Massachusetts Avenue building in the heart of our campus, vastly improving student life, dining, and recording facilities; and made significant improvements to 150 Massachusetts Avenue. Demand for Berklee programs continues to grow with record applications and increasing selectivity. The online program now offers a bachelor degree program serving more than xxxx students, and is about to launch masters degree programs. Scholarship support for students has increased dramatically from $xxmm to $xxmm. We launched masters and study abroad programs at a new campus in Valencia, Spain. We created institutes for global jazz, American roots music, and creative entrepreneurship; offer programs in Spanish through Berklee Latino programs; created free massive online enrollment courses (MOOCS) serving x million students, and launched a program for visually impaired students. We completed our first-ever capital campaign of $xxmm and launched a $100mm campaign, now at $xxmm. Most significantly, the merger of Berklee and Boston Conservatory provides us with a truly unique opportunity to create an educational and entrepreneurial environment that will inspire a new generation of creators and innovators in the arts, society and business.

All of these initiatives contribute to meaningful outcomes for our students: a better and deeper student experience though enhanced facilities and systems, improved graduations rates (xx% in 2008 v. xx% in 2017), and an expanded array of options of career opportunities in the creative industries and beyond. In addition to the many successful alumni working in the traditional music industry, Berklee graduates are now making their mark at tech giants such as Apple, Facebook, Google, and Tesla, and at a wide range of startups and venture-funded companies in the technology, healthcare and other leading edge sectors.

The promise of this strategic plan for 2017-2020 is the capacity it creates to open up flexible educational pathways across college, online, conservatory, Valencia, study abroad, internship, institute, and international partner programs. Furthermore, it can inspire and support our community to create new works, programs and products that help launch the careers of our students, promote the work of our faculty, staff, and alumni and catalyze innovation across the creative and media industries.

As we work to realize the goals of Pathways Part 1, we will look ahead to how we can use these new capacities to form strategies for 2020-2023 that will inspire and ignite the extraordinary possibilities and applications of contemporary music and the performing and creative arts on the global society and industry.
Standard 3 Appendix
Appendix 3.1 Organizational Chart for Berklee Online
Master of Arts in Music Business

OMBUS-505: Music Business Revenue Streams
In this course, students evaluate and analyze the sources of revenue generated in the music business. Students examine both the history and current status of the various revenue streams and their impact on participants in the music industry, from entrepreneurs to musicians to music product retailers. While live music continues to provide the bulk of revenue for musical artists, the digital age has brought many changes in the value of copyrights and heightened the importance of cultivating ancillary income sources. Students investigate the legal framework impacting the ability of players in the industry to establish viable careers and businesses, in addition to exploring and imagining new sources of revenue for the music business.

Learning Outcomes
Upon completion of this course, students will be able to:

- evaluate the role of sponsorships and endorsements in sustaining the careers of artists and related supporting personnel, such as managers, agents, and attorneys;
- evaluate the sustainability of record labels as viable stakeholders in the digital music business;
- analyze revenue streams for the live music business, including touring, festivals, and merchandising;
- analyze changes in the value of copyrights as a result of the emergence of the digital economy;
- analyze the creation of new ancillary businesses by musical artists and their impact on the broader music industry;
- analyze the effects of crowdfunding as a capital resource for artists and related businesses;
- analyze the sustainability of revenue from the music products field; and
- interpret the role of technology companies in sustaining and expanding the revenue of the recorded music market.

OMBUS-522: The Business of Music Marketing
In this course, students gain a professional level knowledge of cutting edge marketing techniques essential for any music-centric business. Starting with evergreen marketing best practices, students learn specific approaches for building an engaged community, applying different forms of media for visibility, and utilizing professional marketing tools to plan, execute, and report back on results. Students also learn how to plan and support a product release. Students master marketing philosophy, learn how to create and execute an integrated marketing campaign, and explore ways to create and run a successful music business—critical knowledge and skills for both music product and marketing.

Learning Outcomes
Upon completion of this course, students will be able to:

- synthesize web analytics to develop the niche of an artist or music product and target the relevant audience;
- create an effective product and pricing strategy, along with a supporting business plan;
- create a professional music marketing plan;
- analyze marketing segments available to musicians and music products, with a particular focus on online-related initiatives;
- develop sophisticated approaches to marketing and selling music and music-related products online, including implementing web optimization strategies;
- apply the essential pillars of successful music marketing campaigns; and
- implement effective messaging, branding, and communication for artists or music-related companies.
OMBUS-537: Data Analytics in the Music Industry

Through this course, students gain a deep understanding of the role of data in the business of music, balancing theoretical concepts, illustrative case studies, and practical application. When used correctly, data about artists and music serve as invaluable tools, allowing companies to measure performance accurately and understand the current market, informing decisions with real facts and figures, and providing insight into how existing processes may be made more efficient. Students learn how to implement a data strategy, including its benefits and risks, and gauge how difficult it can be to attain accurate data. Students also learn how to represent data visually in ways that help with communication and understanding. Students apply data analysis, extract data, and perform queries.

Learning Outcomes
Upon completion of this course, students will be able to:

● select the appropriate methods, fundamentals, environments, and occasions to apply data analysis;
● write SQL (Structured Query Language) and Excel formulas in order to extract and analyze data;
● determine which types of questions it is possible to ask of the data available;
● apply data to the business of music from album releases to promotional strategies and touring;
● analyze statistical concepts;
● assess any available data set, its sources, and suggested application; and
● visually represent and communicate data

OMBUS-555: Music Business Finance

In this course, students explore music business finance as three digestible components: first, determining and understanding financial calculations, both focused on the music industry in particular, as well as used more broadly across industries; second, money, markets, and the music business; and third, funding music. Students learn how to access money, take advantage of micro-finance opportunities, and apply financial tools to assess the financial health of an enterprise. Students explore capital markets, startups, stocks and IPOs, cash flow, balance sheets, price elasticity, and exit strategies. Students also examine nontraditional forms of music funding, such as venture capital and crowdfunding opportunities like Kickstarter and PledgeMusic. Additionally, students learn about bonds, grants, business loans, financing in rounds, and more.

Learning Outcomes
Upon completion of this course, students will be able to:

● define equity in a music enterprise;
● evaluate profit and loss statements;
● prepare a pitch for venture capitalists;
● plan entrepreneurial exit strategies;
● assess the role of venture capital for music entrepreneurs;
● assess the cash flow dynamics of music startups and evaluate a company’s cash flow statement;
● assess government funding and non-profit grants;
● leverage the loan market for a music business;
● analyze stock indicators to track publicly-traded music companies;
● apply best practices and budgeting in crowdfunding;
● apply bonds to the music business; and
● apply the methodology of price elasticity to music goods.
**OMBUS-595: Music Business Law**

In this course, students analyze the most important legal issues in the contemporary music industry, including how these issues began, how they have evolved, and where they are headed. Students explore copyright law, including fair use and public domain, and how it affects sampling, interpolation, and mashups. Students also examine contracts related to songwriting, 360 deals, revenue sharing, and more, in addition to legal documents related to bands, booking, and touring. Students explore contemporary and new means of creating and disseminating music, including streaming audio and video, as well as augmented and virtual reality—and the associated legal implications. Upon completion of this course, students will gain the analytical skills needed to evaluate a broad range of issues and assess competing sides in order to negotiate and author contracts.

**Learning Outcomes**

Upon completion of this course, students will be able to:

- evaluate legal issues related to bands, including the role of the manager, what constitutes fair and equitable agreements between artist and managers, responsibilities of departing and remaining band members, and the importance of the band unit and band name;
- evaluate concert riders and contracts, in addition to the legal responsibilities of venue owners and managers;
- evaluate opportunities to resolve conflicts, including summary judgment, mediation, and arbitration;
- author favorable conditions for any side in a negotiation involving aspects of the music and entertainment industry;
- analyze legal issues in a broad range of areas connected to the music and entertainment industry, including songwriting, recording, touring, distribution, and technology;
- analyze legal issues that pertain to streaming audio and video, in addition to new technologies such as virtual and augmented reality; and
- assess various songwriting and publishing conditions, terms, durations, compensation, duties, responsibilities, and contracts.

**OMBUS-690: Research Methods/Proposal Development for the Culminating Experience**

All Master of Arts in Music Business students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student's work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students' next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.

Students begin this experience with a written proposal. This course supports and guides students through the process of developing this proposal. The proposal describes students’ intentions regarding the culminating experience, discussing the form the project will take as well as the scope of work. Students also develop a plan of action and timeline, as well as identify the resources needed. They also explore some of the differences between independent research and learning and course work. Additionally, students learn methods for conducting the research needed to realize their projects. Students learn how to frame and evaluate inquiries.
using quantitative, qualitative, and mixed research methods; they learn about different research methodologies, including interviews, observational methods, surveys, reflexive methods, case studies, analytical methods, and more. And they learn how to select the methodologies most useful to their line of inquiry. Students also learn about the responsibilities, ethics, and values of research, and ways to use research to draw conclusions. They learn which research requires additional ethical approvals, such as from Berklee’s Institutional Review Board. As well, students learn the appropriate formats and styles for their research to follow and learn how to submit their culminating experience to Berklee’s archives.

**Learning Outcomes**

Upon completion of this course, students will be able to:

- write their culminating experience proposal in the format and style appropriate for their project and submit the proposal for approval;
- determine the scope of work they will master in their culminating experience;
- develop a plan of action and timeline for the culminating experience, as well as identify and develop a plan to attain resources needed;
- evaluate statistical approaches and results;
- evaluate the credibility and ethics of research conclusions;
- synthesize appropriate data analysis strategies;
- determine which types of research require additional ethical approvals, such as from an Institutional Review Board, and gain familiarity with that application process;
- compare and evaluate research genres and approaches, including interviews, observational methods, surveys, reflexive methods, case studies, analytical methods, and more; and
- understand the process and requirements for culminating experience submission to the Berklee archives.

**OMBUS-657: Artist Management**

This course provides an in-depth exploration of the strategy behind effective artist management. Through case study analysis, students learn the key ingredients for successful artist management/artist relationships, in addition to approaches for growing and sustaining artists' careers. Underpinning this work is effective brand management and the development of the artists and their fan bases. Students learn how and when to build out artists' teams and how to leverage financing opportunities, such as crowdfunding, to jumpstart new projects. It is exceedingly rare that artists have a single income stream, so artist managers must be versed in all aspects of the industry to exploit opportunities that align with their artists' goals. The course positions students to identify and leverage potential opportunities, while nurturing industry relationships and negotiating the most favorable outcomes for artists.

**Learning Outcomes**

Upon completion of this course, students will be able to:

- create innovative, multi-dimensional plans to increase the chances of success for the artists with whom they work;
- evaluate important contractual and financial documents required in artist management and help negotiate the most favorable outcomes for artists;
- devise strategies for financing and making connections that support artists' sustainability;
- execute effective strategies for brand management and cultivating fan bases;
- leverage opportunities in touring, recording, licensing, merchandising, and sponsorships that align with artists' goals; and
- build an effective team that coordinates and supports artists' careers.
OMBUS-664: Music Business Policy
Music business policy determines what is possible in the evolving, global marketplace for music, and has a direct impact on the paychecks of working artists and entrepreneurs. In this course, students learn what they need to help them seize opportunities and take a proactive role in the debates that are shaping the future of creativity and commerce. Long-term sustainability in the music industry requires a working knowledge of the laws and regulations around the world. Students expand their knowledge of local, regional, national, and international policies that impact the global music industry. They analyze the challenges to implement music policies that are effective in a global framework. They also analyze the primary stakeholders in music policy, including the historical context and situational framework in order to determine best ways forward. They evaluate how public policy provides for differing levels of equity for artists. They also explore the impact of technology on policy and evaluate where policy changes may still be required. Students learn to demystify complex policy topics, as they gain confidence to engage in these important issues.

Learning Outcomes
Upon completion of this course, students will be able to:

- evaluate how international, federal, state, and municipal policies shape the music ecosystem from the local to the global;
- evaluate the ways that new technology developments may reduce the necessity for policy intervention, and evaluate where policy guidance may still be required;
- evaluate how public policy provides for differing levels of equity for artists;
- debate copyright reform from the position of recognizing the basic history of how this specific body of law established the framework for every business directly or indirectly involved with recorded music;
- compare the different standards for setting statutory rates for the use of sound recordings, the rationale behind each, and the practical ramifications regarding modification;
- analyze the challenges to devising and implementing music policy and opportunities to evolve the global framework for music entrepreneurship;
- analyze the zones where policy intersects with music: copyright, digital distribution, telecommunications, broadcast, live performance, and urban development;
- analyze the primary stakeholders in music policy, including their historic emphasis and situational leverage in current debates on issues such as copyright reform, access to audiences, participatory economics, and competition; and
- analyze how bills are drafted, introduced, and passed.

OMBUS-693: Culminating Experience in Music Business 1
All Master of Arts in Music Business students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.
In this course, students review and finalize the proposal that was developed in OMBUS-690 Research Methods/Proposal Development for the Culminating Experience. If necessary, students also gain approval for their research from Berklee’s Institutional Review Board. As well, students review the culminating experience guidelines that they learned in the Proposal Development course. Students spend the semester developing their projects, following their determined plan of action, and managing organizational and time management skills, to execute their research and work. They finalize their culminating experience committee, developing a plan to communicate with and receive feedback from each committee member. As well, they learn how to respond to, evaluate, and incorporate external feedback. They also learn to compute, interpret, and present data and results to support the project. Upon completion of this course, students will have completed a substantial draft or appropriate portion of their Culminating Experience.

Learning Outcomes
Upon completion of this course, students will be able to:

- develop a draft or substantial portion of their culminating experience project;
- execute the research required for their project;
- execute, revising if necessary, the planned scope of work and timeline for their culminating experience;
- synthesize knowledge gained to develop an original contribution;
- assess feedback and incorporate revisions as appropriate;
- determine their culminating experience committee, developing a communication plan and process;
- assess all culminating experience requirements in terms of plans of action, documentation, research, and more;
- compute, interpret, and present data and results to support the project, as necessary;
- apply to and gain approval from the Institutional Review Board, if necessary;
- apply organization and time management strategies to master a long-term project; and
- examine the process of completing the culminating experience project.

OMBUS-676: Music Strategy for Consumer Brands
Relationships between artists and consumer brands are increasingly symbiotic, helping to strengthen emotional connections with audiences, develop meaningful relationships, and earn revenue. In this course, students learn to make appropriate alignments between brands and artists and devise strategies for campaigns that have measurable outcomes, such as KPIs (key performance indicators) and ROI (return on investment), that inform further investment. Students learn to conceptualize, build, and execute best-in-class music campaigns for consumer brands in a professional, real-world context through research, analysis, presentation, and critique.

Learning Outcomes
Upon completion of this course, students will be able to:

- evaluate how brands fit in the music space and how to adapt strategies to increase relevance where it does not exist;
- articulate the value emotion plays in driving purchasing decisions and assess how music can be leveraged to enhance these connections;
- quantify brands’ assets that are of value to the artist community and can provide the foundations for a campaign;
- assess artists’ communication, team, and brand before considering them for partnership;
- assess ROI of a campaign based on its targets and KPIs;
• develop campaigns that simultaneously deliver value for artists and the brand for authentic ambassadorship;
• develop campaigns through a focus on storytelling across the PESO (paid/earned/shared/owned) model;
• avoid major mistakes that many brands make relating to the artist community relating to payment, approvals, and contracting; and
• deliver concepts and campaigns that go beyond marketing consumer products to impact consumers and the industry in more meaningful ways.

OMBUS-692: Music Business Leadership and Management
In this course, students enhance their understanding of leadership core competencies for professional development, apply that leadership awareness to their managerial capabilities in multiple business environments, and implement change management techniques as tactical strategies for competitive advantage within the music industry. To be successful in leading people, it is necessary to understand yourself, understand the environment, and communicate a vision of where you want to go. Through this course, students gain the analytical, visioning, and communications skills required for leadership. Students gain critical reflection skills through receiving and providing ongoing feedback to their classmates and faculty, as well as completing critical reflection and simulation exercises. Students gain greater mastery of their professional development as leaders and entrepreneurs in the music business.

Learning Outcomes
Upon completion of this course, students will be able to:
• synthesize applicable models of leadership into personal approaches;
• synthesize the characteristics of globally engaged business professionals, entrepreneurs, and leaders within the music industry;
• synthesize strategies and tactics for competitive advantage;
• evaluate the leader’s role in constructing effective strategic and tactical initiatives;
• assess their own personal orientation and practical approach to leadership and management;
• analyze the role of the situation/context in leadership theory and practice;
• apply leading theories and models of leadership to operationalize a vision in a practical business or organizational context.

OMBUS-695: Culminating Experience in Music Business 2
All Master of Arts in Music Business students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.

This course, a continuation of OMBUS-693: Culminating Experience in Music Business 1, supports the completion of the culminating experience. Students work in consultation with their culminating experience
committee to develop their unique projects, and to take them from first draft to finished form. In addition, they prepare for their final presentation and ultimately present their work to their committee and to the online graduate community. As part of their coursework, students reflect on their projects as well as on the knowledge and skills they have attained in the program. Students apply the individual experience, intelligence, organization, creativity, and synthesis of acquired knowledge necessary to complete their unique project. Students analyze the ways in which their culminating experience enriches the discipline of study or the profession, and the ways in which they have changed by completing the experience. Likewise, students determine next steps—what they will do next, if appropriate, to develop the project further. Students also master written and oral communication skills as they present their projects to their committee and to their classmates, and as they prepare their projects for submission to the course and to the Berklee archives.

Learning Outcomes
Upon completion of this course, students will be able to:

- complete their culminating experience project;
- produce a professional piece of work;
- consider project next steps;
- synthesize knowledge gained to develop an original contribution;
- evaluate their experience, assessing the contribution made to the profession; and
- analyze their own artistic, professional, and personal growth, as a result of having completed the graduate program.
Master of Music in Music Production

OMPRD-507: Architectural Acoustics and Audio Systems Design
This course prepares students to design and implement a professional-level critical listening, recording, and music production environment for themselves or for the clients with whom they work, using professional tools, standards, and practice. Students evaluate both theoretical and case study examples of acoustical and audio system design and construction, with a focus on programmatic thinking, application of scientific acoustical measurement, and both traditional and modern solutions in acoustics and audio. Students complete the necessary steps from conception of idea to the final project: a complete production studio design, including site study, internal and external acoustic design criteria, 3D modeling, final acoustic design and implementation, and audio and monitoring system design.

Learning Outcomes
Upon completion of this course, students will be able to:
- design and confirm the design of the production space, using AutoCAD and AudioTools;
- plan and execute the design of a professional-level critical listening, recording, and music production environment;
- analyze theoretical and case study examples of acoustical and audio system design and construction;
- solve traditional and modern acoustics and audio problems;
- apply scientific acoustical measurement tools;
- apply acoustical data in the design and implementation process; and
- apply professional practice standards as applied to the production environment.

OMPRD-525: Critical Analysis of Music Production Techniques
Improving the quality of music production projects necessitates strong listening skills. In much the same way that traveling to another country teaches people about themselves, listening to and analyzing others’ songs across genres opens people to different techniques and perspectives on how to achieve the best results for conveying the vision or emotional intent of a project and connecting with listeners. In this course, students learn a framework and vocabulary for analyzing music that supports their work in the program, in addition to their professional career. Throughout the course, students dissect music for its use of various production techniques, including arrangement, instrumentation, performance, and mix considerations, with the underlying goal of strengthening their analytical abilities, increasing their versatility as producers, and enhancing the overall quality of their work.

Learning Outcomes
Upon completion of this course, students will be able to:
- evaluate musical, emotional, performance and arrangement techniques in top-charting music, in addition to music in diverse musical styles;
- analyze key vocal production techniques, such as doubling, layering, distressing, tuning, compression, echo, and reverb;
- perform high-level analysis of production elements used in songs across genres;
- apply a professional-level framework and vocabulary for analyzing music production techniques; and
- apply findings from analysis to enhance their own music projects.

OMPRD-577: Music Production: Maximizing Emotion through Performance, Arrangement, and Sound
This course is an in-depth, hands-on study of the unique elements involved in the craft of music production. Students learn the fundamental aural and philosophical considerations necessary to achieve
emotionally-impactful and commercially-competitive productions. Students also explore time-based musical
and aural tools aimed at maximizing the emotional impact of any song, as well as the elements considered in
representing artists, their music, and careers in the best light. Students hone their skills to become
high-functioning, self-sufficient producers while working in diverse, collaborative production teams. As well,
students hone practical organizational, time management, and budgeting skills to enhance project success.

**Learning Outcomes**
Upon completion of this course, students will be able to:

- achieve professional standards of fidelity and musicality, all in the service of effectively conveying
  emotion through recorded music;
- plan, lead, and deliver emotionally impactful and commercially-viable music production projects
  within collaborative and self-contained contexts;
- lead a collaborative creative team, employing appropriate interpersonal communication skills;
- develop greater self-reliance;
- apply budgeting, scheduling, organizational, and time management skills; and
- apply appropriate technology in a variety of production and engineering tasks.

**OMPRD-588: Creative Recording Techniques**
This course is a practical, in-depth study of essential and creative recording techniques as well as an
exploration of advanced audio editing techniques and considerations. Students learn to maximize the
emotional impact of recordings by focusing on the music-driven intersection of the technical and creative
skills necessary to achieve professional sounding recordings in any setting, from professional recording
environments to portable studios with minimal gear. Students learn core and creative editing techniques
meant to expand, repair, and maximize the emotional potential of any recording. They also envision detailed
aural objectives and expand their recording vocabulary and expertise in order to determine frequency,
dynamic, spatial, ensemble, and arrangement choices in recordings. Students apply multi-microphone
recording techniques as well as advanced DAW editing strategies.

**Learning Outcomes**
Upon completion of this course, students will be able to:

- record and edit impactful and commercially-competitive recordings within both collaborative and
  self-contained contexts;
- achieve professional standards of fidelity and musicality, in service of the project, by applying creative
  recording techniques;
- envision detailed aural objectives in order to determine crucial frequency, dynamic, spatial, ensemble,
  and arrangement choices in recordings;
- employ multi-microphone recording techniques; and
- apply advanced DAW editing techniques.

**OMPRD-599: Commercial Vocal Production**
In this course, students enhance skills necessary to create vocal-focused recordings that are contemporary and
commercially viable. Students explore the voice as an instrument, one that is naturally expressive and
harmonically complex, and that can be technologically-processed. They also examine the voice as a
commercially connective instrument in modern music. Students learn to master the production of
commercially viable vocal performances for a contemporary client base. They also master microphone
placement for various types of vocalists, choirs, and backing vocals; analyze the use of phase, panorama,
delay, reverb, and vocal modulation in contemporary music compositions; and apply Auto-Tune, Melodyne,
and the vocoder effectively to edit vocal recordings in production. Students develop and implement strategies that enhance vocal performances using natural and artificial techniques and processing.

**Learning Outcomes**

Upon completion of this course, students will be able to:

- evaluate the connectivity and commercial viability of vocal performances;
- develop and implement strategies that enhance vocal performances using natural and artificial techniques and processing;
- analyze the use of phase, panorama, delay, reverb, and vocal modulation in contemporary music compositions;
- apply the most effective microphone placements for recording various types of vocalists, choirs, and backing vocals; and
- apply Auto-Tune, Melodyne, and the vocoder effectively to edit vocal recordings in production.

**OMPRD-690: Business of Independent Music Production/Proposal Development for the Culminating Experience**

All Master of Music in Music Production students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.

Students begin this experience with a written proposal. This course supports and guides students through the process of developing this proposal. The proposal describes students’ intentions regarding the culminating experience, discussing the project design and scope of work. Students develop a plan of action and timeline, as well as determine resources needed. They also explore some of the differences between independent research and learning, and course work. Students learn methods for conducting the research needed to realize their projects—artistic, case study, market, interview, quantitative, qualitative, and more. Students learn how to frame inquiries and to investigate the components of their projects. As well, students learn the appropriate formats and styles for their research to follow and learn how to submit their culminating experience to Berklee’s archives. While preparing their proposal, students also explore the business aspects of operating as an independent producer or production company, including effective strategies for promoting work through networking and marketing, developing and implementing a business plan with diversified sources of revenue, managing legal and tax affairs, building a team and resources, and leveraging opportunities for growth and expansion.

**Learning Outcomes**

Upon completion of this course, students will be able to:

- write their culminating experience proposal in the format and style appropriate for their project and submit the proposal for approval;
determine the scope of work they will master in their culminating experience;

● develop a plan of action and timeline for the culminating experience, as well as identify and develop a plan to attain resources needed;

● evaluate a variety of research designs and business plan models, selecting the design and model most appropriate for their project;

● research market potential for professional music production work in their area;

● analyze tax implications for running an independent business and where/when to seek professional help; and

● understand the process and requirements for culminating experience submission to the Berklee archives.

OMPRD-637: Psychoacoustics
This course examines human auditory processing from the eardrum to the auditory cortex. Students learn how speech and music signals are transformed from physical activity in the environment, to sensations in the cochlea, to psychological perceptions in the brain. Students explore the relationship between a sound and its perception in terms of the underlying mechanisms and limitations of our hearing system. Students also analyze the auditory system and pathways, spatial localization, critical bands and masking, temporal resolution, pitch, timbre, and loudness perception, auditory scene analysis, speech and music perception, and noise induced hearing loss. Throughout the course, students learn practical applications for how this information serves the audio arts, especially engineering and mixing.

Learning Outcomes
Upon completion of this course, students will be able to:

● synthesize learnings about the human auditory system to understand why people hear what they hear;

● evaluate research in psychoacoustics;

● illustrate how the brain processes pitch, loudness, timbre, and timing;

● apply learning about the human auditory system to enhance production and engineering projects;

● explain the hearing and auditory nervous system, in addition to the physics of sound;

● explain the process by which the human auditory system organizes sound into meaningful elements; and

● explain the origin and consequences of noise induced hearing loss.

OMPRD-650: Advanced Mixing Techniques
Advanced Mixing Techniques is a next-generation music mixing course for students to take their mixing skillsets to the highest level. In addition to an in-depth exploration of traditional mixing topics such as balance, EQ, dynamics, spatial effects, and automation, students explore pitch and time correction and mixing for relevant digital streaming services. Throughout the course, students mix twelve provided recordings in a variety of Billboard chart-related styles, including R&B/hip-hop, pop, electronic/dance, country, rock, and emerging artists. This work requires students to organize, implement, and execute large multi-track mixes in a DAW mixdown environment, in addition to executing technically and creatively advanced mixing techniques and preparing mixes for contemporary streaming formats.

Learning Outcomes
Upon completion of this course, students will be able to:

● organize, implement, and execute large multi-track mixes in a DAW mixdown environment;

● execute technically and creatively advanced mixing techniques;

● mix for contemporary streaming formats;

● execute advanced mixing techniques, such as pitch and time correction; and
OMPRD-693: Culminating Experience in Music Production 1
All Master of Music in Music Production students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. The work involved in the culminating experience represents the highest expression of students’ learning at the graduate level.

In this course, students review and finalize the proposal that was developed in OMPRD-690 Business of Independent Music Production/Proposal Development for the Culminating Experience. As well, students review the culminating experience guidelines that they learned in the Proposal Development course. Students spend the semester developing their projects, following their determined plan of action, and managing organizational and time management skills, to execute their research and work. They finalize their culminating experience committee, developing a plan to communicate with and receive feedback from each committee member. As well, they learn how to respond to, evaluate, and incorporate external feedback. They also learn to compute, interpret, and present data and results to support the project. Upon completion of this course, students will have completed a draft of their project. For recording projects, a draft generally means completion of recordings and rough mixes.

Learning Outcomes
Upon completion of this course, students will be able to:
- develop a draft or substantial portion of their culminating experience project;
- execute the research required for their project;
- execute, revising if necessary, the planned scope of work and timeline for their culminating experience;
- synthesize knowledge gained to develop an original contribution;
- assess feedback and incorporate revisions as appropriate;
- determine their culminating experience committee, developing a communication plan and process;
- assess all culminating experience requirements in terms of plans of action, documentation, research, and more;
- compute, interpret, and present data and results to support the project;
- apply organization and time management strategies to master a long-term project; and
- examine the process of completing the culminating experience project.

OMPRD-662: Advanced Audio Mastering: Theory and Practice
In this course, students develop their analytical and practical skills to be able to tackle the demanding signal processing challenges presented to professional mastering engineers. They learn theory and techniques to deliver high-quality masters for various platforms, including vinyl, lossy codecs, and streaming platforms. They learn to analyze audio according to its technical attributes and musical style. They evaluate audio according to audience and market expectations; they develop and execute strategies to adapt mixed audio to fit those expectations; and they learn to output flawless masters for various distribution channels.
Learning Outcomes
Upon completion of this course, students will be able to:
- create flawless masters for various distribution channels;
- synthesize mastering strategies to solve signal processing challenges;
- select techniques to deliver high-quality masters;
- analyze audio according to its technical attributes and musical style;
- evaluate audio according to audience and market expectations; and
- develop and execute strategies to adapt mixed audio to fit those expectations.

OMPRD-677: Audio Production for Visual Media
This course is an in-depth exploration of the tools, techniques, workflows, and creative considerations in producing audio for film, television, and related media. Students explore the history of film as a medium, through the development of technology for synchronizing audio to moving picture, to modern-day practices in audio post-production. Students explore the process and technique of creating sound for picture. They gather, craft, edit, and mix sound effects, backgrounds, and Foley that would be applied to visual media. They prepare for and explore techniques for managing a large ensemble recording session for recording score. They learn the process of submitting audio stems to the final mix, and they learn the final mix itself. Students also create a film clip with their own custom-created soundtrack as they hone their skills in audio post-production and work through an authentic, real-world post production process.

Learning Outcomes
Upon completion of this course, students will be able to:
- create sound for picture, applying audio post-production skills;
- gather, craft, edit, and mix sound effects, backgrounds, and Foley;
- prepare for and explore techniques for managing a large ensemble recording session for recording score;
- prepare a film mix “pre-dub,” submit audio stems to the final mix, and complete the final mix, itself; and
- create a film clip with their own custom-created soundtrack using the techniques presented throughout the course.

OMPRD-695: Culminating Experience in Music Production 2
All Master of Music in Music Production students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student's work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students' next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. The work involved in the culminating experience represents the highest expression of students' learning at the graduate level.

This course, a continuation of OMBUS-693: Culminating Experience in Music Production 1, supports the completion of the culminating experience. Students work in consultation with their culminating experience committee to develop their unique projects, and to take them from first draft to finished form. In addition, students prepare for their final presentation and ultimately present their work to their committee and to the online graduate community. As part of their coursework, students reflect on their projects as well as on the
knowledge and skills they have attained in the program. Students apply the individual experience, intelligence, organization, creativity, and synthesis of acquired knowledge necessary to complete their unique project. Students analyze the ways in which their culminating experience enriches the discipline of study or the profession, and the ways in which they have changed by completing the experience. Likewise, students determine next steps—what they will do next, if appropriate, to develop the project further. Students also master written and oral communication skills as they present their projects to their committee and to their classmates, and as they prepare their projects for submission to the course and to the Berklee archives.

Learning Outcomes
Upon completion of this course, students will be able to:

- complete their culminating experience project;
- produce a professional piece of work;
- consider project next steps;
- synthesize knowledge gained to develop an original contribution;
- evaluate their experience, assessing the contribution made to the profession; and
- analyze their own artistic, professional, and personal growth, as a result of having completed the graduate program.
Berklee College of Music
Master of Arts - Music Business
OMBUS-505
Music Business Revenue Streams
3 credits

Instructor’s Name: John Kellogg
E-mail: jkellogg@berklee.edu
Phone:
Course Website: online.berklee.edu
Program Director: John Kellogg, Esq.

Course Description
In this course, students evaluate and analyze the varied sources of revenue generated in the music business. Students examine both the history and current status of the various revenue streams and their impact on participants in the music industry, from entrepreneurs to musicians to music product retailers. While live music continues to provide the bulk of revenue for musical artists, the digital age has brought many changes in the value of copyrights and heightened the importance of cultivating ancillary income sources. Students investigate the legal framework impacting the ability of players in the industry to establish viable careers and businesses, in addition to exploring and imagining new sources of revenue for the music business.

Course Learning Outcomes
Upon completion of this course, students will be able to:
- evaluate the role of sponsorships and endorsements in sustaining the careers of artists and related supporting personnel, such as managers, agents, and attorneys;
- evaluate the sustainability of record labels as viable stakeholders in the digital music business;
- analyze revenue streams for the live music business, including touring, festivals, and merchandising;
- analyze changes in the value of copyrights as a result of the emergence of the digital economy;
- analyze the creation of new ancillary businesses by musical artists and their impact on the broader music industry;
- analyze the effects of crowdfunding as a capital resource for artists and related businesses;
- analyze the sustainability of revenue from the music products field; and
- interpret the role of technology companies in sustaining and expanding the revenue of the recorded music market.

Course Materials
- All You Need to Know About the Music Business (9th Edition)- Donald S. Passman (Passman)
- Money, Music and Success, (7th Edition)-Jeffrey and Todd Brabec (Brabec)
- Take Care of Your Music Business-2nd Edition: Taking the Legal and Business Aspects You Need to Know to 3.0-John P. Kellogg (Kellogg)

N/A

Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.
A- (90-92)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.
B+ (87-89)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Some errors are present, but infrequent and generally minor.
B (83-86)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. However, additional concentration could produce a higher level of achievement.
B- (80-82)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Additional practice could produce a much more refined and consistent level of achievement.
C+ (77-79)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear to be of a larger magnitude in select assignments.
C (73-76)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear in at least half all assigned material.
C- (70-72)
The student has demonstrated a basic level of achievement. The student appears to have a basic level of understanding of the course objectives and the methodology associated with each task. Few assignments are without problems.
D (60-69)
The student has demonstrated a below average/basic level of achievement. The student
appears to have a below average/basic level of understanding of the course objectives and the methodology associated with each task. Most assignments contain flaws. 

F (0-59)
The students appear to be unaware of the most basic understandings. The student does not understand the course objectives and the methodology associated with each task. Most assignments contain severe flaws.

Policy for Submitting Late Assignments: Late assignments will be accepted only for reduced credit and at the discretion of the instructor.

Academic Honesty
Berklee College of Music insists on academic honesty. Unless the assignment explicitly is a group project, all of the work in this class must be your own. The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

http://owl.english.purdue.edu/
www.wisc.edu/writing/Handbook/Documentation.html
http://lib.nmsu.edu/instruction/evalcrit.html

Attendance/Participation
Attendance/participation is required in all classes, private instruction, instrumental labs, and ensembles, beginning with the first scheduled meeting. This includes virtual meetings and appropriate participation in online courses. The faculty member may also provide more specific information on attendance/participation policies.

Diversity Statement
Material and activities in this course support a commitment to understanding diverse cultures and learning styles and abilities. This is accomplished through the use of repertoire from a variety of cultures and through the use of multimodal learning activities.

Equity Statement
Berklee College of Music is a diverse community composed of individuals with different life experiences, viewpoints, belief systems, and identities. A welcoming and inclusive culture is essential to maintaining the college’s role as a leader in music education and Berklee highly values the dynamic environment that results when students, faculty, administrators, and staff
from diverse backgrounds come together to learn, live, and work. Specifically, the Equity Policy and Process prohibits and addresses sexual misconduct, sexual assault, dating and domestic violence, stalking, and discrimination and/or harassment based on race, color, religion, gender, gender identity, transgendered status, national origin, age, disability, military or veteran status, sex, sexual orientation, genetic information, marital status, pregnancy, or any other characteristic protected by law (collectively referred to as “protected characteristics”). If you have concerns about a possible violation of the college’s Equity Policy, please contact Dr. Christopher Kandus-Fisher at ckandusfisher@berklee.edu. For additional information regarding the Unified Equity Policy and Process, please consult the Unified Equity Policy Website, which has the most up to date information and resources at www.berklee.edu/equity.

Disclosure of Disability
Students with documented physical, learning, and/or psychological disabilities that qualify under the Americans with Disabilities Act are offered assistance in obtaining necessary accommodations to support a successful experience at Berklee. Students requesting accommodations must initiate and maintain ongoing contact with a Disability Services staff member in the Counseling and Advising Center. Disability Services staff can assist with academic planning, scheduling adjustments, and support, as well as referral to outside agencies, testing sites, and support groups. All accommodation requests must be made with a two-week minimum notice to faculty. Disability Services staff are available in the Counseling and Advising Center by appointment. For more information visit: http://www.berklee.edu/counseling/specialservices.html or the greeting counter in the CAC located in the 939 Boylston St building (enter through the Uchida Building, 921 Boylston St., 3rd floor), or call 617-747-2310.

Berklee Definition of a Credit Hour
For lecture and discussion courses, students earn one course credit for every class contact hour—one credit for one hour of class meeting time each week. For lecture and discussion courses at the graduate level, the expectation is that one hour of class time requires at least three hours of out of class study. For ensemble and lab work, where repetition, practice, and iterative learning are key, students earn one hour of credit for every 30 hours of in-class time, or one credit for two contact hours each week. Private instruction is delivered as a 3-credit, 1-hour per week course for graduate students. Private instruction requires significant weekly expectations regarding practice time and study outside of class. Virtual equivalents of these requirements apply to online courses.

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1: Introduction (the 3 Big P’s) and the development of modern music revenue streams.

Week 2: The Live Music Industry (Part 1)

Week 3: The Live Music Industry (Part 2)

Week 4: Branding: Coupling parties of like minds, means, and/or needs.
Week 5: The importance of copyrights creating revenue and asset value (Part 1)

Week 6: The importance of copyrights creating revenue and asset value (Part 2)

Week 7: Merchandising beyond the tour: How to generate revenue from the sale or use of non-entertainment artist branded merchandise or services.

Week 8: Revenue generated from teaching the next generation of musicians and music business professionals the ins and outs of music and business.

Week 9: Union musician and vocalist sources of revenue and related benefits.

Week 10: The changing landscape of crowdfunding as a source of revenue for musical artists.

Week 11: The wide world of music products.

Week 12: Issues and concerns influencing the sustainability of certain music business revenue streams.

Program Director: John Kellogg, Esq.

Course Description
In this course, students gain a professional level knowledge of cutting edge marketing techniques essential for any music centric business. Starting with evergreen marketing best practices, students learn specific approaches for building an engaged community, including applying different forms of media for visibility, and utilizing professional marketing tools to plan, execute, and report back on results. Students also learn how to plan and support a product release. Students master marketing philosophy, learn how to create and execute an integrated marketing campaign, and explore ways to create and run a successful music business—critical knowledge and skills for both music product and marketing.

Course Learning Outcomes
Upon completion of this course, students will be able to:

● synthesize web analytics to develop the niche of an artist or music product and target the relevant audience;
● create an effective product and pricing strategy, along with a supporting business plan;
● create a professional music marketing plan;
● analyze marketing segments available to musicians and music products, with a particular focus on online-related initiatives;
● develop sophisticated approaches to marketing and selling music and music-related products online, including implementing web optimization strategies;
● apply the essential pillars of successful music marketing campaigns; and
● implement effective messaging, branding, and communication for artists or music-related companies.

Prerequisite Knowledge
In order to complete the work required for this course, students should have successfully completed the courses Music Marketing Fundamentals, Music Business Fundamentals, and Music Business Finance or have equivalent knowledge.

Course Materials

● Jab, Jab, Jab, Right Hook: How to Tell Your Story in a Noisy Social World - Gary Vaynerchuk
● Here Comes Everybody: The Power of Organizing Without Organizations - Clay Shirky
● Permission Marketing - Seth Godin
**Grading Criteria**

**A (93-100)**
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.

**A- (90-92)**
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.

**B+ (87-89)**
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Some errors are present, but infrequent and generally minor.

**B (83-86)**
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. However, additional concentration could produce a higher level of achievement.

**B- (80-82)**
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Additional practice could produce a much more refined and consistent level of achievement.

**C+ (77-79)**
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear to be of a larger magnitude in select assignments.

**C (73-76)**
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear in at least half all assigned material.

**C- (70-72)**
The student has demonstrated a basic level of achievement. The student appears to have a basic level of understanding of the course objectives and the methodology associated with each task. Few assignments are without problems.

**D (60-69)**
The student has demonstrated a below average/basic level of achievement. The student appears to have a below average/basic level of understanding of the course objectives and the methodology associated with each task. Most assignments contain flaws.

**F (0-59)**
The students appear to be unaware of the most basic understandings. The student does not understand the course objectives and the methodology associated with each task. Most assignments contain severe flaws.

**Policy for Submitting Late Assignments:** Late assignments will be accepted only for reduced credit and at the discretion of the instructor.
**Academic Honesty**

Berklee College of Music insists on academic honesty. Unless the assignment explicitly is a group project, all of the work in this class must be your own. The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

http://owl.english.purdue.edu/
www.wisc.edu/writing/Handbook/Documentation.html
http://lib.nmsu.edu/instruction/evalcrit.html

**Attendance/Participation**

Attendance/participation is required in all classes, private instruction, instrumental labs, and ensembles, beginning with the first scheduled meeting. This includes virtual meetings and appropriate participation in online courses. The faculty member may also provide more specific information on attendance/participation policies.

**Diversity Statement**

Material and activities in this course support a commitment to understanding diverse cultures and learning styles and abilities. This is accomplished through the use of repertoire from a variety of cultures and through the use of multimodal learning activities.

**Equity Statement**

Berklee College of Music is a diverse community composed of individuals with different life experiences, viewpoints, belief systems, and identities. A welcoming and inclusive culture is essential to maintaining the college's role as a leader in music education and Berklee highly values the dynamic environment that results when students, faculty, administrators, and staff from diverse backgrounds come together to learn, live, and work. Specifically, the Equity Policy and Process prohibits and addresses sexual misconduct, sexual assault, dating and domestic violence, stalking, and discrimination and/or harassment based on race, color, religion, gender, gender identity, transgendered status, national origin, age, disability, military or veteran status, sex, sexual orientation, genetic information, marital status, pregnancy, or any other characteristic protected by law (collectively referred to as “protected characteristics”). If you have concerns about a possible violation of the college’s Equity Policy, please contact Dr. Christopher Kandus-Fisher at ckandusfisher@berklee.edu. For additional information regarding the Unified Equity Policy and Process, please consult the Unified Equity Policy Website, which has the most up to date information and resources at www.berklee.edu/equity.

Course Description
Through this course, students gain a deep understanding of the role of data in the business of music, balancing theoretical concepts, illustrative case studies, and practical application. When used correctly, data about artists and music serves as an invaluable tool, allowing companies to measure performance accurately and understand the current market, informing decisions with real facts and figures, and providing insight into how existing processes may be made more efficient. Students learn how to implement a data strategy, including its benefits and risks, and come to understand how difficult it can be to attain accurate data. Students also learn how to represent data visually in ways that help with communication and understanding. This course is hands-on. Students apply data analysis, extract data, and perform queries.

Course Learning Outcomes
Upon completion of this course, students will be able to:

- select the appropriate methods, fundamentals, environments, and occasions to apply data analysis;
- write SQL (Structured Query Language) and Excel formulas in order to extract and analyze data;
- determine which types of questions it is possible to ask of the data available;
- apply data to the business of music from album releases to promotional strategies and touring;
- analyze statistical concepts;
- assess any available data set, its sources, and suggested application; and
- visually represent and communicate data

Course Materials
List all required course materials—books, scores, films, etc.

- *Naked Statistics: Stripping The Dread From The Data*
  Charles Wheelan
  Dona M. Wong
- A student account with Next Big Sound
List all recommended course materials—books, scores, films, etc.

Week 4: How We Gather Information: Collecting and Storing Data, Reading and Understanding Data Tables.

Week 5: Data-driven Research A&R: Different approaches and Limitations to Data-Driven Approaches to A&R
Week 6: Introduction to Programming Languages: Extracting Data with SQL, the Data Scientist's Toolkit: Python, R, and more, and Drawing Data with D3.js

Week 7: Getting Hands On With SQL – Extracting Data

Week 8: Manipulating Data with SQL: Understanding the opportunities and limitations of performing analysis with SQL. Identifying when a data set needs cleaning.

Week 9: Tour Planning with Data: Plotting a Proposed Tour Route based on Geographical Audience Data. Understanding possible limitations to a data-driven approach to tour planning.

Week 10: Show, Don't Tell - Data Visualization and Information Graphics: Constructing data visualizations, understanding the difference between interactive and static graphs.

Week 11: Marketing and Promotion with Data: How a proposed promotional strategy can be substantiated by data. Proposing a case for WIndowing, social media marketing and measurement.

Week 12: Indexes and Benchmarks: Setting New Standards for the Industry
Course Description
In this course, students explore music business finance as three digestible components: (1) determining and understanding financial calculations, both focused on the music industry in particular, as well as used more broadly across industries; (2) money, markets, and the music business; and (3) funding music. Students learn how to access money, take advantage of micro-finance opportunities, and apply financial tools to assess the financial health of an enterprise. Students explore capital markets, startups, stocks and IPOs, cash flow, balance sheets, price elasticity, and exit strategies. Students also examine nontraditional forms of music funding, such as venture capital and crowdfunding opportunities like Kickstarter and PledgeMusic. Additionally, students learn about bonds, grants, business loans, financing in rounds, and more.

Course Learning Outcomes
Upon completion of this course, students will be able to:

- define equity in a music enterprise;
- evaluate profit and loss statements;
- prepare a pitch for venture capitalists;
- plan entrepreneurial exit strategies;
- assess the role of venture capital for music entrepreneurs;
- assess the cash flow dynamics of music startups and evaluate a company’s cash flow statement;
- assess government funding and non-profit grants;
- leverage the loan market for a music business;
- analyze stock indicators to track publicly-traded music companies;
- apply best practices and budgeting in crowdfunding;
- apply bonds to the music business; and
- apply the methodology of price elasticity to music goods.

Program Director: John Kellogg, Esq.

Course Description
In this course, students analyze the most important legal issues in the contemporary music industry, including how these issues began, how they have evolved, and where they are headed. Students explore copyright law, including fair use and public domain, and how it affects sampling, interpolation, and mashups. Students also examine contracts related to songwriting, 360 deals, revenue sharing, and more, in addition to legal documents related to bands, booking, and touring. Students explore contemporary and new means of creating and disseminating music, including streaming audio and video, as well as augmented and virtual reality; and they explore the associated legal implications. By the end of the course, students will gain the analytical skills needed to evaluate a broad range of issues and assess competing sides in order to negotiate and author contracts.

Course Learning Outcomes
Upon completion of this course, students will be able to:

- evaluate legal issues related to bands, including the role of the manager, what constitutes fair and equitable agreements between artist and managers, responsibilities of departing and remaining band members, and the importance of the band unit and band name;
- evaluate concert riders and contracts, in addition to the legal responsibilities of venue owners and managers;
- evaluate opportunities to resolve conflicts, including summary judgment, mediation, and arbitration
- author favorable conditions for any side in a negotiation involving aspects of the music and entertainment industry;
- analyze legal issues in a broad range of areas connected to the music and entertainment industry, including songwriting, recording, touring, distribution, and technology;
- analyze legal issues that pertain to streaming audio and video, in addition to new technologies such as virtual and augmented reality; and
- assess various songwriting and publishing conditions, terms, durations, compensation, duties, responsibilities, and contracts.

Prerequisite Knowledge
In order to complete the work required for this course, students should be familiar with and have
an understanding of intellectual property, copyright law, music publishing, and music licensing.

Course Materials
List all required course materials—books, scores, films, etc.

N/A. All reading examples will be provided and contained within each week’s lessons and assignments.

List all recommended course materials—books, scores, films, etc.

Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.

A- (90-92)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.

B+ (87-89)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Some errors are present, but infrequent and generally minor.

B (83-86)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. However, additional concentration could produce a higher level of achievement.

B- (80-82)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Additional practice could produce a much more refined and consistent level of achievement.

C+ (77-79)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear to be of a larger magnitude in select assignments.

C (73-76)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear in at least half all assigned material.

C- (70-72)
The student has demonstrated a basic level of achievement. The student appears to have a basic level of understanding of the course objectives and the methodology associated with each task. Few assignments are without problems.

D (60-69)
The student has demonstrated a below average/basic level of achievement. The student
appears to have a below average/basic level of understanding of the course objectives and the methodology associated with each task. Most assignments contain flaws.

F (0-59)
The students appear to be unaware of the most basic understandings. The student does not understand the course objectives and the methodology associated with each task. Most assignments contain severe flaws.

Policy for Submitting Late Assignments: Late assignments will be accepted only for reduced credit and at the discretion of the instructor.

Academic Honesty
Berklee College of Music insists on academic honesty. Unless the assignment explicitly is a group project, all of the work in this class must be your own. The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

http://owl.english.purdue.edu/
www.wisc.edu/writing/Handbook/Documentation.html
http://lib.nmsu.edu/instruction/evalcrit.html

Attendance/Participation
Attendance/participation is required in all classes, private instruction, instrumental labs, and ensembles, beginning with the first scheduled meeting. This includes virtual meetings and appropriate participation in online courses. The faculty member may also provide more specific information on attendance/participation policies.

Diversity Statement
Material and activities in this course support a commitment to understanding diverse cultures and learning styles and abilities. This is accomplished through the use of repertoire from a variety of cultures and through the use of multimodal learning activities.

Equity Statement
Berklee College of Music is a diverse community composed of individuals with different life experiences, viewpoints, belief systems, and identities. A welcoming and inclusive culture is essential to maintaining the college’s role as a leader in music education and Berklee highly values the dynamic environment that results when students, faculty, administrators, and staff
from diverse backgrounds come together to learn, live, and work. Specifically, the Equity Policy and Process prohibits and addresses sexual misconduct, sexual assault, dating and domestic violence, stalking, and discrimination and/or harassment based on race, color, religion, gender, gender identity, transgendered status, national origin, age, disability, military or veteran status, sex, sexual orientation, genetic information, marital status, pregnancy, or any other characteristic protected by law (collectively referred to as “protected characteristics”). If you have concerns about a possible violation of the college’s Equity Policy, please contact Dr. Christopher Kandus-Fisher at ckandusfisher@berklee.edu. For additional information regarding the Unified Equity Policy and Process, please consult the Unified Equity Policy Website, which has the most up to date information and resources at www.berklee.edu/equity.

**Disclosure of Disability**

Students with documented physical, learning, and/or psychological disabilities that qualify under the Americans with Disabilities Act are offered assistance in obtaining necessary accommodations to support a successful experience at Berklee. Students requesting accommodations must initiate and maintain ongoing contact with a Disability Services staff member in the Counseling and Advising Center. Disability Services staff can assist with academic planning, scheduling adjustments, and support, as well as referral to outside agencies, testing sites, and support groups. All accommodation requests must be made with a two-week minimum notice to faculty. Disability Services staff are available in the Counseling and Advising Center by appointment. For more information visit: http://www.berklee.edu/counseling/specialservices.html or the greeting counter in the CAC located in the 939 Boylston St building (enter through the Uchida Building, 921 Boylston St., 3rd floor), or call 617-747-2310.

**Berklee Definition of a Credit Hour**

For lecture and discussion courses, students earn one course credit for every class contact hour—one credit for one hour of class meeting time each week. For lecture and discussion courses at the graduate level, the expectation is that one hour of class time requires at least three hours of out of class study. For ensemble and lab work, where repetition, practice, and iterative learning are key, students earn one hour of credit for every 30 hours of in-class time, or one credit for two contact hours each week. Private instruction is delivered as a 3-credit, 1-hour per week course for graduate students. Private instruction requires significant weekly expectations regarding practice time and study outside of class. Virtual equivalents of these requirements apply to online courses.

**Course Outline**

List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

- **Week 1:** The U.S. Court System and Law
- **Week 2:** Intellectual Property, Copyright
- **Week 3:** Intellectual Property – Sampling, Replay/Interpolation, Mashups
- **Week 4:** Songwriting, Publishing, Co-Writing, Single-Song Contracts
Week 5: Band Agreements, Band Names, and Stage Names
Week 6: Trademarks, Unfair Competition, Adverts, ROP
Week 7: Music Managers, Business Managers, Agents, Attorneys
Week 8: Live Music, Touring, Concert Riders
Week 9: Record Contracts (including 360, Revenue Sharing, and Traditional Deduction-filled)
Week 10: Downloads, Streaming Audio, Streaming Video
Week 11: Music and Visual; Sync, Hollywood, Treatments, Ideas, Credits, and Compensation
Week 12: Social Media, First Amendment, Augmented & Virtual Reality and New Legal Issues in Music Business Law
Course Description
This course provides an in-depth exploration of the strategy behind effective artist management. Through case-study analysis, students learn the key ingredients for successful artist management/artist relationships, in addition to approaches for growing and sustaining artists' careers. Underpinning this work is effective brand management and the development of the artists and their fan bases. Students learn how and when to build out artists' teams and how to leverage financing opportunities, such as crowdfunding, to jumpstart new projects. It is exceedingly rare that artists have a single income stream, so artist managers must be versed in all aspects of the industry to exploit opportunities that align with their artists' goals. The course positions students to identify and leverage potential opportunities, while nurturing industry relationships and negotiating the most favorable outcomes for artists.

Course Learning Outcomes
Upon completion of this course, students will be able to:
● create innovative, multi-dimensional plans to increase the chances of success for the artists with whom they work;
● evaluate important contractual and financial documents required in artist management and help negotiate the most favorable outcomes for artists;
● devise strategies for financing and making connections that support artists' sustainability;
● execute effective strategies for brand management and cultivating fan bases;
● leverage opportunities in touring, recording, licensing, merchandising, and sponsorships that align with artists' goals; and
● build an effective team that coordinates and supports artists' careers.

Prerequisite Knowledge
Students should understand the basic techniques involved in recording, editing, and mixing supported by their DAW of choice.

Course Materials
List all required course materials—books, scores, films, etc.
● They Call Me Supermensch by Shep Gordon

Private instruction requires significant weekly expectations regarding practice time and study outside of class. Virtual equivalents of these requirements apply to online courses.

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1: What is Artist Management?

Week 2: Getting Down to Business: setting up business, contract versus no contract, protecting the artist’s work, assembling a team.

Week 3: Making the Music: deciding which direction to take an album, recording budgets, the various team members involved in completing a project, licensing instrumentals
Week 4: Signing a Record Deal and Working with the Label: indies versus majors, record deal points, the attorney’s role, day to day dealings with the label.

Week 5: Imaging the Band: the importance of image, merchandise, videos, social media.

Week 6: Touring, Part 1: Booking agents, determining where to play, booking shows, tour packaging, tour budgets.

Week 7: Touring, Part 2: Tour personnel, itineraries, books, and day sheets, the importance of ticket sales, promoters, day of show.

Week 8: Building (and maintaining) the Fan Base

Week 9: Selling the Artist: crafting the story, positioning the artist, creating demand, showcases and special events, promotional campaigns.

Week 10: Where the Money is: publishing deals, royalties, crowdfunding, publishing and book advances, sponsorships, and working with the business manager.

Week 11: Working with the Artist: the artist-manager relationship, managing expectations, intra-band dynamics, coaching artists, how to cope with changes.

Week 12: Profiles of Artist Managers
Berklee College of Music  
Master of Arts in Music Business  
OMBUS-690  
Research Methods/Proposal Development for the Culminating Experience  
3 credits

Instructor’s Name: Camille Colatosti, PhD  
E-mail: ccolatosti@berklee.edu  
Phone:  
Office Location 155 Mass. Ave, 302, Boston campus  
Office Hours  
Course Website: online.berklee.edu  
Program Director: John Kellogg, Esq.

Course Description  
All Master of Arts in Music Business students complete a culminating experience or thesis project. This experience is meant to be exactly as named: the culmination of a student’s work in the program, the experience through which students synthesize all they have learned. The culminating experience helps to shape students’ next steps in the profession and in their career. In short, the culminating experience provides an opportunity for students to complete unique and original professional work. Through the culminating experience, students make a creative contribution to and/or define and solve a problem that exists in the profession. This contribution may take the form of a research project, a creative project, a practical project, and/or another project of the student’s devising. Regardless of the form that the culminating experience takes—whether creative, research-focused, or practical in nature—the culminating experience represents the highest expression of students’ learning at the graduate level.

Students begin this experience with a written proposal. This course supports and guides students through the process of developing this proposal. The proposal describes students’ intentions regarding the culminating experience, discussing the form the project will take as well as the scope of work. Students also develop a plan of action and timeline, as well as identify the resources needed. They also explore some of the differences between independent research and learning and course work. Additionally, students learn methods for conducting the research needed to realize their projects. Students learn how to frame and evaluate inquiries using quantitative, qualitative, and mixed research methods; they learn about different research methodologies, including interviews, observational methods, surveys, reflexive methods, case studies, analytical methods, and more. And they learn how to select the methodologies most useful to their line of inquiry. Students also learn about the responsibilities, ethics, and values of research, and ways to use research to draw conclusions. They learn which research requires additional ethical approvals, such as from Berklee’s Institutional Review Board. As well, students learn the appropriate formats and styles for their research to follow and learn how to submit their culminating experience to Berklee’s archives.
Course Learning Outcomes
Upon completion of this course, students will be able to:

- write their culminating experience proposal in the format and style appropriate for their project and submit the proposal for approval;
- determine the scope of work they will master in their culminating experience;
- develop a plan of action and timeline for the culminating experience, as well as identify and develop a plan to attain resources needed;
- evaluate statistical approaches and results;
- evaluate the credibility and ethics of research conclusions;
- synthesize appropriate data analysis strategies;
- determine which types of research require additional ethical approvals, such as from an Institutional Review Board, and gain familiarity with that application process;
- compare and evaluate research genres and approaches, including interviews, observational methods, surveys, reflexive methods, case studies, analytical methods, and more; and
- understand the process and requirements for culminating experience submission to the Berklee archives.

Course Outline

Week 1
Lesson: Preparing for the Culminating Experience/The Proposal Design

Week 2
Lesson: The Research Process/Determining a Topic

Week 3
Lesson: The Literature Review

Week 4
Lesson: Your data needs and project shape

Week 5
Lesson: Quantitative Research/Qualitative Research

Week 6
Lesson: More Research Approaches/Refining Your Topic-Purpose Statement

Week 7
Lesson: Interviews and Focus Groups/Survey and Questionnaire Research/Case Studies
Week 8
Lesson: Gathering, Understanding, and Reporting Data: Data Visualization

Week 9
Lesson: Research Ethics/Selecting the Committee

Week 10
Lesson: Selecting a design/writing the proposal (Continued)

Week 11
Lesson: Making decisions and completing the proposal

Week 12
Lesson: Presenting your proposal
Berklee College of Music
Master of Music - Music Production
OMPRD-525
Critical Analysis of Music Production Techniques
3 credits

Instructor’s Name: Mike Denneen
E-mail: mdenneen@berklee.edu
Phone: 
Course Website: online.berklee.edu
Program Director: Enrique Gonzalez Müller

Course Description
Improving the quality of your own music production projects necessitates strong listening skills. In much the same way that traveling to another country teaches you about yourself, listening to and analyzing other songs across genres opens you to different techniques and perspectives on how to achieve the best results for conveying the vision or emotional intent of a project and connecting with listeners. This course presents a framework and vocabulary for analyzing music that will support students’ work in the program, in addition to their professional career. Throughout the course, students dissect music for its use of various production techniques, including arrangement, instrumentation, performance, and mix considerations, with the underlying goal of strengthening their analytical abilities, increasing their versatility as producers, and enhancing the overall quality of their work.

Course Learning Outcomes
Upon completion of this course, students will be able to:
● evaluate musical, emotional, performance and arrangement techniques in top-charting music, in addition to music in diverse musical styles;
● analyze key vocal production techniques, such as doubling, layering, distressing, tuning, compression, echo, and reverb;
● perform high-level analysis of production elements used in songs across genres;
● apply a professional-level framework and vocabulary for analyzing music production techniques; and
● apply findings from analysis to enhance their own music projects.

Prerequisite Knowledge
Students should understand the basic techniques involved in recording, editing, and mixing supported by their DAW of choice.

Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.
A- (90-92)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.

B+ (87-89)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Some errors are present, but infrequent and generally minor.

B (83-86)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. However, additional concentration could produce a higher level of achievement.

B- (80-82)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Additional practice could produce a much more refined and consistent level of achievement.

C+ (77-79)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear to be of a larger magnitude in select assignments.

C (73-76)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear in at least half all assigned material.

C- (70-72)
The student has demonstrated a basic level of achievement. The student appears to have a basic level of understanding of the course objectives and the methodology associated with each task. Few assignments are without problems.

D (60-69)
The student has demonstrated a below average/basic level of achievement. The student appears to have a below average/basic level of understanding of the course objectives and the methodology associated with each task. Most assignments contain flaws.

F (0-59)
The students appear to be unaware of the most basic understandings. The student does not understand the course objectives and the methodology associated with each task. Most assignments contain severe flaws.

Policy for Submitting Late Assignments: Late assignments will be accepted only for reduced credit and at the discretion of the instructor.

Academic Honesty
Berklee College of Music insists on academic honesty. Unless the assignment explicitly is a group project, all of the work in this class must be your own. The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of
books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

http://owl.english.purdue.edu/
www.wisc.edu/writing/Handbook/Documentation.html
http://lib.nmsu.edu/instruction/evalcrit.html

Attendance/Participation
Attendance/participation is required in all classes, private instruction, instrumental labs, and ensembles, beginning with the first scheduled meeting. This includes virtual meetings and appropriate participation in online courses. The faculty member may also provide more specific information on attendance/participation policies.

Diversity Statement
Material and activities in this course support a commitment to understanding diverse cultures and learning styles and abilities. This is accomplished through the use of repertoire from a variety of cultures and through the use of multimodal learning activities.

Equity Statement
Berklee College of Music is a diverse community composed of individuals with different life experiences, viewpoints, belief systems, and identities. A welcoming and inclusive culture is essential to maintaining the college’s role as a leader in music education and Berklee highly values the dynamic environment that results when students, faculty, administrators, and staff from diverse backgrounds come together to learn, live, and work. Specifically, the Equity Policy and Process prohibits and addresses sexual misconduct, sexual assault, dating and domestic violence, stalking, and discrimination and/or harassment based on race, color, religion, gender, gender identity, transgendered status, national origin, age, disability, military or veteran status, sex, sexual orientation, genetic information, marital status, pregnancy, or any other characteristic protected by law (collectively referred to as “protected characteristics”). If you have concerns about a possible violation of the college’s Equity Policy, please contact Dr. Christopher Kandus-Fisher at ckandusfisher@berklee.edu. For additional information regarding the Unified Equity Policy and Process, please consult the Unified Equity Policy Website, which has the most up to date information and resources at www.berklee.edu/equity.

Disclosure of Disability
Students with documented physical, learning, and/or psychological disabilities that qualify under the Americans with Disabilities Act are offered assistance in obtaining necessary accommodations to support a successful experience at Berklee. Students requesting accommodations must initiate and maintain ongoing contact with a Disability Services staff member in the Counseling and Advising Center. Disability Services staff can assist with
academic planning, scheduling adjustments, and support, as well as referral to outside agencies, testing sites, and support groups. All accommodation requests must be made with a two-week minimum notice to faculty. Disability Services staff are available in the Counseling and Advising Center by appointment. For more information visit: http://www.berklee.edu/counseling/specialservices.html or the greeting counter in the CAC located in the 939 Boylston St building (enter through the Uchida Building, 921 Boylston St., 3rd floor), or call 617-747-2310.

Berklee Definition of a Credit Hour
For lecture and discussion courses, students earn one course credit for every class contact hour—one credit for one hour of class meeting time each week. For lecture and discussion courses at the graduate level, the expectation is that one hour of class time requires at least three hours of out of class study. For ensemble and lab work, where repetition, practice, and iterative learning are key, students earn one hour of credit for every 30 hours of in-class time, or one credit for two contact hours each week. Private instruction is delivered as a 3-credit, 1-hour per week course for graduate students. Private instruction requires significant weekly expectations regarding practice time and study outside of class. Virtual equivalents of these requirements apply to online courses.

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1: Maintaining focus on a track, balancing the elements of tension and release, repetition and variation, and expansion and contraction and understanding why a great track makes a listener want to listen again.

Week 2: Performance versus compositional production, authenticity, and the importance of limits.

Week 3: The importance of narrative, song structure versus elapsed time, engaging the listener, and following the song itself.

Week 4: Arrangement versus orchestration, the importance of differentiating sections, and the importance of restraint and focus in these contexts.

Week 5: Prosody and melodic discipline, sonic hooks, lyrical hooks, and the importance of the introduction.

Week 6: The four pillars of the professional mix and the role of each pillar.

Week 7: Elevating the chorus via the song and via production.

Week 8: Dimensions of recordings and the relationship to narrative, frequency distribution, width and panning, and ambience and depth.

Week 9: Enhancing intensity through technology, the element of surprise, the paradox of compression, distortion and perceived intensity, scene changes, hard edits, and bold mixing.
Week 10: The march of technology, the impact of technology on the “sound” of an era, timelessness versus trends, authenticity, and enhancing performance.

Week 11: The path from demo to master recording.

Week 12: Final project, does your track sound like a record? Analyzing the arrangement, analyzing the narrative, and analyzing the impact.

Course Website: online.berklee.edu
Program Director: Enrique Gonzalez Müller

Course Description
Creative Recording Techniques is a practical, in-depth study of essential and creative recording techniques as well as an exploration of advanced audio editing techniques and considerations. Students learn to maximize the emotional impact of recordings by focusing on the music-driven intersection of the technical and creative skills necessary to achieve professional sounding recordings in any setting, from professional recording environments to portable studios with minimal gear. Students learn core and creative editing techniques meant to expand, repair, and maximize the emotional potential of any recording. They also envision detailed aural objectives and expand their recording vocabulary and expertise in order to determine frequency, dynamic, spatial, ensemble, and arrangement choices in recordings. Students apply multi-microphone recording techniques as well as advanced DAW editing strategies.

Course Learning Outcomes
Upon completion of this course, students will be able to:
  ● record and edit impactful and commercially-competitive recordings within both collaborative and self-contained contexts;
  ● achieve professional standards of fidelity and musicality, in service of the project, by applying creative recording techniques;
  ● envision detailed aural objectives in order to determine crucial frequency, dynamic, spatial, ensemble, and arrangement choices in recordings;
  ● employ multi-microphone recording techniques; and
  ● apply advanced DAW editing techniques.

Prerequisite Knowledge
Students must have an intermediate level of recording and editing skills as well as a good grasp of musical and arrangement foundations from which to build their recordings upon.

Course Materials
Modern Recording Techniques (Audio Engineering Society Presents) 8th Edition by David Miles Huber (Author), Robert E. Runstein (Author)

Technology and Other Resources
  ● A professional DAW (Pro Tools, Logic, etc.)
  ● A high quality audio interface, with a minimum of 8 inputs
- A minimum of 5 microphones: 2 dynamics, 1 match-pair of condensers and 1 ribbon
- A MIDI controller
- A professional pair of speakers
- A professional pair of headphones

Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.
A- (90-92)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1: Philosophy and Review: Recording – Purpose, Definitions, and Important Considerations, The Human Microphone - The Limits of Our Hearing, and An Engineer’s First Questions – What Are We Recording? What is the Emotional Objective?

Week 2: Listening Environment and Recording Drums: Calibrating our Ears and Listening Environment – A Practical Approach, The Paramount Importance of a Reference Mix, Workflow efficiency in the DAW (part I) – Importing Reference Mixes and Preparation for Recording, and Recording Level and Gain Staging

Week 3: Producing Drum Tracks: Tuning, Drum/Cymbal Choice and Performance Considerations, Drum Editing

Week 4: Percussion and Loops: What Are We Recording? / What is the Emotional Objective? / Anticipating Symbiotic Issues, Mic Choice Considerations (Dynamics, Condensers and
Ribbons), and Percussion Editing

Week 5: Bass and Other Low Frequency Instruments: DI or Amps or Both?, Upright Bass, and Other Low Frequency Instruments

Week 6: Guitars: Electric Guitars, Acoustic Guitars, Guitar Editing

Week 7: Keyboards – Hardware, Software and Acoustic: Electric Pianos and Hardware Synthesizers, Acoustic Pianos, Software Synthesizers, and Keyboard Editing

Week 8: Horns and Miscellaneous Instruments: Exploring Different Textures, Vocals: Lead, Vocal Editing, Pt. 1

Week 10: Recording and Editing Miscellaneous: Recording Special Effects, Recording with Varispeed, ReAmping Interesting Spaces, and Editing Special Effects

Week 11: Emotional and Technical Check-In During the Final Stages of Production: Technical and Emotional Considerations, Preparing the Final Recording for Mixing and Mastering, Open Forum

Week 12: Final Project Delivery and Course Review: Review and Synthesis of the Topics Covered in the Course, Discussion of the Topics Covered in the Course and Areas of Improvement, and Final course Reflections and Considerations
Course Description
In this course, students enhance skills necessary to create vocal-focused recordings that are contemporary and commercially viable. Students explore the voice as an instrument, one that is naturally expressive and harmonically complex, and that can be technologically-processed. They also examine the voice as a commercially connective instrument in modern music. Students learn to master the production of commercially viable vocal performances for a contemporary client base. They also master microphone placement for various types of vocalists, choirs, and backing vocals; analyze the use of phase, panorama, delay, reverb, and vocal modulation in contemporary music compositions; and apply Auto-Tune, Melodyne, and the vocoder effectively to edit vocal recordings in production. Students develop and implement strategies that enhance vocal performances using natural and artificial techniques and processing.

Course Learning Outcomes
Upon completion of this course, students will be able to:

- evaluate the connectivity and commercial viability of vocal performances;
- develop and implement strategies that enhance vocal performances using natural and artificial techniques and processing;
- analyze the use of phase, panorama, delay, reverb, and vocal modulation in contemporary music compositions;
- apply the most effective microphone placements for recording various types of vocalists, choirs, and backing vocals; and
- apply Auto-Tune, Melodyne, and the vocoder effectively to edit vocal recordings in production.

Prerequisite Knowledge
In order to complete the work required for this course, students must have a functioning knowledge of recording and editing with a Digital Audio Workstation.

Course Materials
List all required course materials—books, scores, films, etc.
The following software will be required for successful completion of this course:

- A commercially viable DAW, such as Pro Tools, Logic, Cubase, etc.
- Antares Auto-Tune
- Celemony
Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.

**Course Outline**
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment

- **Week 1:** The Lead Vocalist: Male and Female Vocal Types, Ranges, and Registers
- **Week 2:** Recording the Lead Vocalist: The Recording Environment, the Microphone and Microphone Pre-Amplifiers, Compressors, Equalization and Time Based Effects
- **Week 3:** Two Lead Vocalists in the Same Composition: Unison and Octave techniques for Vocal Duos and Harmonic Techniques for Vocal Duos
- **Week 4:** Recording Two Lead Vocalists: Various recording techniques to capture two lead vocalists and overdubbing and editing with a pair of vocalists
- **Week 5:** Recording and Mixing Background Vocals: Double, Triple and Quadruple Stacking, Choir, and Background Routing and Processing Multiple Tracks of Recorded Vocals
- **Week 6:** Vocal Performance: Pitch, Timing, and Emotion

Week 8: Time Compression and Expansion: Transient Slicing, Grid Slicing and Rhythmic Time Compression and Expansion, Polyphonic and Monophonic Time Compression and Expansion, Varispeed, Speed and Re-Pitch, and Vocalign and conforming the timing of multiple vocals.

Week 10: Vocal and Ad-libs by Song Section: Introduction and Verses, Pre-Chorus and Chorus, the Bridge, and the Outro.

Week 12: A Final Song: The evolving structure of melody and song form in contemporary music compositions, the evolving structure of harmony in contemporary music compositions, The influence of rap on contemporary melodic and harmonic contemporary music compositions, and the future of the human voice in contemporary music compositions.
Instructor’s Name: Susan Rogers
E-mail: srogers@berklee.edu

Course Website: online.berklee.edu
Program Director: Enrique Gonzalez Müller

Course Description
This course examines human auditory processing from the eardrum to the auditory cortex. Students learn how speech and music signals are transformed from physical activity in the environment, to sensations in the cochlea, to psychological perceptions in the brain. Students explore the relationship between a sound and its perception in terms of the underlying mechanisms and limitations of our hearing system. Students also analyze the auditory system and pathways, spatial localization, critical bands and masking, temporal resolution, pitch, timbre, and loudness perception, auditory scene analysis, speech and music perception, and noise induced hearing loss. Throughout the course, students learn practical applications for how this information serves the audio arts, especially engineering and mixing.

Course Learning Outcomes
Upon completion of this course, students will be able to:

● synthesize learnings about the human auditory system to understand why people hear what they hear;
● evaluate research in psychoacoustics;
● illustrate how the brain processes pitch, loudness, timbre, and timing;
● apply learning about the human auditory system to enhance production and engineering projects;
● explain the hearing and auditory nervous system, in addition to the physics of sound;
● explain the process by which the human auditory system organizes sound into meaningful elements; and
● explain the origin and consequences of noise induced hearing loss.

Prerequisite Knowledge
Students will need basic knowledge of audio terminology and technology, e.g., sound waves, the decibel, acoustic principles. Students must have basic math skills, including a grasp of logarithms and simple equations. An understanding of the scientific method and research norms is helpful, but not required.

Course Materials
List all recommended course materials—books, scores, films, etc.
N/A

Grading Criteria
A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.

The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

http://owl.english.purdue.edu/
www.wisc.edu/writing/Handbook/Documentation.html
http://lib.nmsu.edu/instruction/evalcrit.html

**Attendance/Participation**

Attendance/participation is required in all classes, private instruction, instrumental labs, and ensembles, beginning with the first scheduled meeting. This includes virtual meetings and appropriate participation in online courses. The faculty member may also provide more specific information on attendance/participation policies.

**Diversity Statement**

Material and activities in this course support a commitment to understanding diverse cultures and learning styles and abilities. This is accomplished through the use of repertoire from a variety of cultures and through the use of multimodal learning activities.

**Equity Statement**

Berklee College of Music is a diverse community composed of individuals with different life experiences, viewpoints, belief systems, and identities. A welcoming and inclusive culture is essential to maintaining the college’s role as a leader in music education and Berklee highly values the dynamic environment that results when students, faculty, administrators, and staff from diverse backgrounds come together to learn, live, and work. Specifically, the Equity Policy and Process prohibits and addresses sexual misconduct, sexual assault, dating and domestic violence, stalking, and discrimination and/or harassment based on race, color, religion, gender, gender identity, transgendered status, national origin, age, disability, military or veteran status, sex, sexual orientation, genetic information, marital status, pregnancy, or any other characteristic protected by law (collectively referred to as “protected characteristics”). If you have concerns about a possible violation of the college’s Equity Policy, please contact Dr. Christopher Kandus-Fisher at ckandusfisher@berklee.edu. For additional information regarding
the Unified Equity Policy and Process, please consult the Unified Equity Policy Website, which has the most up to date information and resources at www.berklee.edu/equity.

Disclosure of Disability
Students with documented physical, learning, and/or psychological disabilities that qualify under the Americans with Disabilities Act are offered assistance in obtaining necessary accommodations to support a successful experience at Berklee. Students requesting accommodations must initiate and maintain ongoing contact with a Disability Services staff member in the Counseling and Advising Center. Disability Services staff can assist with academic planning, scheduling adjustments, and support, as well as referral to outside agencies, testing sites, and support groups. All accommodation requests must be made with a two-week minimum notice to faculty. Disability Services staff are available in the Counseling and Advising Center by appointment. For more information visit: http://www.berklee.edu/counseling/specialservices.html or the greeting counter in the CAC located in the 939 Boylston St building (enter through the Uchida Building, 921 Boylston St., 3rd floor), or call 617-747-2310.

Berklee Definition of a Credit Hour
For lecture and discussion courses, students earn one course credit for every class contact hour—one credit for one hour of class meeting time each week. For lecture and discussion courses at the graduate level, the expectation is that one hour of class time requires at least three hours of out of class study. For ensemble and lab work, where repetition, practice, and iterative learning are key, students earn one hour of credit for every 30 hours of in-class time, or one credit for two contact hours each week. Private instruction is delivered as a 3-credit, 1-hour per week course for graduate students. Private instruction requires significant weekly expectations regarding practice time and study outside of class. Virtual equivalents of these requirements apply to online courses.

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 2: Physics of Sound and Signal Detection Theory: Measuring Auditory Activity in the Brain, Sound Detection and Discrimination, the Physics of Sound, and The Harmonic Series and Effect of Spectrum on Timbre

Week 3: Critical Bands, Tuning Curves, and Masking: Tonotopicity and Traveling Waves, Auditory Filters and Critical Bandwidth, and Sensory Dissonance

Week 4: Binaural Listening and Spatial Localization: Measuring Spatial Localization and Interaural Time and Phase Differences

Week 6: Loudness Perception: Relating a Logarithmic Auditory System to Linear Numbers, Equal Loudness Contours, and Temporary Threshold Shifts

Week 8: Temporal Processing: Auditory Memory and Beat Perception and Synchronicity

Week 10: Noise Induced Hearing Loss: The Loudness Wars, Noise Exposure and Hearing Damage, Natural Aging and Hearing Loss, and Tinnitus and Hyperacusis

Week 11: Speech and Music Perception: The Human Voice Mechanism and the Musician’s Brain

Instructor’s Name: Richard Mendelson

Course Website: online.berklee.edu
Program Director: Enrique Gonzalez Müller

Course Description
Advanced Mixing Techniques is a next-generation music mixing course for students to take their mixing skillsets to the highest level. In addition to an in-depth exploration of traditional mixing topics such as balance, EQ, dynamics, spatial effects, and automation, students explore pitch and time correction and mixing for relevant digital streaming services. Throughout the course, students mix twelve provided recordings in a variety of Billboard chart-related styles, including R&B/hip-hop, pop, electronic/dance, country, rock, and emerging artists. This work requires students to organize, implement, and execute large multi-track mixes in a DAW mixdown environment, in addition to executing technically and creatively advanced mixing techniques and preparing mixes for contemporary streaming formats.

Course Learning Outcomes
Upon completion of this course, students will be able to:

● organize, implement, and execute large multi-track mixes in a DAW mixdown environment;
● execute technically and creatively advanced mixing techniques;
● mix for contemporary streaming formats;
● execute advanced mixing techniques, such as pitch and time correction; and
● produce a professional mix across a number of popular musical genres.

Course Materials

● Students should possess a fast computer and storage capacity capable of supporting large multi-track DAW sessions with up to 100 tracks of playback, an audio interface, speaker/monitors and headphones.
● One of the following DAWs is recommended: Pro Tools, Logic, Digital Performer, Live, Cubase, or Nuendo.
● Plug Ins Required:
  ○ One year subscription to Slate Everything Bundle
  ○ Soundtoys Bundle
  ○ Izotope Music Production Bundle
  ○ Trigger 2 Drum Replacement
  ○ Magic A/B
● Plug Ins Recommended:
  ○ Melodyne and/or Auto Tune
Grading Criteria

A (93-100)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. A high level of understanding is regularly displayed, and errors are seldom present in any assignments.

A- (90-92)
The student has demonstrated superior achievement. The student appears to have a superior level of understanding of the course objectives and the methodology associated with each task. However, some errors are present in select assignments.

B+ (87-89)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Some errors are present, but infrequent and generally minor.

B (83-86)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. However, additional concentration could produce a higher level of achievement.

B- (80-82)
The student has demonstrated advanced achievement. The student appears to have an advanced level of understanding of the course objectives and the methodology associated with each task. Additional practice could produce a much more refined and consistent level of achievement.

C+ (77-79)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear to be of a larger magnitude in select assignments.

C (73-76)
The student has demonstrated average achievement. The student appears to have an average level of understanding of the course objectives and the methodology associated with each task. Errors appear in at least half all assigned material.

C- (70-72)
The student has demonstrated a basic level of achievement. The student appears to have a basic level of understanding of the course objectives and the methodology associated with each task. Few assignments are without problems.

D (60-69)
The student has demonstrated a below average/basic level of achievement. The student appears to have a below average/basic level of understanding of the course objectives and the methodology associated with each task. Most assignments contain flaws.

F (0-59)
The students appear to be unaware of the most basic understandings. The student does not understand the course objectives and the methodology associated with each task. Most assignments contain severe flaws.

Policy for Submitting Late Assignments: Late assignments will be accepted only for reduced credit and at the discretion of the instructor.
Academic Honesty
Berklee College of Music insists on academic honesty. Unless the assignment explicitly is a group project, all of the work in this class must be your own. The source of all information in any written assignment must be cited properly, whether it is a quotation, paraphrase, summary, idea, concept, statistic, picture, or anything else you get from any source other than your own immediate knowledge—including the Internet. Writers give credit through accepted documentation styles, including parenthetical citation, footnotes, or endnotes; a simple listing of books and articles at the end of an essay is not sufficient. Plagiarism—not giving proper credit to a source and thereby passing off someone else’s material or idea as your own—is a type of intellectual theft and deceit and cannot be tolerated in an academic setting. Plagiarism may result in a failing grade for the assignment or course, and possible dismissal from the College. It is your responsibility to be aware of and abide by the rules governing plagiarism, fraud, and cheating found in the Policy Handbook for Students under the section "Honesty in Academic Work and in Scholarly and Professional Practice." If you have any questions about what plagiarism is and how to avoid it, please talk with a reference librarian, ask a teacher, or refer to a writing handbook. Websites that discuss types of plagiarism and how it can be avoided through evaluation and proper documentation of sources include:

Course Outline
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1 - Foundational Principles for Mixing: Organizing for a Successful Mix, Balancing the Elements of a Mix, Panning the Elements of a Mix, and Creative Equalization.

Week 2 - Spatial Effects and Imaging for Depth and Width: Historical Perspectives on the use of Reverb in Mixing, Delay Effects within a Mix, Pitch-based Effects, Image Widening and Mid/side Processing, and Advanced Signal Routing.

Week 3 - Dynamics Processing: Compression and Limiting, Gain Staging, Metering and Level Standards, and Peak Limiting and Competitive Level.

Week 4: Creative Application of Automation in Mixing: A Brief History of Automation in Mixing, DAW Automation (Real Time,Playlist and Snapshot), Control Surfaces, and Tips, tricks and Demonstrations of cool Automation Techniques.

Week 7: Mix Translation, from Large Monitors to Laptops and Back: Low Frequency Mix Translation Problems and Solutions, Midrange Treatments and Translation in Mixing, High Frequency Treatments and Translation in Mixing, and Mixing for Ear buds, Laptops, and Computer Speakers.

Week 8: Mixing Keyboards, Guitars, Strings, Horns, and Multiple Bus Mixing: Piano, Organ and Synthesizer-Related Mixing Techniques, Mixing Acoustic and Electric Stringed Instruments, Mixing Strings and Horns, and Multi-bus Mixing.

Week 9: Vocal Mixing Techniques: Editing Vocals, Lead Vocal Balancing, Panning, EQ, and Dynamics Control, Creating a Unique and Compelling Vocal Sound, Mixing Background Vocals, Doubles, and Harmonies.

Week 10: Mixing through an Analog Console using Outboard Gear: Info and Demonstrations of Various Analog Consoles, Info and Demonstrations of Analog EQ's, Compressors and Channel Strips, and Info and Demonstrations of a Wide Range of Outboard Reverbs and Delays.

Week 12: Conversations with the Masters: Miles Walker, Richard Furch, and Chuck Ainlav. Continuing your Evolution as a Mixer.
Berklee College of Music
Master of Music - Music Production
OMPRD-677
Audio Production for Visual Media
3 credits

Instructor’s Name: John Whynot
E-mail: jwhynot@berklee.edu
Phone: 
Course Website: online.berklee.edu
Program Director: Enrique Gonzalez Müller

Course Description
Audio Production for Visual Media is an in-depth exploration of the tools, techniques, workflows, and creative considerations in producing audio for film, television, and related media. Students explore the history of film as a medium, through the development of technology for synchronizing audio to moving picture, to modern-day practices in audio post-production. Students explore the process and technique of creating sound for picture. They gather, craft, edit, and mix sound effects, backgrounds, and Foley that would be applied to visual media. They prepare for and explore techniques for managing a large ensemble recording session for recording score. They learn the process of submitting audio stems to the final mix, and they learn the final mix itself. Students also create a film clip with their own custom-created soundtrack as they hone their skills in audio post-production and work through an authentic, real-world post production process.

Course Learning Outcomes
Upon completion of this course, students will be able to:
● create sound for picture, applying audio post-production skills;
● gather, craft, edit, and mix sound effects, backgrounds, and Foley;
● prepare for and explore techniques for managing a large ensemble recording session for recording score;
● prepare a film mix “pre-dub,” submit audio stems to the final mix, and complete the final mix, itself; and
● create a film clip with their own custom-created soundtrack using the techniques presented throughout the course.

Prerequisite Knowledge
In order to complete the work required for this course, students should have:
● Graduate level skill and understanding of audio production and engineering
● Advanced facility of AVID’s Pro Tools

Course Materials
● Dialog Editing for Motion Pictures: A Guide to the Invisible Art (2nd edition)
  John Purcell (2014 Focal Press)
List all recommended course materials—books, scores, films, etc.

**Course Outline**
List a detailed week by week outline. List topics for the week, as well as required readings, music, assignments, and assessment.

Week 1: Storytelling with Sound: The Anatomy of a Soundtrack

Week 2: Actors Talking! Audio for Film History Lesson: Benefits of Driving Technology Forward, Replacing Production Dialog (ADR)

Week 3: Scrubbing, Cleaning, and Fixing: Exploring the tools that exist for improving, enhancing, and cleaning up dialog tracks. Understanding RX, the “magic bullet.”

Week 4: Environments & Backgrounds. Creating the static “reality” in which the action unfolds on screen.

Week 5: Faking Reality: An Introduction to Foley

Week 6: Finding Reality: Sound Libraries & Collections

Week 7: The World in Tune: Finding Sounds in the Wild
Week 8: Warping, Mangling, and Building Sound: Techniques for utilizing plugins to attain creative variations in sound.

Week 9: The Score Mock-up and Road to Completion: Preparing and conducting the scoring session.

Week 10: How to Mix Film Music: Identifying the components of a score that should be separated, developing a mixing perspective for film music, using 5.1 and wider formats in score mixing, and delivering the score to the final mix.

Week 11: Receiving Audio/Video, Delivering Audio/Video, and Understanding Your Place in the Production Line.

Week 12: Delivery to the Final Dub and Finishing the Project: The Process of Final Mixing for a Film.

CHARLES ALEXANDER CV
professionally known as
“Prince Charles” Alexander

EMPLOYMENT

Professor
Berklee College of Music, Boston, Mass. ’14-Present
(Faculty Advisor for the Commercial Record Production minor curriculum within the Music Production and Engineering Department)
(Berklee Faculty Union Grievance Officer)
(Music Technology and Entrepreneurship Lecturer at the Berklee College of Music Media Center)

Professor
Berklee Online, Boston Mass. ’07-Present
(Co-Creator: Vocal Production)
(Instructor: Critical Listening, Music Production, Vocal Production)

Associate Professor
Berklee College of Music, Boston, Mass. ’06-‘14
(Creator and Faculty Advisor for the Commercial Record Production minor within the Music Production and Engineering Department)
(Berklee Faculty Union Grievance Officer)
(Music Technology and Entrepreneurship Lecturer at the Berklee College of Music Media Center)

Adjunct Instructor
NYU Dept. of Recorded Music ‘05-‘14
(Designer of Music Production classes)

Instructor
Institute of Audio Research ‘01/06-‘08/06

Sole Proprietor
(Music Production Services/Audio Engineering Services/Musician Services/Songwriter Services employing a staff of 5-7)

Record Producer/ Audio Engineer, RVI-Daiichi Kosho, NY ’88 – ‘90
(Produced, Recorded and Mixed music for Karaoke
distribution worldwide/employed a roster of more than
100 musicians)

Audio Engineer

Ass't Audio Engineer/Studio Manager and Booking
   Sound Ideas, New York, NY. ‘86-’87.

Recording Artist/Musician/Music Producer
   Prince Charles and the City Beat Band

Telemarketing Account Representative
   Ziff Davis Publications, New York, NY. ‘81-’85

EDUCATIONAL AWARDS

Don Wilkins Excellence in Curriculum Development Award
   for the design of the Commercial Record Production minor
   within the MP&E major at Berklee College of Music

President’s Office of Education Outreach Recognition Award
   for significant contributions to the Berklee and Boston
   communities as an educator

Berklee Urban Service Award from the Berklee Office of
   Community Affairs and Campus Engagement for work as an
   outstanding Faculty Volunteer

INDUSTRY AWARDS

• Accounting & Finance (2012)

APPOINTMENTS:
MUSIC MAKER PUBLICATIONS INC., Boulder CO,
Music & Economics, Founder & Editor, since January 1996, of Músico Pro
Honorary Associate Editor (in absentia) since 2000
Monthly ad-based music trade selling in US, Latin America, and Spain; circulation, 50K. I started its predecessor
Recording en Español in 1992. In addition to my editorial duties, I was responsible early on for dealing directly
with our Latin American and Spanish representatives abroad

BERKLEE COLLEGE OF MUSIC, BOSTON
Founder & Executive Director, The Music Business Journal, since 2005
This student publication serves as a forum for discussion and research into the various aspects of the music business. The goal
is to inform and educate aspiring music professionals, connect them with the industry, and raise the academic level and interest
inside and outside the Berklee community (www.thembj.org). At Five to seven issues a year. 415K sessions since April 2011,
with 325K users; monthly average readers 6K (May 29, 2017)

HONORARY ENGAGEMENTS
KEYNOTE SPEAKER: Business & Economics Society
International, Annual Conference 2010, Athens, GREECE.
Invited by the Fellows of the Society for my work in music and economics. B&ESI authors the prestigious Global Business and
Economics Review Journal. The subject I chose to speak about was “The Music Trade in the New Millennium”

CONFERENCE CHAIR: International Music and Entertainments Industry Educators’ Association, Annual Conference 2009,
Boston. Prepared Berklee's proposal to the MEIEA Board of Trustees, and won approval for Boston as the conference venue.
Managed most of the executive planning for the conference, including the speaker list and the schedule, accommodation,
student and staff in-house support. Spearheaded Berklee's debut as national/international conference host and offered a
congenial atmosphere that brought together entertainment analysts, recorded music sellers, music product luminaries, live
music business practitioners, publishers, and members of the collection societies. As many as forty-four separate events took place on Friday March 27 and Saturday March 28, including two keynotes speeches, many distinguished panels, twenty-four academic papers on the business of music and its pedagogy, an impressive collection of music business and audio-pro clinics, and a handful of roundtables discussing "hot topics". The conference was the best attended in MEIEA's thirty-year history, with 400 registrants from other states and abroad

HONORARY ENGAGEMENTS

MUSICAL COORDINATOR. The Latin Recording Academy of Arts and Sciences. Special Awards Ceremony, Las Vegas, USA, Nov. 7, 2007. I was published in Grammy Latino and known as a “Friend of The Academy”. In particular, over the course of 2004-2007 I had cemented a strong bond between Berklee, LARAS, and our Latin students, including a Berklee visit by LARAS President Gabriel Abaroa, two student trips to the Grammys, and, finally, an invitation for a Berklee student band to perform in Las Vegas—a first ever for the Academy. I rallied my colleagues in Berklee’s Performance Division, and helped produce the event. In recognition, the Academy named me Musical Coordinator

Expertise
Global Brand Strategy / Operations / Entertainment Marketing / Music & Talent / Content Development / Events & Sponsorship / Revenue Diversification / General Management / P&L

Experience

Vice President of Marketing, WeTransfer  
March 2017 – Present
- Oversee global marketing communications, music, arts, education, and brand for a platform with over 40 million monthly active users in 107 countries
- Current initiatives include: ongoing partnerships with Kamasi Washington, FKA Twigs, and Moby; a documentary on music's importance in Skid Row; a 40th anniversary celebration of the Voyager Spacecraft’s Golden Record in collaboration with NASA, the Seti Institute, and more.

Program Director, Red Bull Gmbh  
April 2015 – January 2017
- Oversaw Red Bull Sound Select -- an accelerator program for emerging artists leveraging 200+ yearly events, in-studio collaborations with leading creators, distribution and marketing to drive organic brand ambassadorship
- Responsible for program’s long term growth and strategy, including successful execution in 7 new countries

Accomplishments
- Program confirmed as Red Bull’s most successful lifestyle marketing initiative in driving beverage sales, per 2015 global analysis
- Featured and quoted in Mic.com article hailing Red Bull’s work as “the future of the music industry”

Culture Marketing Manager, Red Bull  
November 2012 – March 2015
- Defined Red Bull’s strategy for marketing in emerging music in US, CA, and NZ -- overseeing brand, communications, event, digital, content, and artist development for Red Bull Sound Select
- Aligned cross functional team of over 70 HQ and field personnel from multiple departments and disciplines to execute the program
- Launched a network of 200+ yearly events and festival sponsorships as program’s core touchpoint for artists and fans
- Acted as the program’s primary spokesperson to industry and media

Accomplishments
- Oversaw Red Bull Sound Select’s 30 Days in LA, a month-long music festival featuring 60 artists in 30 different venues throughout Los Angeles
- Activated 400+ artist ambassadors and 40 curator partners as ongoing brand ambassadors
- Managed teams to execute major initiatives at SXSW and Lollapalooza, together driving over 60,000+ unique consumers to engage with brand online before and after events

310.489.8012

**Director of Brand Partnerships, Sonicbids**
May 2011 – November 2012

- Managed partner acquisition and oversaw project delivery for portfolio of brands seeking development of comprehensive music marketing programs
- Lead department that grew from 0-35% of company revenues in four years to act as its core driver of business valuation
- Shaped Sonicbids’ broader product, finance, and marketing strategy as member of executive team leading company towards its exit in January 2013

**Accomplishments**

- Headed team that led Red Bull to consolidate 26 music properties under a singular message in 2012
- Collaborated with Bud Light to develop ‘Amplify Your Summer’ as agency providing artist outreach and microsite
- Built enterprise solution for Marriott to book recurring, live music events in 100+ Renaissance Hotels as part of global rebrand

**Senior Manager / Account Manager, Sonicbids Brands**
Apr 2008 – Apr 2011

- Designed global music programs leveraging unique content and events for leading brands
- Diversified Sonicbids offering from online media to a full service music marketing firm over 3 years
- Established a new business unit that has generated millions in profit since it launched in 2008

**Accomplishments**

- Secured relationship as Diesel’s entertainment agency and executed global campaigns activating custom technology, local market teams, and strategic partners to expand brand awareness
- Partnered with and executed integrated marketing initiatives for brands including:
  - Gap: “Born to Play” 40th anniversary event placing 767 bands in 767 stores on a single night
  - Converse: “Get Out of the Garage” multi-platform music contest partnering with Journeys stores
  - Universal Pictures: “Indie Rock vs the World” band contest in support of Scott Pilgrim vs the World
  - JanSport: “Battle of the Bands” online artist program culminating at SXSW
  - Landshark Lager: “Landshark Rocks” Contest with Real Networks and Rolling Stone

**Business Development Representative, Sonicbids**
July 2007 – Apr 2008

- Built Sonicbids promoter network through partnerships with music festivals, venues, and colleges

**Accomplishments**

- Acquired 50+ strategic partners to drive network liquidity before shifting focus to develop new revenue stream
- Spearheaded initiative to tap collegiate concert market through partnership with NACA (1,600+ member schools)

**Outside of the Office**

- Advisory Board Chair: Better Youth, non-profit media arts organization providing mentorship to
underserved youth in the south side of Los Angeles
● Advisory Board: Institute for Creative Entrepreneurship, Berklee College of Music

Education

Berklee College of Music

M.A., University of Michigan, Ann Arbor English Literature
B.A., University of Massachusetts, Amherst Major: English

PROFESSIONAL EXPERIENCE
BERKLEE COLLEGE OF MUSIC (2007-present)
Boston, MA, 2 campuses, 4,500 students

Dean, Institutional Research and Assessment/Graduate Studies, 2011-present
Chair, Liberal Arts and Sciences, 2007-2011

As Dean of Institutional Research and Assessment/Graduate Studies, provide overall leadership and guidance for academic quality and assessment of student learning for all undergraduate and graduate programs.

Provide leadership for all issues regarding institutional assessment, including assessment of strategic initiatives.

Founding dean of graduate studies, providing leadership for all aspects of graduate programs at the Boston campus and the campus in Valencia, Spain. Responsible for curriculum development, faculty recruitment and development, development of academic and student support structure for graduate studies, and development and implementation of all student and academic processes.

Oversee study abroad curriculum and implementation at the undergraduate level. Serve as academic leadership liaison between Boston and Valencia campuses.

Provide overall leadership and guidance for all accreditation and improvement processes. Lead all work with the New England Association of Schools and Colleges, all professional accreditation, and ensure compliance with the Commonwealth of Massachusetts. Led college’s most successful re-accreditation to date in 2013 and led successful change requests for master’s degree, online degrees, and merger between Berklee and the Boston Conservatory. Lead program review and assessment for the institution; lead Office of Institutional Research. Lead all articulation agreements, including articulation with international schools in Berklee International Network.

Manage multiple staff and program directors, as well as graduate and study abroad faculty. Manage multi-million dollar budget. Responsible for faculty exchanges between Boston and Valencia campuses.

As Chair of Liberal Arts, provided overall leadership and guidance for all liberal arts and sciences faculty and course work for all undergraduate students, as well as faculty recruitment and development; programming; curriculum development; and advising and support. Responsible for development and management of liberal arts and sciences minors at Berklee. Responsible for faculty hiring, promotions, and development. Responsible for guest artists and lecture series, including Africana Studies curriculum and programming; Music and Society curriculum and programming; and Musical Theater curriculum and programming.
Led Africana Studies and Women Studies programming. Led academic support services including tutoring, English as a Second Language Program, assessment program of incoming students, and Center for College Writing and English as a Second Language.

Founded new curriculum and programming, including
Graduate studies
  o 6 Master of Music programs
  o 2 Master of Arts programs
Undergraduate studies
  o Study abroad semester for undergraduates
  o Performance Poetry Program and Poetry Slam Team
  o Musical Theater Program
  o Liberal Arts Minors

EDUCATION

DOCTOR OF EDUCATION, 2003
National Louis University
Chicago, IL

*Toward a Process of Mythocognition: Reflexive Engagement Method and Self Knowledge Construction* (Dissertation)

MASTER OF EDUCATION, 1980
Boston University
Boston, MA

BACHELOR OF ARTS, 1974
University of Albany
Albany, NY

QUALIFICATIONS

Extensive background in Higher Education administration, specifically in undergraduate and graduate course design and instructional facilitation, assessment and evaluation of content delivery methods, including asynchronous and blended-hybrid models, faculty training and professional development initiatives, establishing peer mentoring-coaching collaborations for faculty enhanced understanding of the interdependencies in the teaching –learning experience.

Designed multi-tiered constructivist based educational programs, integrating regional accreditation and regulatory standards with content mastery demonstration and learner centered outcomes, recognizing the diversity of the learner and its impact on the learning experience.

Excellent interpersonal and communication skills, adept at developing trust and rapport with many diverse internal and external constituencies, and designing multi leveled presentations for the general public and identified community audiences.

Created and implemented ‘individualized-integrated’ academic excellence programs and events, designed to support the unique development needs of the faculty and its integration within the overarching department, school-based or institutional strategic goals.

Significant accomplishments in organizational analysis and strategic direction, staff development, collaborative problem solving, operational effectiveness and quality assurance, and financial efficiency including grant development and budget administration, and performance management evaluation systems.
HIGHER EDUCATION EXPERIENCE

WORK HISTORY

Berklee College of Music: Boston, MA (2006 to Present)

Associate Professor, Music Business Management

Teaching responsibilities include introductory and advanced courses within my area of specialization; in organization theory, organizational behavior, systems thinking, strategic planning, and research methods at the undergraduate level. Committed to utilizing an interdisciplinary teaching framework within a liberal arts tradition. Serve on department-wide Strategic Planning Committee, looking at projected analysis of course enrollment, admissions criteria, curriculum integration and course outcomes, new program initiatives, faculty instructional support and pedagogy development. Member of the Division-wide committee on career development strategies. Co-Facilitator of Office of Faculty Learning Community looking at the implications for “Teaching Graduate Students”. Have presented at the annual BTOT-Berklee Teachers on Teaching events on multiple topics related to instructional design and teaching mastery. Have represented Berklee at annual Music Entertainment Industry Educators conferences on assessment strategies, faculty development and student competencies.

Cambridge College: Cambridge, MA (1990 to present)

Program Director, Office of the Provost/Academic Affairs

Interim Director, Merrimack Valley Regional Center

Chief academic and administrative officer for regional campus located in Lawrence MA, serving 200 adult learners, principally adult, English Language Learners, in undergraduate programs of multidisciplinary studies, psychology, human services, and business as well as graduate programs in the area of management, counseling psychology and education. Recruitment, selection, training and performance evaluation of part-time, adjunct faculty. Creating community partnerships and academic outreach opportunities. Marketing and public information campaign as well as grant development and management. Financial management of $1.8 million dollar budget.
Program Manager, Instructional Design and Faculty Development

Provide academic leadership and strategic oversight for blended instructional delivery program and related student support services. Facilitate collaborative leadership and team support in the overall planning, management and execution of strategic divisional and institutional goals for the Center for Adaptive Learning and Programs, and responsible for coordinating Center participation in all facets related to the recruitment and retention of program’s students. Supervise and direct the activities of faculty, including hiring, training, scheduling and evaluation. Support leadership for the Center in determining services and design and development of quantitative and qualitative evaluation methods to measure program effectiveness and student success. Served as faculty mentor and orientation training coordinator for new faculty and workshop/seminar leaders. Co-Chair of Academic Excellence and Leadership Task Force, created to examine the mission of the college, roles of the administrative and the faculty, and organizational governance.

Visiting Faculty, Associate Professor, Business Management

Designed and taught courses in areas of business management practices and organizational leadership. Working closely with colleagues in various academic and administrative departments to advance the institution's mission and educational purpose and maintain a commitment to academic excellence and quality of service. Demonstrated expertise in a student-centric practice, able to adjust to changing work environment and to respond to changing institutional needs, possessing accurate, focused, and professional communication skills.

Founding /Associate Dean, School of Management

Chief academic officer for School of Management. Founding dean and member of the President’s senior administration. Providing leadership in program administration, academic and curricular planning, faculty training and development, budget assessment and development, student support services and retention efforts. Driving force behind the creation of the institutional identity for the school of management including: brand recognition, Liaison to NEASC and other accreditation agencies to ensure relevancy of program offerings and standards.

Director, Springfield Center

Chief enrollment -administrative officer for regional campus serving 350 adult learners in graduate programs of management, counseling psychology and education. Recruitment, selection, and evaluation of faculty. Creating community partnerships and academic outreach opportunities. Marketing and public information campaign development. Acted as primary spokesperson and institutional liaison for all community based activities in Western Massachusetts. Responsible for financial management of $2.5 million dollar budget.
Assistant Dean of Education

Oversaw the redesign and operation of the National Institute for Teaching Excellence, a five-week residential college program for teachers utilizing integrative/accelerated learning methods. Provided assistance to the Dean, in program administration, academic planning, faculty training and development, fiscal planning, student support services and retention efforts.

Assistant to the Dean of Education

Coordinated academic program development, maintained liaison relationships with local schools, business and community organizations, and accreditation agencies to ensure relevancy of program offerings and standards. Assisted in marketing and admissions efforts, worked collaboratively with other college departments to assist student affairs activities.

Faculty-Admissions Representative

Developed and implemented recruitment strategies to attract graduate students, including public information sessions, academic advising seminars, and career development workshops. Management and achievement of enrollment goals utilizing alumni and faculty collaboration efforts, as well as direct mail, target audience promotional strategies, and public and community relations activity.

Senior Faculty

Designed and implemented graduate level courses in creativity and critical thinking, teaching methods, learning styles assessment, leadership and management, and communication effectiveness.

Excelerated Learning Systems: Lynnfield, MA (1980 to Present)
Consultant

Provided wide range of a management and educational consulting services to higher educational institutions, private sector corporations, government institutions, and non-profit community based organizations. These services included business model development, strategic planning, staff training and development initiatives, facilitation of total quality practices, integrative learning methods, and competence-based assessment, communication and marketing strategies, and fund raising.

Fielding Institute: Ed. Leadership & Change Program, Santa Barbara, CA (1996 to 1999)
Cohort Administrator/Marketing Consultant

Coordinated the academic and administrative responsibilities of the Doctorate of Education program for the New England Region, as well as ancillary sites in Detroit, Cleveland and Chicago, including enrollment marketing and recruitment, as well as student support services and retention efforts. Collaborated with faculty and staff on the design; development;
and administration of regional and national academic conferences; assessment of program goals and implementation strategies; articulation of performance standards criteria; design of a faculty search process, as well as the national recruitment process for newly created senior level administrator. Designed and presented Orientation and Planning Seminars, as well as academic workshops in areas including: Adult Education and Learning, Discussion Leadership Teaching; Participation Program Evaluation; Integrative Learning and Leadership Styles; and Critical Creative Thinking Strategies. Represented the institution at various community and professional organizations and conferences

**Undersecretary of Energy Resources**

Chief operations officer responsible for overall management of cabinet-level agency. Duties included policy development, program implementation and evaluation, planning and evaluation of fiscal systems, development and implementation of public information campaign, office communications systems, professional and support staff training and supervision. Represented the Secretary of Energy Resources at public hearings, media related activities, and Executive Committee.

**Boston University, Division of Student Affairs, Boston, MA (1978 to 1985)**

**Student Development Officer**

Designed, implemented, and managed a comprehensive leadership education center to assess and develop academic/career skills of student population. Developed market research to identify a consumer profile and determine the success of student life services. Coordinated program initiatives to enhance student retention and social/academic/development efforts.

**Assistant Dean of Students**

A senior management member of the Division of Student Affairs, provided assistance/direction to a team that included Residence Life, Student Activities, Counseling Services, International Students, and Orientation Programs. Produced leadership development series, freshmen support programs, campus safety and drug/alcohol awareness campaigns, and an innovative “future tuition” finance model in conjunction with the President’s office. Wrote a weekly information column titled “Ask Joe” for the University newspaper. Advisor to the Student Union –student government.

**Director, South Campus**

Provided leadership in all aspects of residence life and housing operations in the creation and administration of a 1500 student, forty-five building, and four-city block campus in the Fenway Park area of Boston, Massachusetts. Responsibilities included management of facilities, selection, training, supervision and evaluation of 25 staff members, educational programming
with a sensitivity to the neighborhood and the diversity of its residents, acting as the administrative liaison to local and city officials, general student counseling, advisor to campus government, and working with college and community based judicial systems. Developed PRIDE (Personal Responsibility in Determining Excellence) a project with campus wide initiative to increase student/local resident communication and unity.

Residence Director

Managed housing facility for 500 students, supervised training, and evaluation of Resident Assistant staff, acted as student counselor, advisor for program development, and judicial board chairperson. Coordinated Faculty in Residence – Special Events program.

Community Alternatives Inc., Springfield, MA (1976 to 1978)

Education Program Director

Directed Massachusetts “Chapter 766” Education Program, providing alternative educational opportunities for “at-risk” student population in Springfield, Massachusetts. This included development of learning contracts, course design, instructor selection and training, student assessment and academic record keeping. Implemented community-based career exploration program as part of student curriculum which enhanced school and business partnerships. Designed and facilitated a series of success skill seminars and counseling services to assist returning to ‘mainstream setting’ students.

Neighborhood Resources Center, Albany, NY (1974 to 1976)

Director of Community Programs

Provided social and educational programs to community organizations, business and public institutions as part of urban revitalization and citizen participation program in Greater Albany, New York region. Positions included the recruitment, promotion, and management of events, performers and exhibits, as well as grant writing, fund raising, state and local government liaison, and program evaluation. Established peer tutorial, job mentorship, and community newspaper programs as part of a “Take back our streets” campaign.

WORK EXPERIENCE

Jan 2013 – Present

Director, Music Production, Technology & Innovation
also Director of Academic Technology
and Senior Advisor for Technology and Strategy

Berklee College of Music, Valencia Campus

http://valencia.berklee.edu

Founding Director, Music Production, Technology & Innovation (2013 – 2016)

- Create & Launch Masters Degree in Music Production, Technology & Innovation
- Design & Implement Production Curriculum for Contemporary Performance Masters Degree
- Create Undergraduate Minor in Music Technology
- Collaboratively write curriculum, hire and manage faculty and staff, recruit students, create and implement policies, manage budgets

Founding Director of Academic Technology (2013-2015)

- Chief Technology Officer for the Berklee Valencia Campus
- Triage and stabilize technology operations for students, faculty and staff
- Set up framework and structures for Labs, Studios and IT
- Create Production Department to support concerts and events
- Recruit & hire a dream team of technologists, educators and administrators, systematically delegate to ensure my smooth departure
- Advocate for resources, manage budgets, serve multiple constituencies

Senior Advisor, Technology and Strategy (2015 – 2016)

- Advise executive team; frequent walking meetings with Maria and Brian
- Advise technology teams
- Negotiations on behalf of the college with Sonar, MIT Technology Review (EmTech), MIDEM, software and equipment developers, etc.

Highlights

- Build MPTI Masters into Berklee’s largest Masters program
- Offer Berklee’s first courses in Music Video Production, EDM, Live Sound and Stagecraft
- Performances at the Royal Opera House (Madrid), MIT’s EmTech (Valencia), Sonar Festival (Barcelona), Forum Impulsa (Girona), World Business Forum
- Speak at MIDEM (Cannes), International Music Summit (Ibiza), BIME (Bilbao), Amsterdam Dance Event (Netherlands), TEDx (Valencia), Music Tech Fest (Berlin),
- Present Workshops and Master Classes In Freiburg Germany, Quito Ecuador, Bogota Columbia
- Deliver keynote Address at International AES Convention in Rome
- Found Innovation ¡En Vivo! Concert Series
Sept 1998 - Jan 2013  
**Professor of Music Production & Engineering, and Ensemble**  
Berklee College of Music, Boston  
www.berklee.edu

**International Projects**
- Pioneer relationships with Berklee partners in China
- Pioneer relationship with JMC Music Academies (Australia BIN Schools)
- Pioneer first State Department sponsorship of a Berklee ensemble international tour
- First technology workshops in Valencia, hire first engineer
- Master classes in Athens, Quito, Helsinki, Beijing, Shanghai, Israel
- Auditions in Jordan and Israel

**Leadership Roles**
- Nashville Trip Co-Leader (21 years)
- Steelgrass Residency designer and facilitator (7 years)
- Pioneer courses in Hip-hop, Turntablism, Surround recording & mixing
- Course Coordinator for much of the MP&E Curriculum
- Elected to the Berklee Faculty Union Executive Board

**Highlights:**
- Outstanding Online Course Award for 2010, *Music Production Analysis*
- Features on the *Today Show, CBS Sunday Morning, New York Times, All Things Considered*
- Outstading Faculty Award, 2004
- *Scratch Ambassadors – Early Berklee YouTube Video over 50,000 views*
- Shepherd Honorary Doctorates to Earl Scruggs, Emmylou Harris, Doc Watson

**Assistant Chair, Music Production and Engineering**  
Berklee College of Music, Boston

- Coordination of the Music Production and Engineering Department
- Oversee staff, faculty, curriculum and facilities
- Outstanding New Leader Award, 1995

Sept 1988 - Aug 1994  
**Assistant Professor of Guitar and Electronic Music**  
Austin Peay State University, Clarksville, TN

- Oversee Guitar program (graduate & undergraduate)
- Oversee Electronic Music and Recording programs
- Instrumental in plans for and construction of new Music / Mass Communications building
- Oversee design and purchase of all recording studio and lab technology systems
- Supervise technology staff, adjunct faculty and graduate assistants

June 1986 - Aug 1994  
**Chief Engineer, Mid-South Recording Studios**  
Nashville Area

- **Engineer, Produce and/or Mix over 100 albums in multiple genres**
- Oversee design, construction, installation and updating of studio
- Hire and manage staff of engineers and assistants
- Oversee computer and studio systems maintenance

September 1987 - Present  
**President, Willow Shade Records**  
Nashville, Boston, Valencia

- Releases in Vinyl, CD and DVD
- Cumberland Consort (Classical Crossover, extensive NPR airplay)
- Manhattan Guitar Duo and Kevin Gallagher (Classical)
- Brenda Stewart and One Way (charting CCM artists)
- **Stylus Symphony** (CD & DVD, Classical Crossover)

EDUCATION AND TRAINING

1981  Bachelor of Music in Jazz Studies
University of North Texas, Denton TX, Cum Laude
  ▪ Minor in Composition

1988  Master of Music in Guitar Performance
Western Kentucky University, 4.0 GPA
  ▪ Minor in Composition
  ▪ Graduate Assistant – teaching lessons, ensembles and classes

1990  Post-Graduate Studies in Guitar and Music Technology
Aspen Music School
  ▪ Sharon Isbin (Julliard), Michael Chicowski (Julliard) – principle professors

1994-1996  Post-Graduate Studies in Creative Writing and Grant Writing
Harvard University Extension, Cambridge MA, 4.0 GPA

1997  Intensive Training in Surround Sound
Dolby Labs, San Francisco
  ▪ 5.1 Encoding Systems, Recording, Mixing & Mastering

PUBLICATIONS

2016  The Art of Record Production and Music Production Capstone Project
Massive Open Online Courses, Berklee Online and Coursera, in production

2013  Creative Music Production: From Demo to Final Master
12-week Online Course, Berklee Online

2010  Music Production Analysis
12-week Online Course, Berklee Online
  ▪ Winner of "Best Online Course Award" from the University Continuing Education Association

2006  DJ Skills: The Ultimate Guide to Mixing and Scratching
Focal Press, Trade Book, Non-Fiction

2013  Turntable Technique: The Art of the DJ
Berklee Press Best-Seller
  ▪ First book to teach the turntable as a musical instrument
  ▪ First book to use written notation for the turntable

1994 - Present  Magazine and Journal Publications
Over two dozen articles and cover-stories for:
  ▪ Mix Magazine
  ▪ Electronic Musician
  ▪ ProSound News
  ▪ Re-Mix Magazine
  ▪ Berklee Today

**AUDIO ENGINEER | AUDIO EDUCATOR | MUSICIAN | CONSULTANT**

- *Music Production and Engineering Professional* with more than 20 years experience as an Educator in music production and associated technologies
- Educator in a variety of studio environments Mixing/Recording/Editing/Sound Design

**PROFESSIONAL EXPERIENCE**

**Associate Professor --- Music Production and Engineering**  
**BERKLEE COLLEGE OF MUSIC** Boston, MA (2006—present)
- Teach core courses include MP 211, MP 212, MP 214 for the Music Production and Engineering Department.
- Teach advanced electives MTEC 420, MTEC 422P elective by the Music Technology Division students
- Host workshops with visiting artists such as George Massenburg and Doug Sax
- Completed training to teach freshman seminar required of all students
- Completed ‘Teaching Transformational Teachers’ training with Pratt Bennet
- Delivered BTOT sessions on listening and loudness
- Presented session on the subject of noise reduction and removal to the MTEC division
- Deliver sessions to the summer audio production workshop on mastering
- Speaker at AES and NAMM on behalf of the college on various subjects related to audio and education
- Advise students on their academic work and career path decisions
- Engineer various faculty grant recording and mixing sessions

**Education Director/Chief Studio Engineer**  
**IZOTOPE INC** Cambridge, MA (January 2015—present)
- Lead a team that develops and implements educational plans for manufacturer of audio signal processing plug-ins
- Create/design and implement customer and employee facing training
- Advise on sound design and preset creation
- Write expert blog posts in the domain of audio engineering
- Consult on product design, processing choices and strategies, UI and UX
- Responsible for vision and implementation of construction of two room state of the art studios within iZotope facilities. Hired and consulted with acoustic designer and facility contractors. Specified equipment choices
President and Chief Engineer

**M WORKS MASTERING STUDIOS** Cambridge, MA (1991—present)

*Website:* (www.m---works.com)

- Manage a multi-room facility including a staff of eight
- Conduct mastering sessions for labels, producers and artists
- Edit multitrack, stereo and surround masters
- Install and maintain state of the art digital audio technologies
- Restore, master and mix legacy and archival material
- Complete forensic projects for legal and government agencies
- Devised and implemented on location video webcasting services for musical and institutional clients
- Hire, supervise and mentor staff

Mastering Engineer

**NORTHEASTERN DIGITAL RECORDING** Southboro, MA (1985—1991)

- Conducted attended and unattended mastering sessions for labels, producers and artists
- Edited and QC engineering
- Prepared and tracked invoices
- Location recording using state of the art digital audio technologies
- Mixed archival material
- Conducted forensic and restoration projects

OTHER WORK EXPERIENCE

**Assistant Professor**

**BERKLEE COLLEGE** Boston, MA (1988—1990)

**Recording Teacher**

**THE RECORDING WORKSHOP** Chillicothe, OH (1983—1985)

**Personnel Manager**

**BOSTON PHILHARMIC ORCHESTRA** Boston, MA (1981—1982)

EDUCATION

*Certificate, The Recording Workshop* Chillicothe Ohio (1983)

Graduate studies in French Horn,

*A.B., French Horn and Music composition,*
Vassar College Poughkeepsie, NY (1981)
ASSOCIATIONS & CONFERENCES

Associations:
Member, NARAS (Board of Governors 2001–2009) (1985–present)
Member, Audio Engineering Society (1985–present)

Conferences:
Audio Engineering Society US and Europe annual convention, Speaker (1999–present); Seoul, Sao Paulo, Berlin, Warsaw, Los Angeles, New York
National Association of Music Merchants (NAMM), Speaker (2011–present)

PUBLICATIONS and AWARDS

Book:
Audio Mastering: Essential Practices Berkleepress
(2012)

Articles in Multiple Journals including:
Studio Sound, REP, Performer, Blogs for M Works and iZotope

Grammy Nomination: “Invention and Alchemy” – Classical Crossover album, 2005

TEC Award Winner 2017: “Pro Audio Essentials” online ear training web application

PRESENTATIONS

Speaker:
NAMM HOT Zone (2012–present)

AES conferences workshop chair and participant
AES society: adjudicate International student recording competition categories 1, 2 and 3
Berklee Summer Workshop
Lectures to AES Seoul on multichannel mixing and authoring

Moderator:
“Producers Presenting” series featuring Elliot Scheiner, Will Ackerman, George Massenburg, Brad Michael, Scott Billington, Mike Denneen, Prince Charles Alexander, Tom Bates, Paul Kolderie, Sean Slade, Phil Ramone, Frank Fillipetti, Adam Ayan

CREDITS

More than 5000 albums mastered, mixed and produced for many notable artists including Miles Davis, Kiri Te Kanawa, Bruce Springsteen, Nirvana, Aerosmith, London Symphony Orchestra, David Bowie

Restoration and forensic work on behalf of the US Dep’t of Defense, National Archive of New Zealand and others.
